This scholarly book focuses on stroke in Africa. Stroke is a leading cause of disability among adults of all ages, contributing significantly to health care costs related to long term implications, particularly if rehabilitation is sub-optimal. Given the burden of stroke in Africa, there is a need for a book that focuses on functioning African stroke survivors and the implications for rehabilitation within the African context. In addition, there is a need to progress with contextualised, person-centred, evidence-based guidance for the rehabilitation of people with stroke in Africa, thereby enabling them to lead socially and economically meaningful lives. The research incorporated in the book used a range of primary and secondary methodological

approaches (scoping reviews, systematic reviews, meta-analyses, descriptive studies, surveys, health economics, and clinical practice guideline methodology) to shed new insights into African-centred issues and strategies to optimise function post-stroke. This book is designed to master, have a quick review of clues and concepts right before taking the exam and helps connect the dots . It helps recollect all the concepts and points that's needed to ace this exam and get a high end score.It's a refined combination of the most important essential clues and concepts in a quick review that will give a massive boost to your score in your last week of exam preparations.This tool is designed to give you a quick easy review of all the essential information before the exam.The book also includes a chapter on test taking skills to help you process the questions better and prevent a student from running out of time on a test day or doubt themselves and change option choices. Bringing together more than a decade of dedicated investigation and clinical work, this unique textbook is a unified, comprehensive source for oncofertility research and medical practice that is both authoritative and up-to-date. It will serve as the primary oncofertility reference for the various medical disciplines that must be coordinated to provide care for young cancer patients. Moreover, it contains case studies that are prismatic for new entrants into the field. The book is organized around the major themes of the discipline and includes current research, clinical practice, emerging technologies and didactic questions and is divided into six thematic sections: Fertility implications in both oncologic and non-oncologic settings Options for fertility preservation, both male and female Care of the oncofertility patient, including contraception and pregnancy considerations Oncofertility in clinical practice, from setting up a new program to genetic counseling and communication Ethical and legal

considerations Advances in the basic science of oncofertility In each chapter, bulleted key learning points and review study questions bookend the text. Six additional sections, comprised exclusively of clinical case studies illustrating the management of both oncologic and non-oncologic conditions, add to the pedagogical value of the text. Timely and utilizing the best current evidence, *Textbook of Oncofertility Research and Practice: A Multidisciplinary Approach* will be an invaluable resource for students, residents, fellows and professionals in reproductive endocrinology, pediatric endocrinology, adult and pediatric oncology, adult and pediatric urology, breast surgery, radiation oncology and allied professions where iatrogenic treatments or genetic conditions result in infertility. Continuing advances in the management of childhood malignancies result in a rapidly growing number of childhood cancer survivors. However, many of them experience treatment-induced 'late effects' including a significant number of endocrine dysfunctions. In this book experts in the field of late effects of childhood cancer treatment offer clinical insight into pertinent issues such as the impact of cancer therapies on growth, puberty and hypothalamic and pituitary function, male and female fertility, obesity, and metabolic and bone problems. Multidisciplinary long-term follow-up of these patients is essential to monitor, treat and prevent morbidity. Therefore this volume is of great interest to pediatric endocrinologists and oncologists, adult and reproductive endocrinologists, primary care practitioners, nurses and nurse practitioners as well as others involved in planning and delivering the holistic care which this increasingly numerous and important group of patients requires. This USMLE Step 2ck book has been designed to make students think for themselves, rather than memorization management. This book has been written with a understanding that if a student

understands a disease process, then the student will know and understand how and why to manage a condition in a certain way, rather than memorizing charts. This design is to integrate knowledge of step 1 and applying it to understanding management for step 2ck. This book comes with a special chapter on test taking skills and principles of management unlike any other. You will understand fundamentals of why and how you manage something in a certain way. Also test taking skills that can help you solve vignettes in the shortest time, which will eliminate running out of time on your test day. On the impact of victims of terrorism in Punjab, India. The essays collected in this volume examine evidence-based approaches to Christian counseling and psychotherapy, exploring treatments for individuals, couples and groups. The book addresses both the advantages and the challenges of this evidence-based approach and concludes with reflections on the future of such treatments. Ageing population poses a set of complex policy and dilemmas for social security systems, intensifying the concerns about rising expenditures in health care and long-term care for elderly. In this context, ageing societies has many valuable lessons to learn by studying Japan's experience dealing with its hyper-aged society and particularly from its strategies to ensure the financial sustainability of the Long-Term Care Insurance (LTCI) system. Based on an exhaustive literature review, and the results from six original researches on long-term care expenditures in Japan (LTCE) conducted during a doctoral program, the book provides a comprehensive view in analyzing trends and factors associated with increasing expenditures in the Long-Term Care Insurance system in Japan. The book address relevant topics such as; the main socio-demographic changes experienced by the Japanese society during the last three decades, predictors of the LTCE, measuring efficiency in

nursing homes, the impact of the LTCI 2005-reform to contain expenditures, cost-effectiveness of the in-home and community based services and institutional LTCE in the last year of life. The book ends with a discussion on future challenges and strategies oriented to contribute with the sustainability of the LTCI system in Japan. 'With the increasing probability of floods, wars, and human displacement, there will be a great need for health care professionals to help. The arts provide a new, human, and cost-effective way to bring relief and to ease some of the human suffering associated with trauma. The editor, Lois Carey, presents a compelling rationale for the use of the arts therapies to work with trauma. First, it is now clear that traumatized children have difficulty using words to describe their experience. Drawing, play, music and other creative forms allow for an indirect expression that reduces anxiety, and they also help to establish a therapeutic relationship and an area of safety. The same is true for traumatized adults, who are often nonverbal... this book can be a beginning of much-needed documentation of the use of the expressive arts methods for trauma survivors and will provide a significant and useful introduction to the field for health professionals.' - *PsychCRITIQUES* 'I think the descriptions of the methods are interesting and they show a lot of experience in the field of trauma-treatment. It is a well written, very readable book of the practice.' - *Tijdschrift voor Vaktherapie (Journal of Therapy)* 'This book throws more light on different expressive and creative arts methods in the treatment of trauma. In detailed case studies and research, the authors offer an overview of creative arts methods aiming at brain functions which are not always being reached by verbal therapy alone.' - *Tijdschrift voor Vaktherapie (Journal of Therapy)* 'The authors use a rich mix of interesting case material and useful explanation of the techniques for the uninitiated.' - *Therapy*

Today 'A very good job of promoting the use of expressive arts therapy to complement talking therapies and achieve results that talking therapy cannot.' - Play Therapy UK 'If you are a parent, dealing daily with the effects of traumatised children, and especially finding it difficult to firstly access specialist therapy and secondly to understand the principles in relation to your child, then this book will give you a clear understanding of the aims and outcomes of therapies which may be on offer.' - [www.adoption-net.co.uk](http://www.adoption-net.co.uk) Expressive and Creative Arts Methods for Trauma Survivors demonstrates how play, art, and music therapies, as well as sandplay, psychodrama and storytelling, can be used to aid the recovery of trauma victims. Drawing on detailed case studies and a growing body of evidence of the benefits of non-verbal therapies, the contributors- all leading practitioners in their fields- provide an overview of creative therapies that tap into sensate aspects of the brain not always reached by verbal therapy alone. Methods of exploring traumatic experiences with a view to limiting patients' distress are also explored. The techniques discussed are appropriate for work with children, families and groups and are based on established approaches, including Jungian, Child-centred, Gestalt and Freudian theories. Expressive and Creative Arts Methods for Trauma Survivors will be an enlightening read for expressive and specialized arts therapists and for students and academics in these fields. 'Read this book, and then rethink everything else.' Danielle Strickland 'A feast of insight and reflection on what just leadership should look like.' The Rt Reverend Dr Jonathan Gibbs 'This book will change the way you lead.' The Rt Reverend Dr Emma Ineson, Bishop of Penrith 'A book that should be on the shelves of every leader today.' The Reverend Will van der Hart From #MeToo scandals to revelations of spiritual abuse atrocities in the Church, we've watched too many

leaders let us down. What went wrong for these leaders? And more importantly, how can we get it right? Just Leadership offers advice and guidance to empower leaders everywhere to make a difference and answer the call for a fairer, more transparent, more equal society. Drawing on their combined decades of experience in leadership and safeguarding, Justin Humphreys and Simon Barrington explore what it means for a leader to be just, and provide practical ways improve your leadership skills and create a just and open environment. Across the world, there is a heart cry for justice - but often the fight is too focused on the wider cause, bypassing conversations about individual leaders across our churches, organisations, charities and communities. Just Leadership is for every leader - whether you are in Church or other Christian leadership, business or professional leadership or even a leader within your local community - who wants to build their skills and start leading the way to a better future. This book uses composite clinical examples and the authors' own practical experience to demonstrate how to treat addicted survivors of trauma and abuse. By integrating mental health paradigms with disease models of addiction, and combining psychotherapeutic techniques with 12-step recovery practices, the authors present an easy-to-replicate model for assessment and treatment. They provide an overview of the various types and resulting effects of childhood abuse and other traumas, and then describe the disease of addiction and its treatment. Simultaneously addressing both addiction and survivor issues, the book describes ways to identify and assess substance-dependent survivors, and organize, direct, and plan their treatment. In addition, it provides specific strategies for working with significant others, adolescents, and individuals who also exhibit antisocial, borderline, and narcissistic personality disorders. This book is aimed at

psychologists, chemical dependency counselors, social workers, and family therapists. - Find your niche for helping people in need. - Wisely pursue social justice, avoiding common pitfalls and misconceptions. - Increase your effectiveness in missions at home and abroad. - Grow your endurance in serving. Stefanie Potter (LMSW, BA Religion/Philosophy) uses her experiences in social work, missions, and ministry to equip Christians who are passionate about helping people through missions or social justice work/volunteering. Stefanie has experience serving youth, refugees, impoverished/homeless communities, and abuse survivors. "This is a refreshing book and a tool that I would offer!" - Sarah Grice, Northeastern Seminary graduate "It's easy to understand, biblically grounded, and yet so personal. Stefanie's heart and life experiences are used fluidly to teach the lessons." - Whitney Scoville, LMSW "Real and personable, balanced with wisdom and knowledge. This book will be so helpful for so many people!" - Jenni Olowo, Church Missions Administrator and Nigerian missions leader

Published in 1996, *Corporate Therapy and Consulting* is a valuable contribution to the field of Psychotherapy. *The Essential Guide to Recognizing and Treating Acute Endocrine and Metabolic Illness* Endocrinology covers some of the most common conditions and serious public health challenges facing medicine today, and endocrine and metabolic emergencies constitute a large proportion of the clinical workload. *Endocrine and Metabolic Medical Emergencies: A Clinician's Guide* provides a singular reference to help endocrinologists, acute and general medicine clinicians, hospitalists and critical care physicians, and general practitioners recognize the symptoms of endocrine emergencies and provide the highest standards of care. Already the definitive and most comprehensive guide to endocrine emergency care, this new second edition: provides acute care

guidance for a range of both common and unusual endocrine emergencies; details the effects of acute medical and critical illness on metabolic and endocrine systems, and their impacts on endocrine investigations; discusses special patient populations, including the impacts of aging, pregnancy, transplantation, late-effects, perioperative, inherited metabolic disorders and HIV/AIDS on presentation and management; and features detailed coverage of disorders by system, as well as, metabolic bone diseases, neuroendocrine tumors, and more. Packed with case studies, images, and chapters written by distinguished authors, this guide is designed for both quick reference and study. Coverage includes the presentation, diagnosis, management, and treatment of endocrine and metabolic disorders in an acute care setting, as well as the most up-to-date guidance on issues including clinical lipidology, glucose, sodium, calcium and phosphate, and more. Blending the latest science with clinical and practical advice, this invaluable resource helps clinicians stay up to date with the field's relevant body of knowledge while providing the practical, clinical insight they need in order to provide their patients with the utmost level of care. This book is based on a participatory action research project carried out with a group of former Zimbabwe People's revolutionary Army (ZPRA) which was the armed wing of the Zimbabwe African People's Union (ZAPU) which was led by the late Joshua Nkomo. ZPRA was the primary target of Gukurahundi, a pogrom by the Mugabe government which left an estimated 20 000 civilians dead and countless others tortured in the early 1980s in Matebeleland, Zimbabwe. It has been almost 30 years since the violence ended, but there has never been an official healing and reconciliation programme or truth commission into the atrocities. The government chose the path of amnesia by granting a blanket amnesty to all involved. The regime has enforced a culture

of silence over the event through repression and intimidation. The book is a culmination of a two year journey, by the group and the author, of an exploration of group-based self-healing approaches to the pain caused by the violence of Gukurahundi. From the founder of "layoff survivor sickness" an updated edition of a book for today's downsized workforce Thoroughly revised and updated, David Noer's classic book about downsized organizations has never been more relevant. Reports of the most recent layoffs are making the front pages of our newspapers with frightening regularity. And massive downsizing continues to reshape the face of American business. But what about those who remain behind? Healing the Wounds provides an antidote to the widespread malaise on the American business scene left in the wake of workforce reductions. Drawing on case studies and original research, David M. Noer-an expert frequently quoted in major media such as The Wall Street Journal and Fortune on the topic of layoffs and layoff survivor sickness-provides executives, human resource professionals, managers, and consultants with an original model and clear guidelines for revitalizing downsized organizations and the employees left behind. Offers thoroughly revised edition of a book about layoffs and those who are left behind Filled with relevant case studies and recent research Written by David Noer an acclaimed expert on the topic Gives employers much-needed guidance for revitalizing downsized companies First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company. This book approaches current controversies concerning qualitative and quantitative procedures in the social sciences and incorporates new methods showing how they can supplement each other. It is based on a comprehensive international research project that readers can apply to their findings through the data set provided on the author's home page. This

accessible text takes a multi-disciplinary approach to exploring issues surrounding domestic violence. It draws on contemporary research findings, policy developments, innovative practice and case studies to explore new directions in professional and voluntary sector responses to domestic violence. Centred on the United Kingdom, but located in a context of global change, the book discusses and critically evaluates new criminal justice and multi-agency initiatives such as domestic violence courts and risk assessment conferences, as well as assessing how far these initiatives improve the safety of women and children. Harne and Radford aim to disseminate ideas about best practice in relation to dealing with this sensitive and still controversial issue. They use real-life case studies from professionals, including the police, health services and Women's Aid, and are inclusive of the experiences of a wide range of survivors, in order to enable an understanding of the need for appropriate responses, depending on different survivor needs. Tackling Domestic Violence provides an informed background for professionals in the police, probation, health and social care services, the legal system and voluntary sector with a remit to respond to domestic violence. It is also highly relevant to those undertaking courses on domestic violence at undergraduate and postgraduate level. Using a problem-solving approach based on clinical evidence, Neurological Rehabilitation, 6th Edition covers the therapeutic management of people with functional movement limitations and quality of life issues following a neurological event. It reviews basic theory and covers the latest screening and diagnostic tests, new treatments, and interventions commonly used in today's clinical practice. This edition includes the latest advances in neuroscience, adding new chapters on neuroimaging and clinical tools such as virtual reality, robotics, and gaming. Written by respected clinician and physical

therapy expert Darcy Umphred, this classic neurology text provides problem-solving strategies that are key to individualized, effective care. UNIQUE! Emerging topics are covered in detail, including chapters such as Movement Development Across the Lifespan, Health and Wellness: The Beginning of the Paradigm, Documentation, and Cardiopulmonary Interactions. UNIQUE! A section on neurological problems accompanying specific system problems includes hot topics such as poor vision, pelvic floor dysfunction, and pain. A problem-solving approach helps you apply your knowledge to examinations, evaluations, prognoses, and intervention strategies. Evidence-based research sets up best practices, covering topics such as the theory of neurologic rehabilitation, screening and diagnostic tests, treatments and interventions, and the patient's psychosocial concerns Information. Case studies use real-world examples to promote problem-solving skills. Non-traditional approaches to neurological interventions in the Alternative and Complementary Therapies chapter include the movement approach, energy approach, and physical body system approaches therapies. Terminology adheres to the best practices of the APTA as well as other leading physical therapy organizations, following The Guide to Physical Therapy Practice, the Nagi model, and the ICF World Health Model of patient empowerment. Updated illustrations provide current visual references. NEW chapters on imaging and robotics have been added. Updated chapters incorporate the latest advances and the newest information in neuroscience and intervention strategies. Student resources on an Evolve companion website include references with links to MEDLINE and more. Based on the premise that designers of future satellite systems, faced with strong competition from optic fibers, must take account of the unique features that satellites have to offer, this volume places more emphasis on satellite mobile

services and broadcasting, and less emphasis on fixed point-to-point high capacity services than traditional textbooks in the field. An additional emphasis is placed on design issues. Numerous illustrative system design examples and numerical problems are provided. Annotation copyright by Book News, Inc., Portland, OR This thoroughly revised Second Edition builds on the success of the first as the definitive text for neuropsychiatry. The book is divided into three sections, with the third on syndromes and disorders. Emphasis on treatment is provided throughout the text and is DSM-IV-compatible. Coverage includes neurobehavioral disorders, selection and interpretation of neurodiagnostic procedures, and the full spectrum of therapies. New to this edition are eight chapters and the incorporation of psychopharmacology into specific disease chapters. Compatibility: BlackBerry(R) OS 4.1 or Higher / iPhone/iPod Touch 2.0 or Higher / Palm OS 3.5 or higher / Palm Pre Classic / Symbian S60, 3rd edition (Nokia) / Windows Mobile(TM) Pocket PC (all versions) / Windows Mobile Smartphone / Windows 98SE/2000/ME/XP/Vista/Tablet PC Reflecting the increasing interest in fertility management for pediatric and adolescent patients and fulfilling an urgent need to have a comprehensive guide to the management of these individuals, this is the first book of its kind to present a comprehensive discussion of pediatric and adolescent oncofertility. It carefully examines the impact of pediatric cancer and cancer therapy on fertility and presents both current and emerging fertility preservation techniques for both males and females, such as cryopreservation. Fertility concerns beyond cancer are also discussed, including disorders of sexual differentiation, gender dysphoria and thalassemia. Practical chapters on pediatric oncofertility in the clinic round out the book, covering setting up a practice, counseling and consent, disclosure and insurance considerations.

Concluding chapters document fertility preservation techniques and outcomes internationally, with contributions from Portuguese, Brazilian and Japanese authors. Timely and wide-ranging, Pediatric and Adolescent Oncofertility is an ideal resource for reproductive medicine specialists, pediatric oncologists, and primary care physicians treating pediatric and adolescent cancer patients looking to protect fertility options. "Extracorporeal Membrane Oxygenation : An Interdisciplinary Problem-Based Learning Approach" provides an overview of the latest techniques, management strategies and technology surrounding the clinical use of ECMO. This interdisciplinary book reviews the most common scenarios of ECMO in 62 chapters exploring the conditions and problems arising in ECMO practice. Each chapter begins with a stem case, followed by open questions to encourage critical thinking and enable the reader to follow the management strategies of the authors, who are world leaders in the field. Followed by an evidence-based discussion, each chapter concludes with multiple-choice questions for self-assessment. This book is current in its knowledge of organ systems and management and keeps pace with new ECMO technology and surgical techniques coupled with current guidelines for management. Starting with the history of ECMO to technical aspects, circuit biocompatibility and interaction with blood, drugs and flow physics, the volume continues into pediatric and adult sections, focussing on both respiratory and cardiovascular support, followed by a section on trauma. The volume then concludes with a section on neurologic complications and ethics, as well as rehabilitation and ambulation of ECMO patients. In addition, to reflect the current global health situation, this book also includes a chapter on ECMO management in patients suffering with COVID-19, to cover the most urgent and pressing questions around ECMO during the

ongoing pandemic. This is the first ECMO book on the market to utilise a problem-based learning approach and as such is an important unprecedented project on ECMO education. Will Tate and his family set sail for America. But they are on board the Titanic, the "unsinkable" ship, which is heading for disaster! DK Readers is a multi-level learning-to-read program combining DK's highly visual style with appealing stories at five graduated levels. Stunning photographs and engaging, age-appropriate stories are guaranteed to capture a child's interest while developing reading skills and general knowledge. DK Readers allow progression from stories for beginning readers with simple sentences and word repetition through to stories with rich vocabulary and more challenging sentence structure for proficient readers. now available in iPad-friendly format. Written by leading children's authors and compiled in consultation with leading literacy experts. Disasters can dominate newspaper headlines and fill our TV screens with relief appeals, but the complex long-term challenge of recovery—providing shelter, rebuilding safe dwellings, restoring livelihoods and shattered lives—generally fails to attract the attention of the public and most agencies. On average 650 disasters occur each year. They affect more than 200 million people and cause \$166 trillion of damage. Climate change, population growth and urbanisation are likely to intensify further the impact of natural disasters and add to reconstruction needs. Recovery from Disaster explores the field and provides a concise, comprehensive source of knowledge for academics, planners, architects, engineers, construction managers, relief and development officials and reconstruction planners involved with all sectors of recovery, including shelter and rebuilding. With almost 80 years of first-hand experience of disaster recovery between them, Ian Davis (an architect) and David Alexander (a geographer)

draw substantially from first-hand experiences in a variety of recovery situations in China, Haiti, Italy, Japan, New Zealand, Pakistan, the Philippines and the USA. The volume is further enriched by two important and unique features: 21 models of disaster recovery are presented, seven of which were specifically developed for the book. The second feature is a survey of expert opinion about the nature of effective disaster recovery—the first of its kind. More than 50 responses are provided in full, along with an analysis that integrates them with the theories that underpin them. By providing a framework and models for future study and applications, Davis and Alexander seek both to advance the field and to provide a much-needed reference work for decision makers. With a broad perspective derived from the authors' roles held as university professors, researchers, trainers, consultants, NGO directors and advisors to governments and UN agencies, this comprehensive guide will be invaluable for practitioners and students of disaster management. Investigating a fast-developing field of public policy, Stephen Winter examines how states redress injuries suffered by young people in state care. Considering ten illustrative exemplar programmes from Australia, Canada, Ireland, and Aotearoa New Zealand, Winter explores how redress programmes attempt to resolve the anguish, injustice, and legacies of trauma that survivors experience. Drawing from interviews with key stakeholders and a rich trove of documentary research, this book analyses how policymakers should navigate the trade-offs that survivors face between having their injuries acknowledged and the difficult, often retraumatising, experience of attaining redress. A timely critical engagement with this contentious policy domain, Winter presents empirically driven recommendations and a compelling argument for participatory, flexible, and survivor-focussed programmes.
