An Introduction to Virtual Sound Barriers Dec 13 2019 A virtual sound barrier is an active noise control system that uses arrays of loudspeakers and microphones to create a useful size of quiet zone and can be used to reduce sound propagation, radiation, or transmission from noise sources or to reduce noise level around people in a noisy environment. This book introduces the history, principle, and design methods of virtual sound barriers first, and then describes recent progress in research on the systems. Two virtual sound barrier systems, i.e., planar virtual sound barrier system and three-dimensional virtual sound barrier system, are discussed including applications, limitations and future direction discussions.

Internal Combustion Engines Oct 03 2021 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

The Last Resort Aug 21 2020 Thrilling, heartbreaking, and, at times, absurdly funny, The Last Resort is a remarkable true story about one family in a country under siege and a testament to the love, perseverance, and resilience of the human spirit. Born and raised in Zimbabwe, Douglas Rogers is the son of white farmers living through that country's long and tense transition from postcolonial rule. He escaped the dull future mapped out for him by his parents for one of adventure and excitement in Europe and the United States. But when Zimbabwe's president Robert Mugabe launched his violent program to reclaim white-owned land and Rogers's parents were caught in the cross fire, everything changed. Lyn and Ros, the owners of Drifters—a famous game farm and backpacker lodge in the eastern mountains that was one of the most popular budget resorts in the country—found their home and resort under siege, their friends and neighbors expelled, and their lives in danger. But instead of leaving, as their son pleads with them to do, they haul out a shotgun and decide to stay. On returning to the country of his birth, Rogers finds his once orderly and progressive home transformed into something resembling a Marx Brothers romp crossed with Heart of Darkness: pot has supplanted maize in the fields; hookers have replaced college kids as guests; and soldiers, spies, and teenage diamond dealers guzzle beer at the bar. And yet, in spite of it all, Rogers's parents—with the help of friends, farmworkers, lodge guests, and residents—among them black political dissidents and white refugee farmers—continue to hold on. But can they survive to the end? In the midst of a nation stuck between its stubborn past and an impatient future, Rogers soon begins to see his parents in a new light: unbowed, with passions and purpose renewed, even heroic. And, in the process, he learns that the "big story" he had relentlessly pursued his entire adult life as a roving journalist and travel writer was actually happening in his own backyard. Evoking elements of The Tender Bar and Absurdistan, The Last

Resort is an inspiring, coming-of-age tale about home, love, hope, responsibility, and redemption. An edgy, roller-coaster adventure, it is also a deeply moving story about how to survive a corrupt Third World dictatorship with a little innovation, humor, bribery, and brothel management.

Rockin' Teal for My Grandfather: Cornell Notes Notebook Nov 04 2021 A widely known and recognized system of note taking is commonly taught to university students which is called the Cornell Note Taking Method. It is divided into two columns: the right column is for the note-taking, while the left one is for the questions and keywords. It's a perfect book for categorizing and putting your notes in order to make it more organized so it's easier to scan and review. With its note-organization feature, it is very popular to a lot of students and it can also be used for meetings, lectures, and so much more. Grab a copy now!

Love by Night Nov 11 2019 More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

Advanced Tire Mechanics Dec 25 2020 This book highlights the mechanics of tire performance, offering

detailed explanations of deriving basic equations for the fundamental properties of tires, and discussing ways to improve tire performance using these equations. It also compares the theory with practical measurements. The book commences with composite mechanics, which is the fundamental theory for belt and carcass tires, and covers classical, modified and discrete lamination theory. It then addresses the theory of tire shape and spring properties and the mechanics of tread pattern contact properties, as well as the performance of various tires. This comprehensive book is a valuable resource for engineers involved in tire design and offers unique insights and examples of improvement of tire performances.

Harry Potter: Deathly Hallows Hardcover Journal and Elder Wand Pen Set Apr 16 2020 New from Insight Editions' best-selling Harry Potter stationery line, the Harry Potter: Deathly Hallows Hardcover Journal and Elder Wand Pen Set brings a bold Deathly Hallows touch to your everyday journaling and includes a collectible Elder Wand pen! Celebrate the artistry of the Harry Potter films with this Deathly Hallows-themed journal and pen set. Inspired by the wizarding world's famous Deathly Hallows, this journal features a gorgeous full-color cover emblazoned with the iconic Deathly Hallows symbol and a collectible, sculpted Elder Wand pen. This hardcover journal lies flat when open and includes 192 ruled pages, a ribbon placeholder, an elastic band, and a back pocket for storing keepsakes and mementos.

Schaum's Outline of Fluid Mechanics Oct 23 2020 Study faster, learn better--and get top grades with Schaum's Outlines Millions of students trust Schaum's Outlines to help them succeed in the classroom and on exams. Schaum's is the key to faster learning and higher grades in every subject. Each Outline presents all the essential course information in an easy-to-follow, topic-by-topic format. You also get hundreds of examples, solved problems, and practice exercises to test your skills. Use Schaum's Outlines to: Brush up before tests Find answers fast Study quickly and more effectively Get the big picture without spending hours poring over lengthy textbooks Fully compatible with your classroom text, Schaum's highlights all the important facts you need to know. Use Schaum's to shorten your study time--and get your best test scores! This Schaum's Outline gives you: A concise guide to the standard college course in fluid dynamics 480 problems with answers or worked-out solutions Practice problems in multiple-choice format like those on the Fundamentals of Engineering Exam

Accounting Information Systems Aug 01 2021 Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS)

concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

The Collaborative Economy in Action: European Perspectives Jul 12 2022 The book titled The Collaborative Economy in Action: European Perspectives is one of the important outcomes of the COST Action CA16121, From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy (short name: Sharing and Caring; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action Sharing and Caring is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukaszewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing

and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

The Anthroposophical Soul Calendar and the Incarnation Cycle of Man May 18 2020 This book takes a completely new look at the Anthroposophical Soul Calendar. It is about the deeper meaning of the fifty-two weekly verses, which has remained essentially unexplored in the last hundred years since the first edition by Rudolf Steiner. A dense veil of Isis was spread over them, of which is well known that no mortal person can lift it. Only the immortal, psycho-spiritual human being, who knows himself at home in the extrasensory, higher worlds, is capable of doing this. Only to him the weekly verses reveal themselves as a travel guide through these worlds and lift him up to ever higher spiritual-cosmic realms until he reaches the experience of God, from where he gradually descends again into a new life on Earth, enriched in spirit and fertilized in his soul. If the reader embarks on this journey, the spiritual archetype of the Soul Calendar is ultimately unveiled to him and he achieves an extended understanding of Man and Christ. By many quotations from Rudolf Steiner's lectures and books, the author virtually lets Steiners himself elucidate the breathtaking depths of his mysterious weekly verses.

Spectra of Graphs Sep 02 2021 This book gives an elementary treatment of the basic material about graph spectra, both for ordinary, and Laplace and Seidel spectra. The text progresses systematically, by covering standard topics before presenting some new material on trees, strongly regular graphs, two-graphs, association schemes, p-ranks of configurations and similar topics. Exercises at the end of each chapter provide practice and vary from easy yet interesting applications of the treated theory, to little excursions into related topics. Tables, references at the end of the book, an author and subject index enrich the text. Spectra of Graphs is written for researchers, teachers and graduate students interested in graph spectra. The reader is assumed to be familiar with basic linear algebra and eigenvalues, although some more advanced topics in linear algebra, like the Perron-Frobenius theorem and eigenvalue interlacing are included.
