The work here hopes to celebrate and humanize the millions of service workers as neighbors and loved ones doing labor that is often forgotten or misunderstood. Scraping Away looks to achieve this by considering the person as more than just their job, exploring complicated family relationships and the angst of a Rust Belt adolescence."-- NEW YORK TIMES BESTSELLER • The classic work that predicted the anxieties of a world upended by rapidly emerging technologies—and now provides a road map to solving many of our most pressing crises. "Explosive . . . brilliantly formulated." —The Wall Street Journal Future Shock is the classic that changed our view of tomorrow. Its startling insights into accelerating change led a president to ask his advisers for a special report, inspired composers to write symphonies and rock music, gave a powerful new concept to social science, and added a phrase to our language. Published in over fifty countries, Future Shock is the most important study of change and adaptation in our time. In many ways, Future Shock is about the present. It is about what is happening today to people and groups who are overwhelmed by change. Change affects our products, communities, organizations—even our patterns of friendship and love. But Future Shock also illuminates the world of tomorrow by exploding countless clichés about today. It vividly describes the emerging global civilization: the rise of new businesses, subcultures, lifestyles, and human relationships—all of them temporary. Future Shock will intrigue, provoke, frighten, encourage, and, above all, change everyone who reads it. Author's best-known and most controversial study relates the rise of a capitalist economy to the Puritan belief that hard work and good deeds were outward signs of faith and salvation. Reprint of the original, first published in 1865. Also, lists and tables for reference. This book has a dual focus. As its title is meant to suggest, it is a history not just of housework but also of the tools with which that work is done: household technology. Human beings are tool-using animals; indeed, some anthropologists believe that, along with speech,, the ability to use and to refine our tools is precisely what sets us apart from other species of primates. Sample Text Prince Peter Kropotkin (1842-1921) was the most outstanding anarchist thinker of his time. His writings, which combine revolutionary fervor with intellectual rigor, were influential far beyond the bounds of the anarchist movement. No mere propagandist, Kropotkin aimed to provide anarchism with a scientific base through research of dominant tendencis in society. This text is a meticulously researched and argued outline for redirecting agricultural and industrial production in a world of shrinking resources and increasing human needs. More prophetic than utopian, this volume remains remarkably pertinent to economic conditions at the
