In the meantime strange things had been going on. When he caught hold of the first bee, Mr. Middlerib, for reasons, drew it out in such haste that for a time he forgot all about the bottle and its remedial contents, and left it lying uncorked in the bed, between himself and

his innocent wife. In the darkness there had been a quiet but general emigration from that bottle. The bees, their wings clogged with the water Mr. Middlerib had poured upon them to cool and tranquillize them, were crawling aimlessly over the sheet. While Mr. Middlerib was feeling around for it, his ears were suddenly thrilled and his heart frozen by a wild, piercing scream from his wife. Acclaimed travel writer Rick Antonson sets his adventurous compass on Mount Ararat, exploring the region's long history, religious mysteries, and complex politics. Mount Ararat is the most fabled mountain in the world. For millennia this massif in eastern Turkey has been rumored as the resting place of Noah's Ark following the Great Flood. But it also plays a significant role in the longstanding conflict between Turkey and Armenia. Author Rick Antonson joined a five-member expedition to the mountain's nearly 17,000-foot summit, trekking alongside a contingent of Armenians, for whom Mount Ararat is the stolen symbol of their country. Antonson weaves vivid historical anecdote with unexpected travel vignettes, whether tracing earlier mountaineering attempts on the peak, recounting the genocide of Armenians and its unresolved debate, or depicting the Kurds' ambitions for their own nation's borders, which some say should include Mount Ararat. What unfolds in Full Moon Over Noah's Ark is one man's odyssey, a tale told through many stories. Starting with the flooding of the Black Sea in 5600 BCE, through to the Epic of Gilgamesh and the contrasting narratives of the Great Flood known to followers of the Judaic, Christian and Islamic religions, Full Moon Over Noah's Ark takes readers along with Antonson through the shadows and broad landscapes of Turkey, Iraq, Iran and Armenia, shedding light on a troubled but fascinating area of the world. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. The All-America Football Conference and the National Football League battled for supremacy from 1946 through 1949. In the end, the players from the AAFC, as well as three teams, were

brought into the NFL. Through extensive research, the Professional Football Researchers Association (PFRA) has corrected the statistics and coaching records, selected offensive and defensive All-Pro Teams for all four seasons and an All-Conference team, and provided brief biographies and scouting reports for the members of the All-Conference Team. This book applies the concept of moral ordering to urban affairs. It demonstrates how multi-stakeholder engagement can enhance the quality of city life while supporting ambitions such as ethical urban sustainability and human flourishing. While there is a history of philosophers viewing cities as technologies, cities' encompassing nature inherently limits them. Urban sustainability matters often affect marginalized and vulnerable people, the public, nonhuman species, future generations, and urban artifacts. Problems can arise when stakeholders' interests and needs appear at odds. The author argues in favor of the concept of moral ordering, a process designed to address issues involving different stakeholder groups such as municipal officials and residents. By employing moral ordering, a view comes into focus, revealing that the attention that each group receives reflects their place in the process, providing the necessary degree of moral respect. Finally, the author shows how moral ordering can lead to urban enlightenment. He examines real-world applications of moral ordering, such as New York City's Participatory Budgeting Project, to make the case that municipalities can begin to bolster municipal-community relations in ways that promote urban enlightenment. Urban Enlightenment will appeal to researchers and advanced students working in philosophy of the city, applied ethics, philosophy of technology, urban planning, environmental studies, and political science. Politicians, voters, executives, and employees all want the answer to one question: How can America compete with cheap foreign labor, and restore skilled, well-paying jobs to our economy? American Drive answers that question. An executive with nearly thirty years in the trenches of the hard-nosed Detroit automobile industry, Richard E. "Dick" Dauch had long dreamed of running his own manufacturing company. From his first job on the plant floor at General Motors to his crucial role in helping to rescue Chrysler from the brink of bankruptcy, Dauch focused passionately, and relentlessly, on quality, productivity, and flexibility in manufacturing. In 1993 he took on the challenge of his life, buying

a lagging axle supply and parts business from GM, along with five rusting, unprofitable, union-controlled, near-decrepit plants in the heart of a crime-ridden Detroit and a deteriorating environment in Buffalo, New York. The newly created "stand-alone" company was named American Axle and Manufacturing. Dauch set out to create a world-class industrial automotive manufacturer. He bought and bulldozed the crack, liquor, and prostitution businesses that surrounded the company and rebuilt the plants. He upward educated, trained, and expanded the skill sets of the workforce, struck tough bargains with unions, and solved massive quality problems that were costing tens of millions every year and undermining customer satisfaction. Within one year of opening the doors, AAM had turned an astounding \$66 million in profit. In American Drive, Dauch narrates the story of AAM against the backdrop of his nearly fifty years in the auto industry, from its glory days to its decline in the face of foreign competition, government bailouts, battles with unions, and the recent Great Recession. Tough, smart, inspiring, high-energy, and opinionated, Dauch offers memorable lessons on leadership, advanced product technology, communication, negotiation, and making profits in the most difficult times. Dauch's story transcends the auto industry and draws a blueprint for job creation, manufacturing competitiveness, economic growth, and excellence in America. With the fabled city of Timbuktu as his goal, author Rick Antonson began a month-long trek. His initial plan? To get a haircut. The second edition of this important book outlines the volatile political situations in Timbuktu following the spring 2012 military coup in Mali and the subsequent capture of the city by Islamic extremists. As the title claims, the book is a real collection of the best examples of the American humorous literature. The editor gathers valuable pieces by the prominent authors like Washington Irving, Benjamin Franklin, Mark Twain and many more. It was compiled at the turn of the 19th and 20th century and its aim was to bring relaxing notes into the craze for moral seriousness in all literature, which was characteristic of that period. This thoughtful examination of a century of travel writing about the American West overturns a variety of popular and academic stereotypes. Looking at both European and American travelers' accounts of the West, from de Tocqueville's Democracy in America to William Least Heat-Moon's Blue Highways, David Wrobel offers a counter narrative to the nation's romantic entanglement with its western past and suggests the importance of some long-overlooked authors, lively and perceptive witnesses to our history who deserve new attention. Prior to the professionalization of academic disciplines, the reading public gained much of its knowledge about the world from travel writing. Travel writers found a wide and respectful audience for their reports on history, geography, and the natural world, in addition to reporting on aboriginal cultures before the advent of anthropology as a discipline. Although in recent decades western historians have paid little attention to travel writing, Wrobel demonstrates that this genre in fact offers an important and rich understanding of the

American West—one that extends and complicates a simple reading of the West that promotes the notions of Manifest Destiny or American exceptionalism. Wrobel finds counterpoints to the mythic West of the nineteenth century in such varied accounts as George Catlin's Adventures of the Ojibbeway and Ioway Indians in England, France, and Belgium (1852), Richard Francis Burton's The City of the Saints (1861), and Mark Twain's Following the Equator (1897), reminders of the messy and contradictory world that people navigated in the past much as they do in the present. His book is a testament to the instructive ways in which the best travel writers have represented the West. Through the stories of one of Canada's most enthusiastic travellers explore the famous American highway that inspired the likes of Al Capone, Salvador Dali, Mickey Mantle, and the countless fans of this iconic American landmark. How the automobile fundamentally changed African American life—the true history beyond the Best Picture-winning movie. The ultimate symbol of independence and possibility, the automobile has shaped this country from the moment the first Model T rolled off Henry Ford's assembly line. Yet cars have always held distinct importance for African Americans, allowing black families to evade the many dangers presented by an entrenched racist society and to enjoy, in some measure, the freedom of the open road. Gretchen Sorin recovers a forgotten history of black motorists, and recounts their creation of a parallel, unseen world of travel guides, black only hotels, and informal communications networks that kept black drivers safe. At the heart of this story is Victor and Alma Green's famous Green Book, begun in 1936, which made possible that most basic American right, the family vacation, and encouraged a new method of resisting oppression. Enlivened by Sorin's personal history, Driving While Black opens an entirely new view onto the African American experience, and shows why travel was so central to the Civil Rights movement. Acclaimed travel writer Rick Antonson (Full Moon Over Noah's Ark) tackles his most challenging adventure yet: a formidable trail through the remote jungles of Papua New Guinea. Rick Antonson has traveled to parts of the world that are not simply exotic but sometimes damned near inaccessible. He has climbed to the summit of Mount Ararat in eastern Turkey, traveling beyond to Iraq and Iran and Armenia. He has undertaken an improbable overland journey to the ancient city of Timbuktu, an enlightening look into efforts to preserve the city's priceless manuscripts. Now he has traversed the notorious Kokoda Trail in Papua New Guinea, a country some call "the last wild place on earth." The trail is a narrow, 60-mile footpath featuring rough jungle, 6,000 feet in elevation change, and punishing weather extremes. In a country unfairly locked in Western misperceptions, the track is inhospitable terrain yet home to hospitable indigenous peoples, who live among the rusting reminders of the Japanese, Australian, and American armies that clashed in some of the deadliest protracted combat of World War II. In Walking With Ghosts in Papua New Guinea, Antonson shares a journey of physical and mental endurance in his inimitable way, in the

company of a mixed band of resolute
adventurers, blending fascinating historical
context with the tribulations of unexpected

discoveries in faraway lands. London Eh to Zed
is a lively and entertaining walking guide to

seven neighbourhoods in London, England,
which reveals much about our history,
character, passions, and foibles.
