The Politics of Resentment Jan 26 2023 Since the election of Scott Walker, Wisconsin has been seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from strong government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the “liberal elite.” Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can

look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate’s social identity matches our own. Using Scott Walker and Wisconsin’s prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. *The Politics of Resentment* shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself. Feb 27 2023

Pope Benedict XVI and the Politics of Modernity Nov 19 2019 Focusing on Pope Benedict XVI’s nuanced account as to why the modern West cannot currently afford to forget or neglect its premodern Hellenic and Christian roots, this book will interest religious and nonreligious people who are concerned about

the future of democracy and religion in contemporary Western societies."--pub. desc. *The Reagan Presidency and the Politics of Race* Dec 13 2021 Argues that Reagan's civil rights policy was determined by legitimate philosophical considerations, rather than crass political motivations.

[The Politics of Privacy in Contemporary Native, Latinx, and Asian American Metafictions](#) Feb 03 2021 The Politics of Privacy in Contemporary Native, Latinx, and Asian American Metafictions is the first book-length study to approach contemporary issues of racialized visibility and privacy through narrative form. Using a formal maneuver, narrative privacy, Colleen G. Eils analyzes how writers of contemporary metafiction explicitly withhold stories from readers to illuminate and theorize the politics of privacy in a post-9/11 US context. As a formal device and reading strategy, narrative privacy has two primary critical interests: affirming the historically political nature of visibility, particularly for people of color and indigenous people, and theorizing privacy as a political assertion of power over representation and material vulnerability. Eils breaks strict disciplinary silos by putting visibility/surveillance studies, ethnic studies, and narrative studies in conversation with one another. Eils also puts texts in the Native, Latinx, and Asian American literary canon in conversation with each other. She focuses on texts by Viet Thanh Nguyen, David Treuer, Monique Truong, Rigoberto González, Nam Le,

and Stephen Graham Jones that call into question our positions as readers and critics. In deliberately and self-consciously evading readers through the form of their fiction, these writers seize privacy as a political tool for claiming and wielding power in both representational and material registers. *Justice and the Politics of Difference* Dec 25 2022 "In this classic work of feminist political thought, Iris Marion Young challenges the prevailing reduction of social justice to distributive justice. The starting point for her critique is the experience and concerns of the new social movements that were created by marginal and excluded groups, including women, African Americans, and American Indians, as well as gays and lesbians. Young argues that by assuming a homogeneous public, democratic theorists fail to consider institutional arrangements for including people not culturally identified with white European male norms. Consequently, theorists do not adequately address the problems of an inclusive participatory framework. Basing her vision of the good society on the culturally plural networks of contemporary urban life, Young makes the case that normative theory and public policy should undermine group-based oppression by affirming rather than suppressing social group differences"--Provided by publisher.

Cultural Politics in Harry Potter Jun 19 2022 "Cultural politics in Harry Potter: life, death and politics of fear is the first book-length

analysis of topics such as death, fear and biopolitics in J. K. Rowling's work from controversial and interdisciplinary perspectives. This collection brings together recent theoretical and applied cultural studies and focuses on three key areas of inquiry: wizarding biopolitics and intersected discourses; anxiety, death, resilience and trauma; and politics of fear and postmodern transformations. As such this book: - provides a comprehensive overview of national and gender discourses, as well as the transiting bodies in-between, in relation to the Harry Potter books series and related multimedia franchise; - situates the transformative power of death within the fandom, transmedia and film depictions of the Potterverse and critically deconstructs the processes of subjectivation and legitimation of death and fear; - examines the strategies and mechanisms through which cultural and political processes are managed, as well as reminding us how fiction and reality intersect at junctions such as terrorism, homonationalism, materialism, capitalism, posthumanism and technology. Exploring precisely what is cultural about wizarding politics, and what is political about culture, *Cultural Politics in Harry Potter* is key reading for students of contemporary literature, media and culture, as well as anyone with an interest in the fictional universe and Wizarding World of Harry Potter"--

The Politics of Women's Rights in Iran Mar 16 2022 Osanloo Arzoo presents an

ethnographic study that explores how conceptions of liberal entitlements fused with a discourse of equality in Islam in the post-revolutionary era to inform & shape women's perceptions of rights.

Professors and Their Politics Apr 17 2022

Offering readable, rigorous analyses rather than polemics, *Professors and Their Politics* yields important new insights into the nature of higher education institutions while challenging dogmas of both the left and the right.

Politics and Expertise Sep 29 2020 A new model for the relationship between science and democracy that spans policymaking, the funding and conduct of research, and our approach to new technologies Our ability to act on some of the most pressing issues of our time, from pandemics and climate change to artificial intelligence and nuclear weapons, depends on knowledge provided by scientists and other experts. Meanwhile, contemporary political life is increasingly characterized by problematic responses to expertise, with denials of science on the one hand and complaints about the ignorance of the citizenry on the other. *Politics and Expertise* offers a new model for the relationship between science and democracy, rooted in the ways in which scientific knowledge and the political context of its use are imperfect. Zeynep Pamuk starts from the fact that science is uncertain, incomplete, and contested, and shows how scientists' judgments about what is significant and useful shape the agenda and framing of

political decisions. The challenge, Pamuk argues, is to ensure that democracies can expose and contest the assumptions and omissions of scientists, instead of choosing between wholesale acceptance or rejection of expertise. To this end, she argues for institutions that support scientific dissent, proposes an adversarial "science court" to facilitate the public scrutiny of science, reimagines structures for funding scientific research, and provocatively suggests restricting research into dangerous new technologies. Through rigorous philosophical analysis and fascinating examples, *Politics and Expertise* moves the conversation beyond the dichotomy between technocracy and populism and develops a better answer for how to govern and use science democratically.

Race and the Politics of Deception Sep 10 2021

Unpacks America's history of dealing with racial problems through the inequitable use of public space. Focuses on Chester, Pennsylvania—a small city comprised of primarily low-income, black residents, roughly twenty miles south of Philadelphia. Like many cities throughout the United States, Chester is experiencing post-industrial decline. A development plan touted as a way to "save" the city, proposes to turn one section into a desirable waterfront destination, while leaving the rest of the struggling residents in fractured communities. Dividing the city into spaces of tourism and consumption versus the everyday spaces of low-income residents. While these

development plans are described as socially inclusive and economically revitalizing, Mele asserts that political leaders and real estate developers intentionally exclude certain types of people—most often, low-income people of color.

Citizens, Experts, and the Environment Jun 26 2020

The tension between professional expertise and democratic governance has become increasingly significant in Western politics. Environmental politics in particular is a hotbed for citizens who actively challenge the imposition of expert theories that ignore forms of local knowledge that can help to relate technical facts to social values. Where information ideologues see the modern increase in information as capable of making everyone smarter, others see the emergence of a society divided between those with and those without knowledge. Suggesting realistic strategies to bridge this divide, Fischer calls for meaningful nonexpert involvement in policymaking and shows how the deliberations of ordinary citizens can help solve complex social and environmental problems by contributing local contextual knowledge to the professionals' expertise. While incorporating theoretical critiques of positivism and methodology, he also offers hard evidence to demonstrate that the ordinary citizen is capable of a great deal more participation than is generally recognized. Popular epidemiology in the United States, the Danish consensus conference, and participatory resource mapping in India serve as examples of

the type of inquiry he proposes, showing how the local knowledge of citizens is invaluable to policy formation. In his conclusion Fischer examines the implications of the approach for participatory democracy and the democratization of contemporary deliberative structures. This study will interest political scientists, public policy practitioners, sociologists, scientists, environmentalists, political activists, urban planners, and public administrators along with those interested in understanding the relationship between democracy and science in a modern technological society.

[The Politics of Evidence \(Open Access\)](#) Oct 31 2020 The Open Access version of this book, available at <http://www.tandfebooks.com/>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. There has been an enormous increase in interest in the use of evidence for public policymaking, but the vast majority of work on the subject has failed to engage with the political nature of decision making and how this influences the ways in which evidence will be used (or misused) within political areas. This book provides new insights into the nature of political bias with regards to evidence and critically considers what an 'improved' use of evidence would look like from a policymaking perspective. Part I describes the great potential for evidence to help achieve social goals, as well as the challenges raised by the political nature of policymaking. It explores

the concern of evidence advocates that political interests drive the misuse or manipulation of evidence, as well as counter-concerns of critical policy scholars about how appeals to 'evidence-based policy' can depoliticise political debates. Both concerns reflect forms of bias - the first representing technical bias, whereby evidence use violates principles of scientific best practice, and the second representing issue bias in how appeals to evidence can shift political debates to particular questions or marginalise policy-relevant social concerns. Part II then draws on the fields of policy studies and cognitive psychology to understand the origins and mechanisms of both forms of bias in relation to political interests and values. It illustrates how such biases are not only common, but can be much more predictable once we recognise their origins and manifestations in policy arenas. Finally, Part III discusses ways to move forward for those seeking to improve the use of evidence in public policymaking. It explores what constitutes 'good evidence for policy', as well as the 'good use of evidence' within policy processes, and considers how to build evidence-advisory institutions that embed key principles of both scientific good practice and democratic representation. Taken as a whole, the approach promoted is termed the 'good governance of evidence' - a concept that represents the use of rigorous, systematic and technically valid pieces of evidence within decision-making processes that are representative of, and

accountable to, populations served.

Lewis Cass and the Politics of Moderation

May 18 2022 A champion of spread-eagle expansionism and an ardent nationalist, Cass subscribed to the Jeffersonian political philosophy, embracing the principles of individual liberty; the sovereignty of the people; equality of rights and opportunities for all citizens; and a strictly construed and balanced constitutional government of limited powers. *Women Who Live Evil Lives* Dec 21 2019 *Women Who Live Evil Lives* documents the lives and practices of mixed-race, Black, Spanish, and Maya women sorcerers, spell-casters, magical healers, and midwives in the social relations of power in Santiago de Guatemala, the capital of colonial Central America. Men and women from all sectors of society consulted them to intervene in sexual and familial relations and disputes between neighbors and rival shop owners; to counter abusive colonial officials, employers, or husbands; and in cases of inexplicable illness. Applying historical, anthropological, and gender studies analysis, Martha Few argues that women's local practices of magic, curing, and religion revealed opportunities for women's cultural authority and power in colonial Guatemala. Few draws on archival research conducted in Guatemala, Mexico, and Spain to shed new light on women's critical public roles in Santiago, the cultural and social connections between the capital city and the countryside, and the gender dynamics of power in the ethnic

and cultural contestation of Spanish colonial rule in daily life.

Senator Alan Bible and the Politics of the New West Feb 21 2020 The biography of Nevada Senator Alan Bible

Hume and the Politics of Enlightenment Mar 04 2021 This work explores Hume's Socratic turn to moral and political philosophy as a response to the crisis of radical questioning.

The Politics Book Sep 22 2022 Politics affects us all and the same questions reverberate across history. Who should rule? Is property theft? What's mightier - the bullet or the ballot? Discover 80 of the world's greatest thinkers and their political big ideas that continue to shape our lives today. Humankind has always asked profound questions about how we can best govern ourselves and how rulers should behave. The Politics Book charts the development of long-running themes, such as attitudes to democracy and violence, developed by thinkers from Confucius in ancient China to Mahatma Gandhi in 20th-century India. Justice goes hand in hand with politics, and in this comprehensive guide, you can explore the championing of people's rights from the Magna Carta to Thomas Jefferson's Bill of Rights and Malcolm X's call to arms. Ideologies inevitably clash and The Politics Book takes you through the big ideas such as capitalism, communism, and fascism exploring their beginnings and social contexts in step-by-step diagrams and illustrations, with clear explanations that cut

through the jargon. Filled with thought-provoking quotes from great thinkers such as Nietzsche, Karl Marx, and Mao Zedong, The Politics Book is a thought-provoking and unmissable read for both students and everyone interested in how the world of government and power works. Series Overview: Big Ideas Simply Explained series uses creative design and innovative graphics along with straightforward and engaging writing to make complex subjects easier to understand. With over 7 million copies worldwide sold to date, these award-winning books provide just the information needed for students, families, or anyone interested in concise, thought-provoking refreshers on a single subject. Literary Politics Jul 28 2020 Literary Politics identifies and debates competing definitions of 'English Studies' as an academic subject, celebrates the diversity of contemporary literary studies, and demonstrates the ways in which a range of literary texts can be understood as politically engaged, sometimes in unexpected ways.

Embracing the Lie May 26 2020 This volume is the companion to Charles J. Alber's *Enduring the Revolution: Ding Ling and the Politics of Literature in Guomindang China*. It is the first serious attempt to reconstruct Ding Ling's biography during the last few decades of her life. Most Westerners know her as a progressive woman writer who became famous during the May 4 Movement, championed its values in Yan'an and was criticized in the

rectification campaigns that followed. Few know about her life afterward and the arduous process of rehabilitation. Here for the first time readers will learn about her life in the Great Northern Wasteland, solitary confinement in Qincheng prison, her visit to the United States, participation in the spiritual pollution campaign, and finally, the attempt to launch the journal *China*. All of this puts a new perspective on the life of one of China's most preeminent woman writers.

U.S. Foreign Policy and the Politics of Apology May 06 2021 Apology and contrition in international relations -- United States relations with enemy nations : setting a context -- The United States and war in Vietnam -- Counter-revolution in Nicaragua -- The 2003 Iraq invasion and the War on Terror -- How and why contrition matters

The Politics of Parenthood Aug 09 2021 Traces the rising emphasis on parenthood in contemporary American politics. Certain events in one's life, such as marriage, joining the workforce, and growing older, can become important determinants of political attitudes and voting choice. Each of these events has been the subject of considerable study, but in *The Politics of Parenthood*, Laurel Elder and Steven Greene look at the political impact of one of life's most challenging adult experiences: having and raising children. Using a comprehensive array of both quantitative and qualitative analyses, Elder and Greene systematically reveal for the first time how the

very personal act of raising a family is also a politically defining experience, one that shapes the political attitudes of Americans on a range of important policy issues. They document how political parties, presidential candidates, and the news media have politicized parenthood and the family over not just one election year, but the last several decades. They conclude that the way the themes of parenthood and the family have evolved as partisan issues at the mass and elite levels has been driven by, and reflects fundamental shifts in, American society and the structure of the American family.

The Beginning of Politics Mar 24 2020 The Book of Samuel is universally acknowledged as one of the supreme achievements of biblical literature. Yet the book's anonymous author was more than an inspired storyteller. The author was also an uncannily astute observer of political life and the moral compromises and contradictions that the struggle for power inevitably entails. *The Beginning of Politics* mines the story of Israel's first two kings to unearth a natural history of power, providing a forceful new reading of what is arguably the first and greatest work of Western political thought. Moshe Halbertal and Stephen Holmes show how the beautifully crafted narratives of Saul and David cut to the core of politics, exploring themes that resonate wherever political power is at stake. Through stories such as Saul's madness, David's murder of Uriah, the rape of Tamar, and the rebellion of Absalom, the book's author deepens our understanding

not only of the necessity of sovereign rule but also of its costs--to the people it is intended to protect and to those who wield it. What emerges from the meticulous analysis of these narratives includes such themes as the corrosive grip of power on those who hold and compete for power; the ways in which political violence unleashed by the sovereign on his own subjects is rooted in the paranoia of the isolated ruler and the deniability fostered by hierarchical action through proxies; and the intensity with which the tragic conflict between political loyalty and family loyalty explodes when the ruler's bloodline is made into the guarantor of the all-important continuity of sovereign power.--

[Multiculturalism and the Politics of Guilt](#) Oct 23 2022 *Multiculturalism and the Politics of Guilt* extends Paul Gottfried's examination of Western managerial government's growth in the last third of the twentieth century. Linking multiculturalism to a distinctive political and religious context, the book argues that welfare-state democracy, unlike bourgeois liberalism, has rejected the once conventional distinction between government and civil society. Gottfried argues that the West's relentless celebrations of diversity have resulted in the downgrading of the once dominant Western culture. The moral rationale of government has become the consciousness-raising of a presumed majority population. While welfare states continue to provide entitlements and fulfill the other material programs of older welfare regimes,

they have ceased to make qualitative leaps in the direction of social democracy. For the new political elite, nationalization and income redistributions have become less significant than controlling the speech and thought of democratic citizens. An escalating hostility toward the bourgeois Christian past, explicit or at least implicit in the policies undertaken by the West and urged by the media, is characteristic of what Gottfried labels an emerging "therapeutic" state. For Gottfried, acceptance of an intrusive political correctness has transformed the religious consciousness of Western, particularly Protestant, society. The casting of "true" Christianity as a religion of sensitivity only toward victims has created a precondition for extensive social engineering. Gottfried examines late-twentieth-century liberal Christianity as the promoter of the politics of guilt. Metaphysical guilt has been transformed into self-abasement in relation to the "suffering just" identified with racial, cultural, and lifestyle minorities. Unlike earlier proponents of religious liberalism, the therapeutic statist oppose anything, including empirical knowledge, that impedes the expression of social and cultural guilt in an effort to raise the self-esteem of designated victims. Equally troubling to Gottfried is the growth of an American empire that is influencing European values and fashions. Europeans have begun, he says, to embrace the multicultural movement that originated with American liberal Protestantism's emphasis on

diversity as essential for democracy. He sees Europeans bringing authoritarian zeal to enforcing ideas and behavior imported from the United States. Multiculturalism and the Politics of Guilt extends the arguments of the author's earlier *After Liberalism*. Whether one challenges or supports Gottfried's conclusions, all will profit from a careful reading of this latest diagnosis of the American condition.

Fixing the Facts Jan 02 2021 What is the role of intelligence agencies in strategy and policy? How do policymakers use (or misuse) intelligence estimates? When do intelligence-policy relations work best? How do intelligence-policy failures influence threat assessment, military strategy, and foreign policy? These questions are at the heart of recent national security controversies, including the 9/11 attacks and the war in Iraq. In both cases the relationship between intelligence and policy broke down-with disastrous consequences. In *Fixing the Facts*, Joshua Rovner explores the complex interaction between intelligence and policy and shines a spotlight on the problem of politicization. Major episodes in the history of American foreign policy have been closely tied to the manipulation of intelligence estimates. Rovner describes how the Johnson administration dealt with the intelligence community during the Vietnam War; how President Nixon and President Ford politicized estimates on the Soviet Union; and how pressure from the George W. Bush administration contributed to flawed

intelligence on Iraq. He also compares the U.S. case with the British experience between 1998 and 2003, and demonstrates that high-profile government inquiries in both countries were fundamentally wrong about what happened before the war.

The Politics of Friendship Feb 15 2022 Influential exploration of the idea of friendship and its political consequences. "O, my friends, there is no friend." The most influential of contemporary philosophers explores the idea of friendship and its political consequences, past and future. Until relatively recently, Jacques Derrida was seen by many as nothing more than the high priest of Deconstruction, by turns stimulating and fascinating, yet always somewhat disengaged from the central political questions of our time. Or so it seemed. Derrida's "political turn," marked especially by the appearance of *Specters of Marx*, has surprised some and delighted others. In *The Politics of Friendship* Derrida renews and enriches this orientation through an examination of the political history of the idea of friendship pursued down the ages. Derrida's thoughts are haunted throughout the book by the strange and provocative address attributed to Aristotle, "my friends, there is no friend" and its inversions by later philosophers such as Montaigne, Kant, Nietzsche, Schmitt and Blanchot. The exploration allows Derrida to recall and restage the ways in which all the oppositional couples of Western philosophy and political thought—friendship and enmity,

private and public life—have become madly and dangerously unstable. At the same time he dissects genealogy itself, the familiar and male-centered notion of fraternity and the virile virtue whose authority has gone unquestioned in our culture of friendship and our models of democracy The future of the political, for Derrida, becomes the future of friends, the invention of a radically new friendship, of a deeper and more inclusive democracy. This remarkable book, his most profoundly important for many years, offers a challenging and inspiring vision of that future.

Empire, Race and the Politics of Anti-Caste Apr 24 2020 "Empire, Race and the Politics of Anti-Caste provides the first comprehensive biography of Catherine Impey and her radical political magazine, *Anti-Caste*. Published monthly from 1888, *Anti-Caste* published articles that exposed and condemned racial prejudice across the British Empire and the United States. Editing the magazine from her home in Street, Somerset, Impey welcomed African and Asian activists and made Street an important stop on the political tour for numerous foreign guests, reorienting geographies of political activism that usually locate anti-racist politics within urban areas. The production of *Anti-Caste* marks an important moment in early progressive politics in Britain and, using a wealth of archival sources, this book offers a thorough exploration both of the publication and its founder for those interested in imperial history and the history of

women." -- publisher's website.

The Politics Book Jan 14 2022 Learn about how the world of government and power works in The Politics Book. Part of the fascinating Big Ideas series, this book tackles tricky topics and themes in a simple and easy to follow format. Learn about Politics in this overview guide to the subject, brilliant for novices looking to find out more and experts wishing to refresh their knowledge alike! The Politics Book brings a fresh and vibrant take on the topic through eye-catching graphics and diagrams to immerse yourself in. This captivating book will broaden your understanding of Politics, with: - More than 100 groundbreaking ideas in the history of political thought - Packed with facts, charts, timelines and graphs to help explain core concepts - A visual approach to big subjects with striking illustrations and graphics throughout - Easy to follow text makes topics accessible for people at any level of understanding The Politics Book is a captivating introduction to the world's greatest thinkers and their political big ideas that continue to shape our lives today, aimed at adults with an interest in the subject and students wanting to gain more of an overview. Delve into the development of long-running themes, like attitudes to democracy and violence, developed by thinkers from Confucius in ancient China to Mahatma Gandhi in 20th-century India, all through exciting text and bold graphics. Your Politics Questions, Simply Explained This engaging overview explores the

big political ideas such as capitalism, communism, and fascism, exploring their beginnings and social contexts - and the political thinkers who have made significant contributions. If you thought it was difficult to learn about governing bodies and affairs, The Politics Book presents key information in a clear layout. Learn about the ideas of ancient and medieval philosophers and statesmen, as well as the key personalities of the 16th to the 21st centuries that have shaped political thinking, policy, and statecraft. The Big Ideas Series With millions of copies sold worldwide, The Politics Book is part of the award-winning Big Ideas series from DK. The series uses striking graphics along with engaging writing, making big topics easy to understand.

Global Political Demography Oct 19 2019

This open access book draws the big picture of how population change interplays with politics across the world from 1990 to 2040. Leading social scientists from a wide range of disciplines discuss, for the first time, all major political and policy aspects of population change as they play out differently in each major world region: North and South America; Sub-Saharan Africa and the MENA region; Western and East Central Europe; Russia, Belarus and Ukraine; East Asia; Southeast Asia; subcontinental India, Pakistan and Bangladesh; Australia and New Zealand. These macro-regional analyses are completed by cross-cutting global analyses of migration, religion and poverty, and age profiles and intra-state

conflicts. From all angles, this book shows how strongly contextualized the political management and the political consequences of population change are. While long-term population ageing and short-term migration fluctuations present structural conditions, political actors play a key role in (mis-)managing, manipulating, and (under-)planning population change, which in turn determines how citizens in different groups react.

The Politics of the Book Nov 24 2022 It is impossible to separate the content of a book from its form. In this study, Filipe Carreira da Silva and Mónica Brito Vieira expand our understanding of the history of social and political scholarship by examining how the entirety of a book mediates and constitutes meaning in ways that affect its substance, appropriation, and reception over time. Examining the evolving form of classic works of social and political thought, including W. E. B. Du Bois's *The Souls of Black Folk*, G. H. Mead's *Mind, Self, and Society*, and Karl Marx's 1844 *Economic and Philosophic Manuscripts*, Carreira da Silva and Brito Vieira show that making these books involved many hands. They explore what publishers, editors, translators, and commentators accomplish by offering the reading public new versions of the works under consideration, examine debates about the intended meaning of the works and discussions over their present relevance, and elucidate the various ways in which content and material form are interwoven. In doing so, Carreira da

Silva and Brito Vieira characterize the editorial process as a meaning-producing action involving both collaboration and an ongoing battle for the importance of the book form to a work's disciplinary belonging, ideological positioning, and political significance.

Theoretically sophisticated and thoroughly researched, *The Politics of the Book* radically changes our understanding of what doing social and political theory—and its history—implies. It will be welcomed by scholars of book history, the history of social and political thought, and social and political theory.

The Politics of Protection Apr 05 2021 For the past decade, humanitarian actors have increasingly sought not only to assist people affected by conflicts and natural disasters, but also to protect them. At the same time, protection of civilians has become central to UN peacekeeping operations, and the UN General Assembly has endorsed the principle that the international community has the "responsibility to protect" people when their governments cannot or will not do so. Elizabeth Ferris explores the evolution of the international community's understandings of protection, with a particular emphasis on the humanitarian community. "Protection" is a noble word, with positive connotations, but what does it actually mean in practice? Does providing assistance to vulnerable people protect them, for example? Does monitoring the number of rapes protect women? Does increased engagement in protection activities

by humanitarian agencies jeopardize the cornerstone humanitarian principles of neutrality and impartiality? In *The Politics of Protection*, Ferris examines inconsistent ways in which protection is defined and applied. For example, why do certain groups receive international protection while other equally needy groups do not? Her case studies, ranging from Iraq to Katrina, illustrate the challenges—and limitations—of protecting vulnerable populations from the ravages of war and natural disasters. Ferris argues that the protection paradigms currently in use are inadequate to meet the challenges of the future, such as climate change, protracted displacement, and the changing nature of warfare.

The Politics of Rage Aug 21 2022 Combining biography with regional and national history, Dan T. Carter chronicles the dramatic rise and fall of George Wallace, a populist who abandoned his ideals to become a national symbol of racism, and later begged for forgiveness. In *The Politics of Rage*, Carter argues persuasively that the four-time Alabama governor and four-time presidential candidate helped to establish the conservative political movement that put Ronald Reagan in the White House in 1980 and gave Newt Gingrich and the Republicans control of Congress in 1994. In this second edition, Carter updates Wallace's story with a look at the politician's death and the nation's reaction to it and gives a summary of his own sense of the legacy of "the most

important loser in twentieth-century American politics."

The Politics Industry Jul 20 2022 Our political system in America is broken, right? Wrong. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In *The Politics Industry*, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we

make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. The Politics Industry is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

The Latino Family and the Politics of Transformation Jan 22 2020 The purpose of this book is to serve as a guide to understanding the Latino family in the United States and to describe the personal, political, historical, and sacred choices available in creating a freer and more fruitful family life. By linking theory to practice, the book provides a reenvisioning of the Latino family. Before any family can look at itself in a new way, it has to have a theoretical perspective. The book's theory of transformation provides a perspective that allows us to understand Latino families and the family in general. Furthermore, the politics of transformation shows us how to create fundamentally new and better relationships within the family.

The Politics of Opera Jun 07 2021 A wide-ranging look at the interplay of opera and political ideas through the centuries The

Politics of Opera takes readers on a fascinating journey into the entwined development of opera and politics, from the Renaissance through the turn of the nineteenth century. What political backdrops have shaped opera? How has opera conveyed the political ideas of its times? Delving into European history and thought and music by such greats as Monteverdi, Lully, Rameau, and Mozart, Mitchell Cohen reveals how politics—through story lines, symbols, harmonies, and musical motifs—has played an operatic role both robust and sotto voce. This is an engrossing book that will interest all who love opera and are intrigued by politics.

A Scalawag in Georgia Aug 29 2020 A controversial period in American history as revealed through one man's personal and political experiences

The Liberal Hour Oct 11 2021 An engaging behind-the-scenes look at the lesser-known forces that fueled the profound social reforms of the 1960s Provocative and incisive, *The Liberal Hour* reveals how Washington, so often portrayed as a target of reform in the 1960s, was in fact the era's most effective engine of change. The movements of the 1960s have always drawn the most attention from the decade's chroniclers, but it was in the halls of government—so often the target of protesters' wrath—that the enduring reforms of the era were produced. With nuance and panache, Calvin Mackenzie and Robert Weisbrot present the real-life characters—from giants like JFK and Johnson to lesser-known senators and

congressmen—who drove these reforms and were critical to the passage of key legislation. *The Liberal Hour* offers an engrossing portrait of this extraordinary moment when more progressive legislation was passed than in almost any other era in American history.

Politics Nov 12 2021 The third and fourth book of Aristotle's *Politics* discuss fundamental questions in political philosophy: the nature of citizenship, the purpose of the state, the role of law, the merits of various constitutions. Richard Robinson's volume was the first to be published in the Clarendon Aristotle Series, and it remains a model of its kind - a lucid and provocative Introduction, an accurate but readable translation, and concise and critical notes. For this reissue, David Keyt has written a Supplementary Essay, in which he surveys and develops some recent ideas on the main themes of *Politics* III and IV. He also provides an up-to-date bibliography.

The Price of Politics Dec 01 2020 Based on 18 months of reporting, Woodward's 17th book is an intimate, documented examination of how President Obama and the highest profile Republican and Democratic leaders in the United States Congress attempted to restore the American economy and improve the federal government's fiscal condition over three and one half years. Drawn from memos, contemporaneous meeting notes, emails and in-depth interviews with the central players, *THE PRICE OF POLITICS* addresses the key issue of the presidential and congressional campaigns:

the condition of the American economy and how and why we got there. Providing verbatim, day-by-day, even hour-by-hour accounts, the book shows what really happened, what drove the debates, negotiations and struggles that define, and will continue to define, the American future.

The Politics of Experience and The Bird of Paradise

Jul 08 2021 In 'The Politics of Experience' and the visionary 'Bird of Paradise', R.D. Laing shows how the straitjacket of conformity imposed on us all leads to intense feelings of alienation and a tragic waste of human potential. He throws into question the notion of normality, examines schizophrenia and psychotherapy, transcendence and 'us and them' thinking, and illustrates his ideas with a remarkable case history of a ten-day psychosis. 'We are bemused and crazed creatures,' Laing suggests. This outline of 'a thoroughly self-conscious and self-critical human account of man' represents a major attempt to understand our deepest dilemmas and sketch in solutions. 'Everyone in contemporary psychiatry owes something to

R.D. Laing' Anthony Clare, the Guardian.
