Sport, Leisure and Social Relations (RLE Sports Studies) Jun 01 2021 When this book was first published the study of sport had been largely neglected by sociologists. The contributions to this volume bring the sports field, the leisure centre and everyday leisure activities to a more central position within the sociological enterprise. Whether amateur or professional, sport contributes to wider relations of power, privilege and domination and this debate represents an important phase in the sociology of sport and leisure.

Urban Runoff Quality Management Apr 30 2021 This manual comprises a holistic view of urban runoff quality management. For the beginner, who has little previous exposure to urban runoff quality management, the manual covers the entire subject area from sources and effects of pollutants in urban runoff through the development of management plans and the design of controls. For the municipal stormwater management agency, guidance is given for developing a water quality management plan that takes into account receiving water use objectives, local climatology, regulation, financing and cost, and procedures for comparing various types of controls for suitability and cost effectiveness in a particular area. This guidance will also assist owners of large-scale urban development projects in cost-effectively and aesthetically integrating water quality control to the drainage plan. The manual is also directed to designers who desire a self-contained unit that discusses the design of specific quality controls for urban runoff.

Housing as Intervention Aug 23 2020 Across the world, the housing crisis is escalating. Mass migration to cities has led to rapid urbanisation on an unprecedented scale, while the withdrawal of public funding from social housing provision in Western countries, and widening income inequality, have further compounded the situation. In prosperous US and European cities, middle- and low-income residents are being pushed out of housing markets increasingly dominated by luxury investors. The average London tenant, for example, now pays an unaffordable 49 per cent of his or her pre-tax income in rent. Parts of the developing world and areas of forced migration are experiencing insufficient affordable housing stock coupled with rapidly shifting ways of life. In response to this context, forward-thinking architects are taking the lead with a collaborative approach. By partnering with allied fields, working with residents, developing new forms of housing, and leveraging new funding systems and policies, they are providing strategic leadership for what many consider to be our cities' most pressing crisis. Amidst growing economic and health disparities, this issue of AD asks how housing projects, and the design processes behind them, might be interventions towards greater social equity, and how collaborative work in housing might reposition the architectural profession at large. Anti-personnel Weapons Nov 18 2022 This book, first published in 1978, analyses the development, uses and effects of conventional anti-personnel weapons such as rifles and machine guns, grenades, bombs, shells and mines. It provides the historical, military, technical and clinical background to the international legal discussions as part of the ongoing efforts to prohibit or restrict the uses of some of the more inhumane and indiscriminate of these weapons, the most successful being the 1997 Ottawa Treaty that banned the use of anti-personnel mines.

Some of the demonstrations include conducting manual coding using Microsoft Word and how to use qualitative data analysis software such as Dedoose, NVivo and QDA Miner Lite to analyze data. It also contains creative ways of presenting qualitative findings and provides practical examples. After reading this book, readers will be able to: Analyze qualitative data and present their findings Select an appropriate qualitative analysis tool Decide on the right qualitative coding and categorization strategies for their analysis Develop relationships among categories/themes Choose a suitable format for the presentation of the findings It is a great resource for qualitative research instructors and undergraduate and graduate students who want to gain skills in analyzing qualitative data or who plan to conduct a qualitative study. It is also useful for researchers and practitioners in the social and health sciences fields.

Orlicky's Material Requirements Planning 3/E Feb 15 2020 "The definitive reference for the next generation of manufacturing practitioners and leaders." -- From the Foreword by Dave Turbide, CFPIM, CMfgE, CIRM, CSCP "Finally, MRP has been brought into our new age where, in order to fight for increased share and profitability, manufacturers must not only cope with market volatility and supply chain variability, they must embrace it as a competitive weapon." -- Bob Reary, Fellow-level Certificate, APICS A fully revised and updated edition of the landmark work on material requirements planning (MRP), Orlicky's Material Requirements Planning, Third Edition focuses on the new rules required to effectively support a manufacturing operation using MRP systems in the twenty-first century. This authoritative resource offers proven solutions that help you gain the competitive edge through strategic lead time reductions, substantial reductions in total inventory investment, and significant increases in service levels. This is an indispensable tool for manufacturing practitioners and anyone preparing for CPIM certification. Coverage includes: Inventory in a manufacturing environment Principles of MRP MRP system Processing logic Lot sizing System records and files Product definition Master production schedule Inventory planning and control system System effectiveness Industry effect on MRP Project manufacturing Remanufacturing Process industry application Repetitive manufacturing application Sales and operations planning Evolution of MRP and planning systems Demand driven MRP (DDMRP) logic Strategic inventory positioning Dynamic buffers Demand driven planning Highly visible and collaborative execution DDMRP performance reporting and analytics DDMRP future Building on the pioneering work of Joseph Orlicky, this new edition of the classic text on material requirements planning (MRP) reveals the next evolutionary step for materials and supply chain synchronization in the modern manufacturing landscape. Orlicky's Material Requirements Planning, Third Edition reviews the poor business results embedded in many of today's manufacturing systems, discusses the core problems causing these results, explains an alternative pull structure for planning and controlling materials flow, and presents results from actual implementations. This thoroughly updated edition offers comprehensive coverage of MRP, describes the current state of the MRP application, and identifies the fundamental changes required to achieve sustainable success given the current global circumstances and technology options. This state-of-the art guide articulates the next generation of MRP logic--demand driven MRP (DDMRP)--and provides a roadmap for the near and distant future for this critical manufacturing management tool. Carol Ptak is currently a partner with the Demand Driven Institute, and was most recently at Pacific Lutheran University as Visiting Professor and Distinguished Executive in Residence. Previously, she was vice president and global industry executive for manufacturing and distribution industries at PeopleSoft where she developed the concept of demand driven manufacturing (DDM). Ms. Ptak spent four years at IBM Corporation culminating in the position of global SMB segment executive. Chad Smith is cofounder and managing partner of Constraints Management Group, a services and technology company specializing in pull-based manufacturing, materials, and project management systems for mid-range and large manufacturers. He has been at the forefront of developing and articulating demand driven MRP and is also an internationally recognized expert on the theory of constraints (TOC). Carol and Chad founded the Demand Driven Institute, an organization devoted to the proliferation and further development of demand driven strategies and tactics in industry.

How Variations in Design, Site Selection and Regulations Affect ADU Programs Jul 22 2020 This thesis builds on the work of existing literature about subsidized accessory dwelling unit (ADU) programs. Using data recently collected from subsidized ADU programs around the country, this thesis presents an evaluation of how those programs are going, what has worked, what hasn't worked and why. This thesis also evaluates legislation that has been enacted in recent months and years and the impact that legislation has had on the success of both subsidized ADU programs and private, market rate ADUs. Although practical implications are described at length, this is not intended to be a manual for cities that intend to launch subsidized ADU programs. No two cities are exactly alike, and there's not likely one solution that will work for every one. Rather, this thesis aims to illuminate challenges that

homeowners and cities have had so that planners can formulate their own subsidized ADU programs and ADU regulatory reform armed with lessons learned in the last few months and years.

Remaking the American Dream Feb 09 2022 The redefinition of the single-family house, the urban landscape, and the American Dream. Sitting squarely at the center of the American Dream, the detached single-family home has long been the basic building block of most US cities. In *Remaking the American Dream*, Vinit Mukhija considers how this is changing, in both the American psyche and the urban landscape. In defiance of long-held norms and standards, single-family housing is slowly but significantly transforming through incremental additions of second and third units. Drawing on empirical evidence of informal and formal changes, *Remaking the American Dream* documents homeowners' quiet unpermitted modifications, conversions, and workarounds, as well as gradual institutional alterations to once-rigid local land-use regulations. Mukhija's primary case study is Los Angeles and the role played by the State of California—findings he contrasts with the experience of other cities including Santa Cruz, Seattle, Portland, Minneapolis, and Vancouver. In each instance, he shows how, and asks why, homeowners are adapting their homes and governments are changing the rules that regulate single-family housing to allow for accessory dwelling units (ADUs) or second units. Key to Mukhija's research is the question of why the idea of single-family living is changing and what this means for the future of US cities. The answer, this book suggests, heralds nothing less than a redefinition of American urbanism—and the American Dream.

Wild Birds and Avian Influenza Sep 16 2022 The highly pathogenic avian influenza H5N1 strain has spread from domestic poultry to a large number of species of free-ranging wild birds, including non-migratory birds and migratory birds that can travel thousands of kilometers each year. The regular contact and interaction between poultry and wild birds has increased the urgency of understanding wild bird diseases and the transmission mechanisms that exist between the poultry and wild bird sectors, with a particular emphasis on avian influenza. Monitoring techniques, surveillance, habitat use and migration patterns are all important aspects of wildlife and disease ecology that need to be better understood to gain insights into disease transmission between these sectors. This manual contains chapters on the basic ecology of avian influenza and wild birds, capture and marking techniques (ringing, color marking and satellite telemetry), disease sampling procedures, and field survey and monitoring procedures.-- Publisher's description.
