This magisterial study proposes a revised and innovative view of the political history of Renaissance Italy. Drawing on comparative examples from across the peninsula and the kingdoms of Sicily, Sardinia and Corsica, an international team of leading scholars highlights the complexity and variety of the Italian world from the fourteenth to early sixteenth centuries, surveying the mosaic of kingdoms, principalities, signorie and republics against a backdrop of wider political themes common to all types of state in the period. The authors address the contentious problem of the apparent weakness of the Italian Renaissance political system. By repositioning the Renaissance as a political, rather than simply an artistic and cultural phenomenon, they identify the period as a pivotal moment in the history of the state, in which political languages, practices and tools, together with political and governmental

institutions, became vital to the evolution of a modern European political identity. Written by high performance computing (HPC) experts, Introduction to High Performance Computing for Scientists and Engineers provides a solid introduction to current mainstream computer architecture, dominant parallel programming models, and useful optimization strategies for scientific HPC. From working in a scientific computing center, the author This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. This volume provides a state of the art overview of Online Intercultural Exchange (OIE) in university education and demonstrates how educators can use OIE to address current challenges in university contexts such as internationalisation, virtual mobility and intercultural foreign language education. Since the 1990s, educators have been using virtual interaction to bring their classes into contact with geographically distant partner classes to create opportunities for authentic communication, meaningful collaboration and first-hand experience of working and learning with partners from other cultural backgrounds. Online exchange projects of this nature can contribute to the development of learner autonomy, linguistic accuracy, intercultural awareness, intercultural skills and electronic literacy. Online Intercultural Exchange has now reached a stage where it is moving beyond individual classroom initiatives and is assuming a role as a major tool for internationalization, intercultural development and virtual mobility in universities around the globe. This volume reports qualitative and quantitative findings on the impact of OIE on universities in Europe and elsewhere and offers comprehensive guidance on using OIE at both pedagogical and

technological levels. It provides theoretically-informed accounts of Online Intercultural Exchanges which will be relevant to researchers in Computer Assisted Language Learning, Computer-Mediated Communication, or Virtual Education. Finally, contributors offer a collection of practitioner-authored and practically-oriented case studies for the benefit of teachers of foreign languages or in other subject areas who wish to engage in developing the digital literacy and intercultural competences of their learners.

Sembra sempre impossibile finché non viene fatto. La frase di Nelson Mandela rende l'idea della situazione del mondo della comunicazione e informazione pubblica nel 2015, quando parlare di utilizzo di social network e chat per il servizio al cittadino sembrava da "visionari", un muro troppo alto da abbattere per il mondo della Pubblica Amministrazione italiana. In queste pagine troverete una storia, un'idea che è diventata realtà e che, a suo modo, ha segnato l'inizio di un cambiamento e di un passaggio culturale nel lavoro quotidiano di giornalisti e comunicatori e più in generale del rapporto tra enti e aziende pubbliche e cittadino. È la storia di PA Social, la prima associazione nazionale dedicata alla comunicazione e informazione digitale, la prima nel suo genere a livello internazionale. Una storia che parte nel 2015 e arriva a oggi, con un modello italiano da sostenere e rendere sempre più la normalità del nostro settore pubblico. Una storia che ha come protagonisti migliaia di persone e professionisti in tutta Italia. Un racconto che parte dalla Stazione Termini di Roma per poi coinvolgere tutto il Paese, tra aneddoti, consigli, esperienze nazionali e internazionali, buone pratiche, appunti e obiettivi per il presente e il futuro. Dai primi esempi di comunicazione digitale alla pandemia, dal percorso per il riconoscimento delle professionalità del digitale ai nuovi modelli organizzativi del lavoro. In queste pagine troverete il filo che lega le prime esperienze dei pionieri dell'utilizzo dei social network per l'utilità del servizio pubblico all'attualità, l'era matura della comunicazione e informazione digitale. E proprio l'obiettivo di una matura cultura del digitale è l'elemento che tiene insieme passato, presente e futuro e rende il lettore consapevole che "il meglio deve ancora arrivare".

This volume records the proceedings of an international conference organised as a tribute to the contribution made by Professor H. Fessler over the whole of his professional life, in the field of applied stress analysis. The conference, held at University of Nottingham on 30 and 31 August 1990, was timed to coincide with the date of his formal retirement from the post of Professor of Experimental Stress Analysis in the University. The idea grew from

discussions between some of Professor Fessler's academic associates from Nottingham and elsewhere. An organising committee was set up, and it was decided to invite contributions to the conference in the form of review papers and original research papers in the field of experimental, theoretical and computational stress analysis. The size of the response, both in papers submitted and in attendance at the conference, indicates that the idea proved attractive to many of his peers, former associates and research students. A bound copy of the volume is to be presented to Professor Fessler at the conference dinner on 30 August 1990. An accessible worldwide history of Muslim societies provides updated coverage of each country and region, in a volume that discusses their origins and evolution while offering insight into historical processes that shaped contemporary Islam and surveying its growing influence. Simultaneous. (Social Science) This volume is the eighth in a series devoted to major policy issues in insurance, and sets out the proceedings of a conference, held in Paris in November 2004, to discuss options for dealing with losses caused by large-scale disasters. It contains a selection of papers and reports which focus on three key issues: the insurability of catastrophic risks; the extent to which financial markets can help address the risks of both natural disasters and terrorism; and the role of governments and public-private partnerships in the management of such risks. In view of the prolonged financial meltdown and the resulting clash of socio-economic interests, both between nations and within societies, unforeseen challenges have to be met by contemporary managers. The current organizational, financial, political and social situation calls for innovative, out-of-the-box solutions, while also presenting a unique "opportunity" for management scholars, practitioners and policy makers to work out and bring forward creative and imaginative, as well as realistic, responses to problems. Appealing to scholars, students, researchers and practitioners, and covering a wide spectrum of organizational types and institutions, this book provides scientific evidence, direction and insight on issues associated with confronting challenges related to the contemporary socio-economic scenario. In this respect, the book presents conceptual and empirical research, putting forward a wide range of paradigms and ideas transcending conventional theory, on finding innovative solutions to contemporary business and managerial challenges. It brings forward contemporary theoretical underpinning across an array of sectors and organizational structures, while also presenting the practical implementations -- Book jacket. Antonio Giangrande, orgoglioso di

essere diverso. ODIIO OSTENTAZIONE, IMPOSIZIONE E MENZOGNA. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Tu esisti se la tv ti considera. La Tv esiste se tu la guardi. I Fatti sono oggettivi naturali e rimangono tali. Le Opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, diventano testimonianze. Ergo: Fatti. Con me le Opinioni cangianti e contrapposte diventano fatti. Con me la Cronaca diventa Storia. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldego i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

This book explores risk culture in banks following the financial crisis. It analyses the role of national and institutional risk culture, market competitiveness, organisational systems and institutional practices that led to the weakening of risk culture in financial institutions leading up to the financial crisis. It addresses how to assess and measure risk culture, and analyse the impact on performance and reputation. Finally it explores the impact of regulation and a variety of tools that can be applied from the board down to promote a healthy risk culture in the governance of financial institutions internal controls and risk culture in banks. Based on the International Workshop on "Multimodal Corpora: From Models of Natural Interaction to Systems and Applications", this expanded collection presents a comprehensive review of the current research in the field. This manual aims to provide a consistent teaching tool with the educational objectives of the "Family Business Course: Ownership Governance and Management". At the same time it will also appeal to a wider audience of scholars and, more generally, readers, to enrich the knowledge of the government of family businesses.

Salvatore Esposito De Falco is Professor of Management and he is also Professor of Corporate Governance at the Faculty of Economics, University of Rome "La Sapienza". He has managed numerous ministerial research programs as Coordinator for Global Management of Research Projects and he is the author of numerous publications in international journals concerning corporate governance, strategic alliances and

management of innovation processes. He was visiting scholar at the Department of Management at Baruch College of the City University of New York and at New York University Stern School of Business, as well as visiting professor at Universidad de Huelva, Spain. Moreover, he has been guest editor for three international journals, he participated as Scientific Committee Member in several international conferences and is Editorial Board of six journals (4 international). This book discusses all important aspects of emergency medicine in older people, identifying the particular care needs of this population, which all too often remain unmet. The up-to-date and in-depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes, in conducting appropriate assessment, and in providing timely and adequate care. Particular attention is paid to the common pitfalls of emergency management and means of avoiding them. Between 1980 and 2010, the number of older patients in emergency departments worldwide doubled. Compared with younger patients, older people suffer from more comorbidities, a higher mortality rate, require more complex assessment and diagnostic testing, and tend to stay longer in the emergency department. This book, written by internationally recognized experts in emergency medicine and geriatrics, not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field. This book highlights the use of an outcome-oriented view of performance to frame and assess the desirability of the effects produced by adopted policies, so to allow governments not only to consider effects in the short, but also the long run. Furthermore, it does not only focus on policy from the perspective of a single unit or institution, but also under an inter-institutional viewpoint. This book features theoretical and empirical research on how public organizations have evolved their performance management systems toward outcome measures that may allow one to better deal with wicked problems. Today, 'wicked problems' characterize most of governmental planning involving social issues. These are complex policy problems, underlying high risk and uncertainty, and a high interdependency among variables affecting them. Such problems cannot be clustered within boundaries of a single organization, or referred to specific administrative levels or ministries. They are characterized by dynamic complexity, involving multi-level, multi-actor and multi-sectoral challenges. In the last decade, a number of countries have started to develop new approaches that may enable to improve cohesion, to effectively deal with wicked problems. The chapter

this book showcase these approaches, which encourage the adoption of more flexible and pervasive governmental systems to overcome such complex problems. Outcome-Based Performance Management in the Public Sector is divided into five parts. Part 1 aims at shedding light on problems and issues implied in the design and implementation of "outcome-based" performance management systems in the public sector. Then Part 2 illustrates the experiences, problems, and evolving trends in three different countries (Scotland, USA, and Italy) towards the adoption of outcome-based performance management systems in the public sector. Such analyses are conducted at both the national and local government levels. The third part of the book frames how outcome-based performance management can enhance public governance and inter-institutional coordination. Part 4 deals with the illustration of challenges and results from different public sector domains. Finally the book concludes in Part 5 as it examines innovative methods and tools that may support decision makers in dealing with the challenges of outcome-based performance management in the public sector. Though the book is specifically focused on a research target, it will also be useful to practitioners and master students in public administration . In this book, a novel approach that combines speech-based emotion recognition with adaptive human-computer dialogue modeling is described. With the robust recognition of emotions from speech signals as their goal, the authors analyze the effectiveness of using a plain emotion recognizer, a speech-emotion recognizer combining speech and emotion recognition, and multiple speech-emotion recognizers at the same time. The semi-stochastic dialogue model employed relates user emotion management to the corresponding dialogue interaction history and allows the device to adapt itself to the context, including altering the stylistic realization of its speech. This comprehensive volume begins by introducing spoken language dialogue systems and providing an overview of human emotions, theories, categorization and emotional speech. It moves on to cover the adaptive semi-stochastic dialogue model and the basic concepts of speech-emotion recognition. Finally, the authors show how speech-emotion recognizers can be optimized, and how an adaptive dialogue manager can be implemented. The book, with its novel methods to perform robust speech-based emotion recognition at low complexity, will be of interest to a variety of readers involved in human-computer interaction. This volume reflects the present state of the study of the Mediterranean as carried out by the Italian scientific community. The multidisciplinary character of the papers creates

different "transversal" reading and clustering possibilities that the informed reader is free to design and undertake autonomously. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare. Renowned authority Luciana Duranti, examines the organizational and evaluative effectiveness of diplomatic concepts in the context of modern records and archival systems, and looks at the relationship between originality and authenticity in records. The "italian style" is the aspect that makes italian products immediately recognizable and the junction between culture and italian economy. In this book the author describes the fundamental components that define italian style in manufacturing, work and economics and the cultural and social origins of the attention to aesthetic results and quality as an important component of italian style. Fashion, food, furniture, automation and the many aspects of italian economy, with the importance of the design, reveal a lifestyle that shows us how another style of consumption is possible, linked to quality and durability and not to quantity and waste. The relation between economy and culture it allows us to describe a society in which the values of tradition are maintained and meet innovation in a sustainable and generative way of quality. The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO), collected and documented by the Union of International Associations, can be found here. In addition to the history, aims and activities of international organizations, with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Volume 3 allows readers to locate organizations by subjects or by fields of activity and specialization, and includes an index to Volumes 1 through 3. Introduction and background; Exploratory data analysis and graphics; Deterministic functions for ecological modeling; Probability and stochastic distributions for ecological modeling; Stochastic simulation and power analysis; Likelihood and all that; Optimization and all that; Likelihood examples; Standard statistics revisited; Modeling variance; Dynamic models. Society is now facing challenges for which the traditional management toolbox is increasingly inadequate. Well-grounded theoretical frameworks, such as systems thinking and cybernetics, offer general level interpretation schemes and models that are capable of supporting

understanding of complex phenomena and are not impacted by the passage of time. This book serves the knowledge society to address the complexity of decision making and problem solving in the 21st century with contributions from systems and cybernetics. A multi-disciplinary approach has been adopted to support diversity and to develop inter- and trans-disciplinary knowledge within the shared thematic of problem solving and decision making in the 21st century. Its conceptual thread is cyber/systemic thinking, and its realisation is supported by a wide network of scientists on the basis of a participative agenda. The book provides a platform of knowledge sharing and conceptual frameworks developed with multi-disciplinary perspectives, which are useful to better understand the fast changing scenario and the complexity of problem solving in the present time. This book critically examines the implementation and adoption of integrated reporting (IR) in organizations and corporations. A relatively new area of policy and practice, IR has rapidly gained considerable prominence since the formation of the International Integrated Reporting Committee in 2010. The book analyzes the outcomes, benefits as well as the shortfalls of integrated reporting. It offers an introduction to the foundations of IR and a comprehensive overview of its practice through a number of detailed case studies. Lastly, it discusses the outlook and further developments in sustainability accounting and reporting.
