Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Superyacht Master covers the requirements of the navigation and radar modules for the Officer of the Watch (Yachts) and the Master (Yachts) Certificates required for captains and crew of commercial yachts over 24m and under 3,000 tons. It is the only book written specifically for these modules and will be required reading for all those undertaking a deck career in the superyacht industry or in similar sized commercial craft. This book is intended for the next level of navigators after Yachtmaster and is an extension of the current series of very successful and highly regarded course instruction books available from Adlard Coles Nautical. 'At long last someone has written an in-depth reference manual on radar operation for the masters of large yachts. Every superyacht should have a copy on the bridge!' John Wyborn, Director, The Crew Training Centre, Antibes 'Complete novice or know-all, you'll love this stunning book. An essential boater's companion, it will certainly have a place on my boat on the Amalfi coast' Salvatore Calabrese, legendary bartender A boozy book for boaters, The Boat Drinks Book serves up an expert look at the drinking culture in key sailing spots around the world. The book is split into five regions: Atlantic, Med, Baltic, Pacific, and Caribbean, and author Fiona Sims encourages us to explore each region and discover what locals like to drink, how it's made, where to go to drink it, and what is best to eat with it. In doing so she uncovers distilleries, breweries and wineries all within a short taxi ride of the harbour and shows us how to make the most of traditional markets. As well as giving us the insider knowledge on fabulous locations worldwide, The Boat Drinks Book gets in on the making too. Cocktail and drink recipes inspire us to whip up something delicious – using local liqueurs, wines, spirits and produce – to sip on deck at the end of a long day's cruising or exploring. There's even a scattering of recipes for ultimate boat nibbles, inspired by each region, from tapenade to salsa to stuffed piquillo peppers. So whether you're a seasoned sailor or an armchair aperitif enthusiast, grab a copy of The Boat Drinks Book and let expert food and wine writer Fiona Sims quench your thirst. Your mission: to discover and enjoy. The International Handbook of Population Aging examines research on a wide array of the profound implications of population aging. It demonstrates how the world is changing through population aging, and how demography is changing in response to it. John Vigor turns the spotlight on twenty seaworthy sailboats that are at home on the ocean in all weather. These are old fiberglass boats, mostly of traditional design and strong construction. All are small, from 20 feet to 32 feet overall, but all have crossed oceans, and all are cheap. Choosing the right boat to take you across an ocean or around the world can be confusing and exasperating, particularly with a tight budget. Vigor sets out to remedy that in this book. He compares the designs and handling characteristics of 20 different boats whose secondhand market prices start at about \$3,000. Interviews with experienced owners (featuring valuable tips about handling each boat in heavy weather) are interspersed with line drawings of hulls, sail plans, and accommodations. Vigor has unearthed the known weaknesses of each boat and explains how to deal with them. He rates their comparative seaworthiness, their speed, and the number of people they can carry in comfort. If you have ever dreamed the dream this book can help you turn it into reality. Where do you get the best crab cakes? Ask one hundred different people and you'll likely get one hundred different answers. Some swear by classic Chesapeake Bay crab cakes, and some by spicy Creole crab cakes, while others maintain that Pacific Northwest crab cakes can't be beat. In I Love Crab Cakes!, award-winning chef and cookbook author Tom Douglas brings the best of East, West, and Gulf coasts to the table and proves that the most delicious crab cakes of all come straight from your home kitchen. Tom thoroughly examines every thorny, crab cake-related issue. Bread crumbs, cracker crumbs, panko, or no crumbs at all? What kind of crabmeat: Dungeness, king, or Peeky Toe? Are the best crab cakes pan-fried, deep-fried, or not even cooked? Tom offers up dozens of his famous crab cake recipes, including classic crab cakes from East and West, North and South, plus newer innovations such as Wild Ginger Crab Cakes, Pesto Risotto Crab Cakes, and Crab Louie Cheesecakes. There are crab cake sandwiches, breakfast crab cakes, and crab cake sauces and salsas. A collection of 24 stories written by talented authors. No two writers are the same, but they have one thing in common: they are storytellers at heart and their deepest desire is to be heard. Writing the Dream shares the stories of twenty-four Australian writers, from emerging to established authors. Some are traditionally published, while others have taken the self-publishing route. Some have faced rejection after rejection, while others have had a dream path. But, while their writing journeys are different, all of them strive to create, entertain, inspire and inform. And all of them have unique and creative voices that deserve to be heard. With contributors including Anna Jacobs, Juliet Marillier, Natasha Lester, Jenn J McLeod, and a host of other talented writers, the stories in Writing the Dream are set to strike an inspirational chord in every hopeful writer's heart. Everyone dreams of tropical escape. But what happens when you escape for too long? Imagine spending 24 hours a day with your spouse in 31 not-so-square feet . . . for years; crossing the Pacific Ocean on two gallons of fuel; and tossing spaghetti marinara around your living room, then cleaning it up while bouncing like ice in a martini shaker. Tightwads on the Loose tells the story of Wendy and Garth, lured to sea by the promise of adventure. They buy a 31-foot boat that fits their budget better than it fits Garth's large frame and set sail for an open-ended voyage, never imagining they'd be gone seven years, or cover 34,000 miles at the pace of a fast walk. They live without most "necessities" and learn that teamwork and a sense of humor matter most as they face endless "character-building opportunities." They make a long-anticipated visit to the island where Garth had been shipwrecked as a teenager, only to find it had become a penal colony. An electronic catastrophe in the Solomon Islands leaves them without navigation equipment, which forces them to trade their free-wheeling lifestyle for one that seems straight out of a '60s sitcom: jobs at a U.S. Army base in the Marshall Islands. In Asia, they dodge typhoons and ships that threaten to turn their home into kindling. Finally they endure a grueling 49-day nonstop ocean crossing. None of this prepares them for their arrival "home" to a post-9/11 America which leaves them wondering what had changed more, them or the world. Tightwads on the Loose offers a fun read to the armchair adventurer -- or anyone afflicted with wanderlust. More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink. Fair winds and fine cruising is author Chris Doyle's wish for readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and Doyle addresses them by geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactingly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type. In Tides: The Science and Spirit of the Ocean, writer, sailor, and surfer Jonathan White takes readers across the globe to discover the science and spirit of ocean tides. In the Arctic, White shimmies under the ice with an Inuit elder to hunt for mussels in the dark cavities left behind at low tide; in China, he races the Silver Dragon, a twenty-five-foot tidal bore that crashes eighty miles up the Qiantang River; in France, he interviews the monks that live in the tide-wrapped monastery of Mont Saint-Michel; in Chile and Scotland, he investigates the growth of tidal power generation; and in Panama and Venice, he delves into how the threat of sea level rise is changing human culture—the very old and very new. Tides combines lyrical prose, colorful adventure travel, and provocative scientific inquiry into the elemental, mysterious paradox that keeps our planet's waters in constant motion. Photographs, scientific figures, line drawings, and sixteen color photos dramatically illustrate this engaging, expert tour of the tides. Fully revised and updated in 2016! Just south of Vancouver in Washington State lies a distinctive island triangle known locally as the San Juans. This enchanting cluster of islands offers boaters the pleasure of cruising in safe and protected waters while enjoying the diversity and individual personality of each island. The allure of the San

Motorboat Electrical and Electronics Manual covers all inboard engine boats, from 20' to 120', coastal, inshore, and blue-water vessels. This complete guide to the electrical systems and the electronics for large and small pleasure boats and workboats is a must for all builders, owners and operators, whether they are concerned with new boats or older boats and their maintenance and upgrading. Topics cover everything from diesel engines to refrigeration, and lightning protection to batteries and metal corrosion. The 12-Volt Bible for Boats is a clear, nonthreatening introduction to the 12-volt electrical systems used on small boats to power everything from reading lights to bilge pumps. This second edition is thoroughly updated with respect to modern batteries, breaker and panel design, alternative energy sources, and troubleshooting equipment, but it retains the fundamental simplicity that is the source of its enduring popularity (more than 100,000 copies sold). Lovingly written and beautifully photographed, Best Boats is an evaluation of the most elegantly designed and best-built sailboats in stages—from a bare hull to a finished yacht. In addition to evaluating overall design, performance and layout, this book, like no other, analyses how and how well the boats are built. Ranging from the ageless Herreshoff day-sailer to the ultra-light Santa Cruz flyers, the book features some of the finest works of designers such as German Frers, Chuck Paine, Bill Crealock, Doug Peterson, Lyle Hess, and others. Even more importantly, it contains interviews with legendary builders such as Tom Morris, the Cherubinis, Cecil Lange, and Tom Dreyfus. Using the surveyed boats as examples, Máté; shows what to look for when contemplating the purchase of any sailboat. For the boatbuilder, it points out the weaknesses and strengths of all aspects of construction, using hundreds of photographs and illustrations to clarify. This book tells the life story of Boston-born aviation pioneer and yacht designer W. Starling Burgess.
