The Athlete Burnout Questionnaire Manual Nov 13 2019 This test manual, the fourth in FIT's Sport and Exercise Psychology Test Clearinghouse, is a succinct and informative resource outlining the conceptual basis of the athlete burnout syndrome and its measurement. The manual delineates the process used in developing the ABQ and provides users with information on the meaning of scores derived from its use. Aspects related to the ABQ are presented in a comprehensive manner: Athlete Burnout Questionnaire (ABQ), along with the guidelines for administering and scoring it; Conceptual underpinnings of the ABQ, including an overview of the burnout construct and the operational definition used to guide item development, as well as a description of how the preliminary item pool was developed; Review of research using a within-network approach to examining the internal structure of the burnout construct based on the ABQ; plus a description of both internal consistency and stability of ABQ scores; Discussion of a between-network approach to construct validation by examining the relationship of ABQ scores to theoretically relevant variables stemming from stress, sociological, and motivational perspectives on burnout; Basic descriptive statistical information that can help users interpret the meaning of scores derived from the ABQ.

Twelve Years A Slave (Illustrated) Jan 28 2021 Twelve Years a

Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Consultative Selling Jan 08 2022 When you help your customers and clients make profitable business decisions, the result is a win-win solution that can lead to a mutually beneficial long-term business relationship. In Consultative Selling, sales consultant Mack Hanan helps you achieve just that by introducing a formula that will take your sales to the next level--one that involves you exchanging your salesperson hat for that of a trusted consultant. You'll learn how to: create a two-tiered sales model to separate consultative sales from commodity sales; build and use consultative databases for value propositions and proof of performance; study your customers' cash flows to win proposals; use consultative selling strategies on the web; and cope with--and reverse--the inevitable "no." For over four decades, Consultative Selling has empowered countless sales professionals to reap maximum success. Now, packed with new partnering strategies, cost/benefit analysis templates, detailed monetized value proposition models, outcome-based branding approaches, and powerful consulting tactics, the eighth edition of this invaluable resource will bring you wide-ranging success--making the competition irrelevant.

A Fleet Street in Every Town Aug 23 2020 At the heart of

Victorian culture was the local weekly newspaper. More popular than books, more widely read than the London papers, the local press was a national phenomenon. This book redraws the Victorian cultural map, shifting our focus away from one centre, London, and towards the many centres of the provinces. It offers a new paradigm in which place, and a sense of place, are vital to the histories of the newspaper, reading and publishing. Hobbs offers new perspectives on the nineteenth century from an enormous yet neglected body of literature: the hundreds of local newspapers published and read across England. He reveals the people, processes and networks behind the publishing, maintaining a unique focus on readers and what they did with the local paper as individuals, families and communities. Case studies and an unusual mix of quantitative and qualitative evidence show that the vast majority of readers preferred the local paper, because it was about them and the places they loved. A Fleet Street in Every Town positions the local paper at the centre of debates on Victorian newspapers, periodicals, reading and publishing. It reorientates our view of the Victorian press away from metropolitan high culture and parliamentary politics, and towards the places where most people lived, loved and read. This is an essential book for anybody interested in nineteenth-century print culture, journalism and reading.

Operation and Control in Power Systems, Second Edition May 20 2020 In power system engineering, practically all results of modern control theory can be applied. Such an application will result in a more economical, more convenient and higher service quality operation and in less inconvenience in the case of abnormal conditions. For its analytical treatment, control system design generally requires the determination of a mathematical model from which the control strategy can be

derived. While much of the control theory postulates that a model of the system is available, it is also necessary to have a suitable technique to determine the models for the process to be controlled. It is therefore essential to model and identify power system components using both physical relationships and experimental or normal operating data. The objective of system identification is the determination of a mathematical model that characterizes the operation of a system in some form. The available information is either system output or a function of the system output. The input may be a known function applied for the purpose of identification, or an unknown function which could possibly be monitored, or a combination of both. The planning of the operation and control of isolated or interconnected power systems present a large variety of challenging problems. Solving these requires the application of several mathematical techniques from various sources at the appropriate process step. Moreover, the knowledge of optimization techniques and optimal control methods is essential to understand the multi-level approach that is used. *Operation and Control in Power Systems* is an introductory course text for undergraduate students in electrical and mechanical engineering. In fifteen chapters, it deals with the operation and control of power systems, ranging from load flow analysis to economic operation, optimal load flow, unit commitment, load frequency, interconnected systems, voltage and reactive power control and advanced topics. Various models that are needed in analysis and control are discussed and presented through out the book. This second edition has been extended with mathematical support material and with methods to prevent voltage collapse. It also includes more advanced topics in power system control, such as the effect of shunt compensators, controllable VAR generation and switching

converter type VAR generators.

Advances in Production Management Systems. Competitive Manufacturing for Innovative Products and Services Oct 05 2021 The two volumes IFIP AICT 397 and 398 constitute the thoroughly refereed post-conference proceedings of the

International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2012, held in Rhodes, Greece, in September 2012. The 182 revised full papers were carefully reviewed and selected for inclusion in the two volumes. They are organized in 6 parts: sustainability; design, manufacturing and production management; human factors, learning and innovation; ICT and emerging technologies in production management; product and asset lifecycle management; and services, supply chains and operations.

Inclusive Global Value Chains Jun 13 2022 This report's focus is making global value chains (GVCs) more inclusive. To achieve inclusiveness is by overcoming participation constraints for Small and Medium Enterprises (SMEs) and facilitation access for Low Income Developing Countries (LIDCs). The underlying assumption is that most firms in LIDCs are SMEs. Even larger firms in LIDCs are likely to face similar challenges to SMEs, including a less supportive domestic operating environment and weaker institutions that lead to higher fixed costs and challenges to compete on the international markets. The two major points of this report are (1) participation in GVCs is heterogeneous and uneven, across and within countries, and (2) available data and survey-based evidence suggest that SMEs' participation in GVCs is mostly taking place through indirect contribution to exports, rather than through exporting directly. The report makes the case that policy action, at the national and multilateral level, can make a difference in achieving more inclusive GVCs through: a holistic approach to reform spanning trade, investment, and domestic policies countries and investments in expanding the statistical base and analysis of GVCs and in sharing knowledge on best practices on enabling policies and programs. The report elaborates on three broad areas of recommendations: (1) establishing a trade and investment action plan for inclusiveness defining clear and achievable objectives on trade and investment policy and identifying the necessary complementary domestic policy actions; (2) complementing trade, investment, and domestic

policy actions by providing the needed political leadership and support to enhance collaboration across the sectors, and establishing global platforms for sharing best practices; and (3) providing political support for the establishment of a multi-year plan to expand and upgrade the statistical foundation necessary to increase the capacity of all countries to identify and implement policies that can contribute to stronger, more inclusive and sustainable growth and development, globally.

Advanced Technologies for Future Transmission Grids Sep 23 2020 The re-engineering of power transmission systems is crucial to meeting the objectives of such regulators as the European Union. In addition to its market, organisational and regulatory aspects, this re-engineering will also involve technical issues dealing with the progressive integration of innovative transmission technologies in the daily operation of transmission system operators. In this context, Advanced Technologies for Future Transmission Grids provides an overview of the most promising technologies, likely to be of help to planners of transmission grids in responding to the challenges of the future: security of supply; integration of renewable generation; and creation of integrated energy markets (using the European case as an example). These issues have increased importance because of administrative complication and the fragmentation of public opinion expressed on the build up of new infrastructure. For each technology discussed, the focus is on the technical-economic perspective rather than on purely technological points of view. A transmission-system-operator-targeted Technology Roadmap is presented for the integration of promising innovative power transmission technologies within power systems of the mid-long

term. Although the primary focus of this text is in the sphere of the European energy market, the lessons learned can be generalized to the energy markets of other regions.

History of Concepts Jul 14 2022 Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.

The Culture of Print Sep 04 2021 The leading historians who are the authors of this work offer a highly original account of one of the most important transformations in Western culture: the change brought about by the discovery and development of printing in Europe. Focusing primarily on printed matter other than books, The Culture of Print emphasizes the specific and local contexts in which printed materials, such as broadsheets, flysheets, and posters, were used in modern Europe. The

authors show that festive, ritual, cultic, civic, and pedagogic uses of print were social activities that involved deciphering texts in a collective way, with those who knew how to read leading those who did not. Only gradually did these collective forms of appropriation give way to a practice of reading--privately, silently, using the eyes alone--that has become common today. This wide-ranging work opens up new historical and methodological perspectives and will become a focal point of debate for historians and sociologists interested in the cultural transformations that accompanied the rise of modern societies. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
