procedures, and testing of operator and maintenance personnel to meet regulatory requirements. This manual arms you with the information and strategies you need to comply with regulatory standards from training to procedures and reference documentation to testing operations and maintenance personnel. Highly Recommended for : Power Plant Professionals seeking high growth in career Interview preparations for power plant jobs A comprehensive training manual on Steam Turbines & auxiliaries (Non Reheat Type) covering all aspects for thermal power plants. Its a 300 page Spiral bound manual must for every power plant professional. The manual contains text, images/drawings & illustrations. So far the books written on thermal plants describe mostly the reheat type units. These books are intended for technical personnel working in utility plants but, again, most of them deal predominantly with the theoretical aspects of turbines and their auxiliaries and lack in practical side of the subject. The aim is to give following benefits to the reader: To provide an in-depth knowledge of plant and equipment to the plant professionals associated with industrial boilers and turbines. It is to be noted that most of the industrial thermal units (like captive power plants attached to main technological units) are of non-reheat type. To cover the practical aspects of thermal power stations missing in most of the books available in the market. The book describes in details the constructional features of the plant and equipment, their operation and maintenance and overhauling procedures, performance monitoring as well as troubleshooting. To cover the theoretical aspects of a thermal unit necessary to be known to the professionals for thorough understanding of the systems involved. This knowledge would assist them: In selecting the plant and equipment suitable to their requirement In operating and maintaining the plant with best efficiency, availability and reliability The book is a must for those working professionals who aspire for a fast growth of their professional career. It will also be of immense help to the personnel preparing for boiler proficiency examinations. It contains following topics: Chapter – 1 Thermodynamics of a Steam Turbine Chapter – 2 Steam Turbine Fundamentals Chapter – 3 Constructional features of steam turbines Chapter – 4 The lubricating oil system Chapter – 5 Steam turbine governing system Chapter – 6 Steam turbine protection system Chapter – 7 Turbovisory system Chapter – 8 Turbine gland sealing system Chapter – 9 Turbine system and cycles Chapter – 10 Condensers, deaerators and closed feedwater heater Chapter – 11 Main and auxiliary cooling water systems and cooling towers Chapter – 12 Turbine Plant Pumps Chapter – 13 Condensate and feed water treatment Chapter – 14 Turbine Plant Operation Chapter – 15 Turbine Plant Maintenance Chapter – 16 Turbine performance and optimization Frequently published using the same ISBN. World Impact's vision is clear and bold: to recruit, empower, and release urban leaders who will plant churches and launch indigenous church planting movements. We have established The Evangel School of Urban Church Planting to equip church planters to plant healthy churches among the city's poor. Through assessment, coaching, and consultation, we facilitate church plant teams to use biblical wisdom as they engage unreached urban neighborhoods, with the goal of planting churches where Christ will be honored, the Word of God preached, and justice and compassion demonstrated for all to see. This guidebook is the official text for the Dean Training course to help churches and ministries sponsor their own church plant training. Designed as a manual for deans who help steer urban church planters, this workbook provides a blueprint for the whys and wherefores of the entire process, from formation of the team to transitioning leadership of the newly planted church. On completion of their course and Dean Commissioning, Deans are then certified to host their own Evangel School sessions within their ministry context. This text is keyed to other valuable resources specifically designed for the Evangel Church Plant Schools in order to help urban church planters plant churches in the city (i.e., Ripe for Harvest: A Guidebook for Planting Healthy Churches in the City and Planting Churches among the City's Poor, Vols. 1 and 2). In addition, online videos, PowerPoint presentations, and other supplemental resources developed for Evangel Church Plant Schools are available to help a church, organization, or ministry train teams to plant churches among the poor. Join us as we strive to plant thousands of healthy churches in communities where Christ is not yet known! Covers techniques to document training, procedures, and testing of operator and maintenance personnel to meet regulatory requirements. This manual arms you with the information and strategies you need to comply with regulatory standards from training to procedures and reference documentation to testing operations and maintenance personnel. This manual has been developed for trainers to assist in the training of agriculture extension staff in Pacific island countries to become plant health doctors. The doctors will be responsible for the development and running of plant health clinics (PHC).
