This book is a celebration of ideas: how they happen and their sometimes unintended results. Johnson shows how simple scientific breakthroughs have driven other discoveries through the network of ideas and innovations that made each finding possible. He traces important inventions through ancient and contemporary history, unlocking tales of unsung heroes and radical revolutions that changed the world and the way we live in it Moving effortlessly between symbolist poetry and Barbie dolls, artificial intelligence and Kleist, Kant, and Winnicott, Barbara Johnson not only clarifies psychological and social dynamics; she also re-dramatizes the

work of important tropes—without ever losing sight of the ethical imperative with which she begins: the need to treat persons as persons. In Persons and Things, Johnson turns deconstruction around to make a fundamental contribution to the new aesthetics. She begins with the most elementary thing we know: deconstruction calls attention to gaps and reveals that their claims upon us are fraudulent. Johnson revolutionizes the method by showing that the inanimate thing exposed as a delusion is central to fantasy life, that fantasy life, however deluded, should be taken seriously, and that although a work of art "is formed around something missing," this "void is its vanishing point, not its essence." She shows deftly and delicately that the void inside Keats's urn, Heidegger's jug, or Wallace Stevens's jar forms the center around which we tend to organize our worlds. The new aesthetics should restore fluidities between persons and things. In pursuing it, Johnson calls upon Ovid, Keats, Poe, Plath, and others who have inhabited this in-between space. The entire process operates via a subtlety that only a critic of Johnson's caliber could reveal to us. A careful mix of law, policy, ethics, and economics, Studies in American Tort Law is designed for first-year torts courses. Recognizing that torts is a prime battleground for social policy, this book seeks to reflect not only the current rules on injury compensation, but also the policy choices underlying those rules. Within a clear, doctrinal framework, a range of views is presented, reflecting dominant themes in tort law. Students are introduced to, but not overwhelmed with, law and economics. Economic analysis is employed when particularly useful (e.g., in connection with the negligence balancing test, strict liability, and calculation of damages). The law-and-economics notes can be used as a starting point for classroom discussion, or they can be allowed to stand on their own, without need for elaboration. The fourth edition includes: * Comprehensive citations to the Restatement, Third, of Torts * The latest Supreme Court precedent on punitive damages and preemption * Readable statutory excerpts reflecting new legislative developments * Careful attention to ethical issues in the practice of law * Scores of citations to new court decisions * Several new principal cases. The fourth edition is completely up-to-date to 2009, including a rich selection of materials reflecting the abundance of important recent developments in tort law. A comprehensive teacher's manual updated for the fourth edition, Teaching Torts, will be available. Mastering Torts: A Student's Guide to the Law of Torts (4th ed.), a short narrative text which parallels the casebook, assists students to fully understand this area of law. A Power Point file containing roughly 200 slides corresponding to Studies in American Tort Law is available to adopting professors. To request the file, contact Vincent R. Johnson at vjohnson@stmarytx.edu. In this new edition of The Criminal Justice Student Writer's Manual, students learn the skills necessary to become good writers. The Problems Book has be A thrilling new account of the tragic story and troubled times of Henry VI, who inherited the crowns of both England and France and lost both. Firstborn son of a warrior father who defeated the French at Agincourt, Henry VI of the House of Lancaster inherited the crown not only of England but also of France, at a time when Plantagenet dominance over the Valois dynasty was at its glorious height. And yet, by the time he died in the Tower of London in 1471, France was lost, his throne had been seized by his rival, Edward IV of the House of York, and his kingdom had descended into the violent chaos of the Wars of the Roses. In The Shadow King, Lauren Johnson tells his remarkable and sometimes shocking story in a fast-paced and colorful narrative that captures both the poignancy of Henry's life and the tumultuous and bloody nature of the times in which he lived. (1791) is a biography of Dr. Samuel Johnson written by James Boswell. It is regarded as an important stage in the development of the modern genre of biography; many have claimed it as the greatest biography written in English. While Boswell's personal acquaintance with his subject only began in 1763, when Johnson was 54 years old, Boswell covered the entirety of Johnson's life by means of additional research. The biography takes many critical liberties with Johnson's life, as Boswell makes various changes to Johnson's quotations and even censors many comments. Regardless of these actions, modern biographers have found Boswell's biography as an important source of information. The work was popular among early audiences and with modern critics, but some of the modern critics believe that the work cannot be considered a proper biography. James Boswell (1740-1795)

was a lawyer, diarist, and author born in Edinburgh, Scotland. He is best known for the biography he wrote of one of his contemporaries, the English literary figure Samuel Johnson, which the modern Johnsonian critic Harold Bloom has claimed is the greatest biography written in the English language.
