Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References Apr 10 2022 Over 5,300 total pages MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes. Just a SAMPLE of the included publications: BASIC RECONNAISSANCE COURSE PREPARATION GUIDE RECONNAISSANCE (RECON) TRAINING AND READINESS (T&R) MANUAL RECONNAISSANCE REPORTS GUIDE GROUND RECONNAISSANCE OPERATIONS GROUND COMBAT OPERATIONS Supporting Arms Observer, Spotter and Controller DEEP AIR SUPPORT SCOUTING AND PATROLLING Civil Affairs Tactics, Techniques, and Procedures MAGTF Intelligence Production and Analysis Counterintelligence Close Air Support Military Operations on Urbanized Terrain (MOUT) Convoy Operations Handbook TRAINING SUPPORT PACKAGE FOR: CONVOY SURVIVABILITY Convoy Operations Battle Book Tactics, Techniques, and Procedures for Training, Planning and Executing Convoy Operations Urban Attacks *Chilton's Import Car Manual* Sep 15 2022 Covers all major cars imported into the U.S. and Canada and includes specifications, a troubleshooting guide, and maintenance and repair instructions.

GPU PRO 3 May 31 2021 GPU Pro3, the third volume in the GPU Pro book series, offers practical tips and techniques for creating real-time graphics that are useful to beginners and seasoned game and graphics programmers alike. Section editors Wolfgang Engel, Christopher Oat, Carsten Dachsbacher, Wessam Bahnassi, and Sebastien St-Laurent have once again brought together a high-quality collection of cutting-edge techniques for advanced GPU programming. With contributions by more than 50 experts, GPU Pro3: Advanced Rendering Techniques covers battle-tested tips and tricks for creating interesting geometry, realistic shading, real-time global illumination, and high-quality shadows, for optimizing 3D engines, and for taking advantage of the advanced power of the GPGPU. Sample programs and source code are available for download on the book's CRC Press web page.

Introduction to Acute and Ambulatory Care Pharmacy Practice Aug 14 2022 Learn How to Thrive in Today's Institutional Pharmacy Practice Landscape The Only Comprehensive Introductory Guide, Updated and Expanded With ASHP's Introduction to Acute and Ambulatory Care Pharmacy Practice, 2nd Edition, pharmacy students and technicians can gain a professional head start by learning essential vocabulary, legal and regulatory issues, and the core clinical and administrative pharmacy operations in various practice settings. It is also a useful reference for new practitioners and anyone else interested in institutional pharmacy's current financial, technological, and distributional systems. Written by David A. Holdford, RPh, MS, PhD, FAPhA, with additional content from 27 leading experts, the second edition provides a thorough introduction to all aspects of the institutional pharmacy practice in both hospital and outpatient settings, with a special focus on the developing role of technicians. It has been thoroughly updated to cover all current developments, and is clearly written, with Key Facts, What Ifs and other learning enhancements that make terms, concepts, and processes easy to understand and apply. 2 New and 18 Updated Chapters Cover Topics including: Key legal and regulatory issues Managing medication use and distribution Professional terminology Technology and automation Financial management, inventory, and cost control Sterile product preparation and administration Managing people and leadership Careers and training options The expanding role of pharmacy technicians Along with an understanding of the workings of institutional practice, students and new pharmacists can acquire the terminology that enables them to speak knowledgeably, along with insight into professional opportunities, including some non-traditional ones.

The Blood Of Abraham, "Intifada, Uprising & Lessons In Asymmetrical Warfare" Jan 15 2020 A historical case study concerning the Israeli Army's response to the Palestinian "Intifada" or uprising in the late 1980's and early 1990's provides instructive planning considerations for likely future application of U.S. military force in an asymmetrical threat environment. The monograph specifically analyzes the time period from the beginning of the uprising until the handshake of Rabin and Arafat on the White House lawn September 13th, 1993. Although the theoretical application of the case study is speculative of future environments, this paper attempts to link available historical data to anticipated trends in the international security environment and emerging concepts of operational art. The argument surrounding asymmetrical types of warfare leads into a discussion of the application of IDF lessons learned that may be applied to future U.S. military scenarios.
