Adirondack Wilderness Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954 *The Adirondacks That Are the Other Half of Me* **Conservation Directory 2000**

The Adirondacks have been written about since they were first spied by Europeans more than five hundred years ago. Yet for most of the intervening centuries, few of those writers lived in the region of which they wrote--they were not part of the landscape. That has changed in recent years as writers have moved to the Adirondacks and formed a literary community. Perhaps inspired by these writers, longtime residents have discovered that they, too, could be part of such a community. From scratching out a living in the harsh landscape to the wonders of a moonlit cross-country ski, these writers celebrate life in the

Adirondacks. In this remarkable collection of essays, the experiences of Adirondack natives are interwoven with the land in a part of America that is both demanding and rewarding. A stunning tribute to one of America's natural treasures in panoramic photographs of the Adirondack Park's grand mountains, pristine woods, and picturesque waterways. Covering more ground than Yellowstone, Yosemite, and the Grand Canyon combined, the Adirondack Park is one of the great wilderness areas in this country. This volume presents an all-new selection of images, with a focus on how the seasons transform the landscape: the tree-covered mountains in autumnal glory, rivers hushed by winter snow, verdant meadows alive with spring, wildlife such as bears and moose, as well as historic resorts and villages. Each chapter covers a different corner of the park, from Lake Placid and the High Peaks to Saranac Lake, Lake George, and the Fulton Chain. To

appreciate the wonders of the Adirondacks through the lens of one of the area's most accomplished photographers is like exploring them for the first time. The Lyons Press is proud to present the forty-fifth annual edition of the National Wildlife Federation's "Conservation Directory" of U.S. and international organizations and agencies working to protect the environment -- the most vital resource of its kind. Included are: members of the United States Congress; government agencies; citizens' groups; educational institutions; databases, services, periodicals, and other directories; federally protected conservation areas; indexes; and more. This annual directory is essential for colleges and universities, libraries, environmental activists, students, outdoor writers, science editors, natural-resource agencies, those seeking employment in the field of conservation, researchers, and all individuals interested in wildlife and ecology. Nestled in the

northernmost section of the Adirondack Mountains, the communities of Keeseville, Port Kent, Ausable Chasm, Clintonville, Harkness, Port Douglas, Ausable, and Chesterfield provided early settlers of the 1800s with a wealth of natural resources in wood, iron, and stone. The Ausable Chasm and Ausable River provided the natural power to refine the materials on-site, while the nearby Lake Champlain provided the transportation to the rest of the world. For early America, this was a booming community that rapidly grew from the 1850s until the 1920s, when modernized transportation and factories around the country made the fairly isolated area less cost-effective. Today, Keeseville is a quiet stop on the Northway that connects New York City and Albany to Montreal. Impressive bridges, closed factories, and some old grand architecture are remnants of the glory days of the once-booming community. "The 5.6 mile Keeseville, AuSable Chasm & Lake

Champlain Railroad hosted several U.S. presidents, was featured in silent films, and hauled heavy granite for famous landmarks and monuments from 1890 to 1924. Join us for a memorable journey from Burlington, Vermont across Lake Champlain to New York's colorful AuSable River Valley. [The author] presents a meticulously researched ... chronicle of the life and times of Lake Champlain navigation, Adirondack hotels and industry, two railroads -- the KAC&LC and Delaware & Hudson's Champlain Division, and the region's highway development" -- Back cover. Filled with tales from the author's lifelong summer residency in the Adirondack Mountains of New York, these stories are humorous and heartwarming, yet not indulgent. Conveying the idea that adventures such as these can be found any time, on any occasion, anywhere, and in any family, "The Adirondacks that are, the Other Half of Me" will bring a smile to you. The

stories will remind readers that their own adventures, whether old or new, are pieces of their life's puzzle, which make them who they are. The author writes about the Adirondacks as a place that provides the feeling of home. She reveals it as a place that inspires an emotion that burrows deep within the soul and never leaves. Anyone who lives in, loves, and visits the Adirondacks understands what that means. In a region so vast, the adventures and memories of many are very similar. Because of that, they connect through them. For those that have never experienced the Adirondack Mountains Region (and it is SO much more than mountains) the enticement in this book is justly warranted. Explores the architectural treasures of the Southern-Central region of New York's Adirondack Park and places them in the context of Adirondack history and culture. The Adirondack Architecture Guide, Southern-Central Region provides a professional and insightful

survey of the built environment of a unique area within New York's Adirondack Park. This book is the first field guide to the architecture of the Park, revealing the ordinary and the extraordinary, the remarkable buildings by prominent designers, as well as the hidden, unexpected gems few know exist. Based on more than seven thousand miles of fieldwork and years of research, the guide comprises more than seven hundred sites traversing the geographic range, socioeconomic strata, and historical span of the region from the late 1700s to the present. Organized according to clearly marked travel routes and fourteen tours on the ground and on the water, it features detailed maps and coordinates for each site, along with many beautiful photographs. Also included are eleven companion essays drawing on the expertise of professionals, local historians, and Adirondack residents that delve into the what, where, and why people built in the Adirondacks. [In The

Adirondack Architecture Guide, beloved landmarks share the pages with little-known architectural gems through a series of curated tours. Each one tracks the history and development of the Southern-Central Adirondacks through its fascinating buildings, bridges, and byways. From first-time visitors to longtime residents, readers will find it packed with information designed to make the most of a side trip lasting a few hours or a weekend of exploring. This is a must-have source to guide your travels in one of the most beautiful and historic parts of New York, the Adirondack Park. [Jay A. DiLorenzo, President, Preservation League of New York State [This remarkable book presents architecture, broadly defined to include all man-made structures, as the key to understanding the history and culture of a vast National Historic Landmark. We are introduced to the sublime Chestertown Church of the Good Shepherd, the delightful Custard's Last Stand, the

earnest Wakely Mountain Fire Tower, and the grand aspirations of the Mary Persons House. A detailed picture of two hundred years in a region of romantic wilderness, industry, tourism, and everyday life emerges to offer a compelling vision of a unique place. This guide is not only for architecture buffs and explorers. It is a model of historical research that presents an unbiased picture of the rich diversity of a fascinating region. □ □ Frances Halsband, Kliment Halsband Architects A history of New York State's Adirondack Park, the largest public park in the U.S.--and the men and women who tried to tame it. Each hike through the Adirondack Park is rated for scenery, difficulty, trail condition, and accessibility for children. Individual trail maps, elevation profiles, and GPS trailhead coordinates aid in navigating the myriad of unnamed roads. Featured trails range from easy strolls for the family to bone-crunching vertical ascents for the fearless hiker. A Guide to

Architecture in the Adirondacks is a comprehensive and easy-to-use guide for exploring the rich and diverse built environment of the Adirondack region of New York State. Big Moose Lake in the Adirondacks transports the reader back in time to the days when steamboats, buckboards, and gas lighting were common. Jane and Mark Barlow deliver tales of one-room schools, of ice harvesting, of women who managed households accessible only by boat, of families struck by deaths from tuberculosis or from drowning, of uncontrollable fires and stories of exuberant amusements such as primitive motorboat regattas. People arrived on the first railroad to stretch through the uninhabited Adirondack wilderness and helped establish a thriving community. Early trappers and hunters of the Adirondacks became guides there, eventually establishing permanent camps and hotels. Prosperous businessmen brought their

families and built private summer homes. In 1892, the Adirondack Park, located in the northeast corner of New York, was declared "forever wild," and from then on, public land could not be further developed. Early on, tourists were drawn to the clear blue lakes, winding rivers and streams, and awe-inspiring mountain peaks of the region. The stunning scenery of the Adirondacks suited the postcard perfectly, making the medium the primary method park visitors used to correspond with family and friends, whether on a trip for healing from tuberculosis and other breathing disorders or vacationing from New York City and the surrounding area. Today the park remains an unspoiled wilderness that continues to draw visitors eager to enjoy its natural beauty. A comprehensive guide to the Adirondacks and beyond Completely updated, now in full color, this guide provides details of Adirondack Park's history and geography as well as the cultural, lodging, dining, shopping, and recreational

opportunities that abound here and in its gateway cities (including Saratoga Springs and Glens Falls). Full of unbiased critical opinions and candid reviews from an author who is immersed in the region; up-to-date, detailed maps; and gorgeous photos throughout—this is an invaluable guide for your next trip. There are fifty-five National Heritage Areas scattered across the US and they continue to grow in number and diversity. Though they're not officially national parks, their conservation, education, and recreation related objectives echo those of the national parks: to conserve nationally significant natural and cultural landscapes and to make them available to the public for purposes of education, recreation, and sustainable tourism-related economic development. But the methods of achieving these objectives are different—very different—than those used in the national parks. While both national parks and NHAs are established by Congress,

national parks are conventionally large areas of public land that are owned and managed by the National Park Service (NPS). NHAs take a more inclusive, partnership-based approach to their work; they offer local citizens, government at all levels, non-profit organizations, and private sector enterprises the opportunity to define, celebrate and conserve the natural, historic, cultural, scenic and recreational resources that have been vital in shaping their identity and destiny. NHAs are composed primarily of private lands; they're living landscapes where participants reside, work and play. Each chapter in this guidebook describes the remarkable natural and cultural resources that define NHAs and highlights nearby visitor attractions, enticing readers to visit NHAs and to enjoy and appreciate the attractions offered. The Adirondack Reader has become almost as much of an institution as its original editor, Paul Jamieson, who died in 2006 at the age of 103. --

Christopher Angus, Few fully understand what the Adirondack wilderness really is. It is a mystery even to those who have crossed and recrossed it by boats along its avenues the lakes; and on foot through its vast and silent recesses.... Though the woodman may pass his lifetime in some section of the wilderness, it is still a mystery to him. --Verplanck Colvin, 1879 This is a book about what Americans have sensed, felt, and thought about our nation's basic heritage of wilderness, the heritage that makes us unique among modern nations. Out of the woods we came, and to the woods we must return, at frequent intervals, if we are to redeem ourselves from the vanities of civilization. In the land-use controversy, some voices have still not been heard. Catherine Henshaw Knott interviewed residents of the Adirondacks on the complex issues of conservation. Knott concludes that the participation of local people in decision making is the only process that can shift an

increasingly hostile cycle toward resolution. 19 photos. The outdoor survival expert's complete primer on traditional camping techniques—newly revised and updated with color photos and illustrations. Before the days of RVs and nylon sleeping bags, people still went camping. In this comprehensive volume, wilderness educator David Prescott explains the methods used during the golden age of camping, including woodcraft, how to set a campfire, food preparation, pitching a tent, auto camping, and canoeing. More than a simple how-to guide, *Camping in the Old Style* explores the rich history of American camping, with wisdom from classic books written by camping pioneers of the late nineteenth and early twentieth centuries. Wescott also discusses his own methods, techniques, and philosophies. The information and ideas are brought to life through both archival and contemporary photographs. "There's a fresh coating of snow on the ground outside our

cabin as I look to see who's coming to the fourteen feeders, we keep filled with black oil sunflower seeds year-round." So begins *A Year of Moons: Stories from the Adirondack Foothills*, a collection of essays by award winning author Joseph Bruchac. The collection is a reflection on the rhythms of the land, the lunar cycles of the year, the plants and animals that surround us, and the connections that link humans, animals and the land. With one foot rooted firmly in the inheritance of nature essays, and another rooted firmly in Bruchac's Abenaki heritage, the collection is an artifact of a beautiful landscape and the changes it encounters throughout the year. In his thoughtful and perceptive way, Bruchac contemplates the changing of the seasons, his relationship with the creatures and plant life that share his home, and a vision of stewardship. Bruchac's curiosity and reverence for the earth shines through on every page as he looks at the place he calls

home with new eyes, reflected by the changing of each season's moon. In this first in a series of four novels featuring the interplay of private lives and public events, Mia Arceneau, bubbly daughter of a vigorously idealistic physician and an outspoken country midwife, grows up in an iconic early-20th century America. Meeting a brainy but impulsive young man from a prominent family sparks in the fanciful mountain girl an infatuation propelling her from the remote Adirondacks to Boston's privileged Beacon Hill. Following America's entry into World War I, Mia keeps her promise to a compelling soldier and moves to a boisterous neighborhood of Irish immigrants. After enduring devastating losses in a lethal wartime epidemic, Mia experiences motherhood, and then finds passion with an audacious charmer. During the exuberant 1920's, hardscrabble '30's, and an ominous prewar period, Mia's ripening sensuality and deepening insight foreshadow a radiant

attachment. Over 200 years of Adirondack History seen through the lens of one plot of land. Fifty Acres of Beach and Wood chronicles tales of iconic characters of Adirondack history whose footprints graced the shores of Indian Point on Raquette Lake. Discover the heritage of Indian Point imparted by the Mohawk Indians, Sir John Johnson, Farrand Benedict, Matthew Beach and William Wood, Professor Ebenezer Emmons, Joel Tyler Headley, Mitchell Sabattis, Nessmuk, Alvah Dunning, John Plumley and Adirondack Murray, and Verplanck Colvin. "Thrill to the spirit of the Adirondacks in this vivid historical novel set in the North Country during the wild days of Prohibition. Follow Joe Devlin as he makes a daring snowshoe trek through the mountains to reach his wife, who is taking the tuberculosis "cure" at Saranac Lake. Stand by his wife Alice when she discovers that Joe has been running bootleg whiskey to pay her increasing medical expenses. Feel the emotion

when Alice's love for her husband threatens to place him in the arms of another woman."--Back cover. Essex is located on the shoreline of Lake Champlain near the foothills of the Adirondack Mountains. The town was important for its role in lake commerce, shipping goods down the Champlain Canal to the burgeoning markets of New York City and via the Erie Canal to Rochester, Buffalo, and points west during America's golden age of expansion. The photographic record of Essex contains the mansions of the merchants and the houses of the workers who all lived together in this prototypical American community. The town contains a remarkable collection of Greek Revival buildings from 1820 to 1860, its period of national significance, that are still intact. Today Essex exists with the majority of its historic structures standing and little fringe development, and the edges of the hamlet continue to merge seamlessly into the agricultural countryside.

Preservation has traditionally focused on saving prominent buildings of historical or architectural significance. Preserving cultural landscapes--the combined fabric of the natural and man-made environments--is a relatively new and often misunderstood idea among preservationists, but it is of increasing importance. The essays collected in this volume--case studies that include the Little Tokyo neighborhood in Los Angeles, the Cross Bronx Expressway, and a rural island in Puget Sound--underscore how this approach can be fruitfully applied. Together, they make clear that a cultural landscape perspective can be an essential underpinning for all historic preservation projects. Contributors: Susan Calafate Boyle, National Park Service; Susan Buggery, U of Montreal; Michael Caratzas, Landmarks Preservation Commission (NYC); Courtney P. Fint, West Virginia Historic Preservation Office; Heidi Hohmann, Iowa State U; Hillary Jenks, USC; Randall

Mason, U Penn; Robert Z. Melnick, U of Oregon; Nora Mitchell, National Park Service; Julie Riesenweber, U of Kentucky; Nancy Rottle, U of Washington; Bonnie Stepenoff, Southeast Missouri State U. Richard Longstreth is professor of American civilization and director of the graduate program in historic preservation at George Washington University. Highlighted by photographs and useful maps, these readable travel guides offer insider information from local authors about diverse regions of America for weekend travelers and explorers alike, featuring helpful tips on dining accommodations and lodgings, transportation, shopping, recreational activities, landmarks, cultural opportunities and more. Native Americans called the area Couxsaxrage, "beaver hunting ground." Professor Ebenezer Emmons named it Adirondack, after one of the native tribes. Along the Adirondack Trail traces the history and lore of the Adirondacks up the scenic

roadway through the heart of New York's mountain-and-lake country. Included are tales of the Mohawk Indians and their beatified princess, Tekakwitha; the site of the mansion of Sir William Johnson, one of America's most influential citizens of the 1700s; and an important battleground of the Revolution. Rare original photographs portray each of the twenty settlements on the trail from Fonda to Malone, reflecting the lives of the guides, loggers, trappers, sportsmen, camp owners, tourists, leather workers, and health seekers who opened up the unknown county.

Adirondack history is a tale written on the water. In the Adirondacks, people have traveled, conducted warfare, hunted and fished, gone to church, proposed marriage, and driven logs in, on, from, or by water. Without boats, small and large, Adirondack history—social, recreational, commercial, and environmental—would be an affair entirely different from what we have come to know. In

this lavishly illustrated account, Hallie E. Bond presents a history of these boats—canoes, sailboats, power launches, outboards, and the indigenous guideboat—that figure prominently in the overall history of the Adirondacks. The pre-contact Indians paddled dugout and bark canoes; in the seventeenth and eighteenth centuries these craft were joined by skiffs and bateaux. Between 1820 and World War II, a distinctive tradition of boat building developed, culminating in the famous Adirondack guideboat. As the nineteenth century progressed, a variety of small, fresh water, musclepowered boats was produced in the Adirondacks—an assemblage matched by only a few places in the country. There were the canoes and the men that made them famous—John Henry Rushton and Nessmuk—and the guideboats and their builders—H. Dwight Grant and Willard Hanmer. In the early twentieth century, the development of the internal

combustion engine irrevocably changed not only boat use and design, but life and leisure in the Adirondacks. Bond skillfully captures the whole panorama of boats and boating in the Adirondacks, from early dugouts and bateaux to the highpowered inboards that won Gold Cup races on Lake George and the Kevlar pack canoes of today. Drawing on her experience as an historian and Curator of Collections and Boats at the Adirondack Museum, Bond places events and trends of the region in the context of national and international history and describes the significant contribution of the Adirondacks in the early twentieth-century development of recreation and travel in America. *Boats and Boating in the Adirondacks* also includes a descriptive catalog of boats from the museum's own collection with nearly two hundred illustrations in addition to those in the narrative, a list of boatbuilders active in the North Country before 1975, and a valuable glossary of terms. An

illustrated survey of the innovative, wood-and-stone camp buildings found deep in the woods of the Adirondack

region examines in detail the magnificent country homes of the Vanderbilts, Morgans, and Whitneys
