This handy reference is an ideal companion to Pipe Trades Pocket Manual by the same author. This book enables pipefitters to solve difficult problems they will face in their work by providing instructions and calculations for common and unusual tasks. In

clear, easy-to-grasp language, the author covers many of the topics that you will need to know in order to win your dream job and be the first in line for a promotion. From the Book - Preface: This manual has been compiled to provide time frames, labor crews and equipment spreads to assist the estimator in capsulizing an estimate for the installation of cross-country pipelines, marshland pipelines, nearshore and surf zone pipelines, submerged pipelines, wharfs, jetties, dock facilities, single-point mooring terminals, offshore drilling and production platforms and equipment and appurtenances installed thereon. The time frames and labor and equipment spreads which appear throughout this manual are the result of many time and method studies conducted under varied conditions and at locations throughout the world; these time frames and labor and equipment spreads reflect a complete, unbiased view of all operations involved. When one is engaged in compiling an estimate from any information furnished by others, as is the case with this manual, he should view it in an objective light, giving due consideration to the nature of the project at hand and evaluating all items that may affect the productivity of labor and all other elements involved. Guide to Commercial Pipefitting is broken up into four sections: 1) Things to Know 2) Heating 3) Cooling 4) Sprinkler Basics Section 1 will highlight common methods of joining pipe, pipe data, air handler units, coils, radiant heat, baseboard heat, pipe hangers, etc. The information that will be covered in this section will further assist in understanding sections 2, 3, and 4 of this book. Section 2 will review steam boilers, hot water boilers, unit heaters, heat pump units, condensate tanks, and all the pipe trim that goes with it. Plate heat exchangers, shell-in-tube heat exchangers and other heat transfer sources are also described in detail. Section 3 will cover air conditioner units, cooling towers, chillers and all adjoining components. You will find answers to questions like - "What is the difference between chilled water and condenser water?" or "What is a water cooled condensing air conditioning unit, and how does it differ from an air cooled unit?" Section 4 will examine some of the basic methods used in preventing a fire in a commercial building. "What is a gravity tank?" "What is the difference between a wet pipe system and a dry pipe system?" "How do you identify the rating on a sprinkler head?" All of these questions are answered in Section 4. This is a MUST HAVE reference book for anyone in the pipe trades. 2012 Reprint of 1959 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. This manual is written especially to enable pipefitters to quickly solve problems involving pipe bending, layout or installation, either in shop or in the field. This second edition has 126 pages of additional material than published in the previous edition of 1953. A large part of the book is taken directly from the author's original tables which he has developed over a long period of time, as a result of his 35 years' experience as a pipefitter. These tables eliminate the necessity for making lengthy calculations by giving immediate answers to all kinds of pipe fitting problems. Information on: Pipe Bending, Offsets, Mitered Joints, Standard Pipe Dimensions and Thread Data, Screwed

Fittings, Valves, Solder Joint Fittings, Plastic Pipe, Sheet Metal Data, Properties of Steam, Melting Points, Conversion Factors and a Dictionary Of Terms. Most pipe fitters are well trained in the practical aspects of the job, but lack the needed math skills. The only way to be secure in your work is to increase your skill level in math to the point that you have the tools necessary to do your job. 3 of the 2535 sweeping interview questions in this book, revealed: Career Development question: Whos your Apprentice pipefitter mentor? - Detail-Oriented question: Describe a Apprentice pipefitter situation where you had the option to leave the details to others or you could take care of them yourself - Motivation and Values question: How do you handle stress?
