It celebrates the Hammond B-3 organ, Rhodes and Wurlitzer electric pianos, the Vox Continental and Farfisa combo organs, the Hohner Clavinet, the Mellotron, the Minimoog and other famous and collectable instruments. From the earliest days of rock music, the role of keyboards has grown dramatically. Advancements in electronics created a crescendo of musical invention. In the thirty short years between 1950 and 1980, the rock keyboard went from being whatever down-on-its-luck piano awaited a band in a bar or concert hall to a portable digital orchestra. It made keyboards a centerpiece of the sound of many top rock bands, and a handful of them became icons of both sound and design. Their sounds live on: Digitally, in the memory chips of modern keyboards, and in their original form thanks to a growing group of musicians and collectors of many ages and nationalities. Classic Keys explores the sound, lore, and technology of these iconic instruments, including their place in the historical development of keyboard instruments, music, and the international keyboard instrument industry. Twelve significant instruments are presented as the chapter foundations, together with information about and comparisons with more than

thirty-six others. Included are short profiles of modern musicians, composers, and others who collect, use, and prize these instruments years after they went out of production. Both authors are avid musicians, collect and restore vintage keyboards, and are well-known and respected in the international community of web forums devoted to these instruments. (Jazz Transcriptions). The Jazz Guitar Omnibook features transcriptions of solos as played by some of the world's leading jazz artists. This collection includes 30 songs: Airegin (Wes Montgomery) * Honeysuckle Rose (Django Reinhardt) * Just Friends (Pat Martino) * Night and Day (Joe Pass) * On Green Dolphin Street (Barney Kessel) * Rose Room (Charlie Christian) * Royal Garden Blues (Herb Ellis) * Yardbird Suite (Tal Farlow) * and more. Choral Monuments provides extensive material about eleven epoch-making choral masterworks that span the history of Western culture. Included are: Missa Pange lingua (Josquin Desprez); Missa Papae Marcelli (G. P. da Palestrina); B Minor Mass (J. S. Bach); Messiah (G. F. Handel); The Creation (Joseph Haydn); Symphony #9 (Ludwig van Beethoven); St. Paul (Felix Mendelssohn); Ein deutsches Requiem (Johannes Brahms); Messa da Requiem (Giuseppe Verdi); Mass (Igor Stravinsky); and War Requiem (Benjamin Britten). The works are presented in separate chapters, with each chapter divided into three basic sections-history, analysis, and performance practice. Discussions of history are focused on relevancies-the genesis of the designated work in reference to the composer's total choral output, the work's place within the musical environment and social climate of its time, and essential features of the work that make it noteworthy. In addition, the compositional history addresses three other factors: the work's public reception and critical response, both at the time of its composition and in ensuing years; the history of score publications, detailing the various differences between editions; and the texts of the composition. The

material regarding textual treatment, which often includes the complete texts of the works being discussed, concentrates on primary concerns of the text's usage; also included in the discussion are noteworthy aspects of texts separate from the music as well as biographical details of librettists and poets, if appropriate. The analysis section of each chapter outlines and describes musical forms and other types of compositional organization, including parody technique, mirror structures, and motto repetitions, as well as salient compositional characteristics that directly relate and contribute to the work's artistic stature. Numerous charts and musical examples illustrate the discussions. The discussion of performance practices includes primary source quotations about a wide range of topics, from performing forces, tempo, and phrasing of each work to specific issues such as tactus, text underlay, musica ficta, metric accentuation, and ornamentation.
