Christmas In Poetry Sep 26 2020 NEW PRINT WITH PROFESSIONAL TYPE-SET IN CONTRAST TO SCANNED PRINTS OFFERED BY OTHERS Christmas In Poetry: Carols And Poems Chosen By A Committee Of The Carnegie Library School Association First Series This book is a result of an effort made by us towards making a contribution to the preservation and repair of original classic literature. In an attempt to preserve, improve and recreate the original content, we have worked towards: 1. Type-setting & Reformatting: The complete work has been re-designed via professional layout, formatting and type-setting tools to re-create the same edition with rich typography, graphics, high quality images, and table elements, giving our readers the feel of holding a 'fresh and newly' reprinted and/or revised edition, as opposed to other scanned & printed (Optical Character Recognition - OCR) reproductions. 2. Correction of imperfections: As the work was re-created from the scratch, therefore, it was vetted to rectify certain conventional norms with regard to typographical mistakes, hyphenations, punctuations, blurred images, missing content/pages, and/or other related subject matters, upon our consideration. Every attempt was made to rectify the imperfections related to omitted constructs in the original edition via other references. However, a few of such imperfections which could not be rectified due to intentional/unintentional omission of content in the original edition, were inherited and preserved from the original work to maintain the authenticity and construct, relevant to the work. We believe that this work holds historical, cultural and/or intellectual importance in the literary works community, therefore despite the oddities, we accounted the work for print as a part of our continuing effort towards preservation of literary work and our contribution towards the development of the society as a whole, driven by our beliefs. We are grateful to our readers for putting their faith in us and accepting our imperfections with regard to preservation of the historical content. HAPPY READING!

Not by Bread Alone Jul 25 2020 Arctic explorer and anthropologist Vilhjalmur Stefansson promotes the health benefits of a diet high in fat and low in carbohydrates. Inspired by his observations of Eskimos and other indigenous cultures, and supported by evidence from a year-long experiment in which he only ate meat, Stefansson makes a strong case for an all-meat diet.

Laurel Canyon Mar 01 2021 In the late sixties and early seventies, an impromptu collection of musicians colonized a eucalyptus-scented canyon deep in the Hollywood Hills of Los Angeles and melded folk, rock, and savvy American pop into a sound that conquered the world as thoroughly as the songs of the Beatles and the Rolling Stones had before them. Thirty years later, the music made in Laurel Canyon continues to pour from radios, iPods, and concert stages around the world. During the canyon's golden era, the musicians who lived and worked there scored dozens of landmark hits, from "California Dreamin'" to "Suite: Judy Blue Eyes" to "It's Too Late," selling tens of millions of records and resetting the thermostat of pop culture. In Laurel Canyon, veteran journalist Michael Walker tells the inside story of this unprecedented gathering of some of the baby boom's leading musical lights--including Joni Mitchell; Jim Morrison; Crosby, Stills, and Nash; John Mayall; the Mamas and the Papas; Carole King; the Eagles; and Frank Zappa, to name just a few--who turned Los Angeles into the music capital of the world and forever changed the way popular music is recorded, marketed, and consumed.

TECHNICIAN: AUTOMOTIVE HEATING & AIR CONDITIONING, Fifth Edition, is an integrated, two-book set that covers theory and hands-on content in separate Classroom and Shop Manuals. This innovative approach allows you to learn fundamental climate control theory, including basic physics related to heat transfer, before applying your knowledge through practical, hands-on shop work. Cross-references in each manual link related material, making it easy to connect book learning to lab and shop activity. Updated to reflect the latest trends, technology, and relevant NATEF standards, the Fifth Edition includes new material on next-generation refrigerants such as HFO-1234yf, as well as a bold, full-color design for enhanced reader appeal. This up-to-date, technically accurate guide is a valuable resource for students and professionals seeking ASE certification, or anyone interested in the principles, components, diagnosis, and repair of modern automotive heating and air conditioning systems. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Carbon War Nov 09 2021 Excessive burning of oil, gas, and coal is raising our planet's thermostat to unacceptable levels -- a problem which has already resulted in increased natural catastrophes: storms, floods, droughts, and fires. Yet big oil companies have repeatedly hijacked efforts to slow global carbon emissions. THE CARBON WAR is a major call-to-arms for the safety of our planet. Throughout the last decade, Jeremy Leggett, a distinguished scientist at Oxford University and former director for Greenpeace, has worked doggedly to alert human kind to the threat of ecological catastrophe. With the grace of a novelist and the precision of a scientist, Leggett recounts his maddening interactions with scientific councils, international governmental meetings, and business leaders. Still, despite the government's backpedaling on eco-promises, the

media's laziness, and fossil fuel company rhetoric, the transition to solar energy is coming, he argues. THE CARBON WAR is a riveting read and a critical contribution to the fight for sustainable energy.

Control Systems for Heating, Ventilating, and Air Conditioning Jul 17 2022 In the first edition of this text, Roger Haines devised a simple building-block method which enabled students to quickly learn about the operating principles and applications of all the basic devices and subsystems used in HVAC control. The fifth edition, completely revised by Douglas Hittle, takes into account the many technological changes that have arisen since then. Guidelines on combining control devices, circuits, computers, and HVAC equipment into efficient control systems that are accurate and energy-efficient are presented along with many charts and illustrations which provide data critical to the understanding and design of modern HVAC systems. These include: psychrometric charts and tables relating to optimal levels of temperature and humidity at specific altitudes; block/flow diagrams which show control component function; circuit diagrams of important electrical control system components; and schematic diagrams showing the configuration of various control systems.

Petie and the Fig Tree Oct 28 2020 This is the story of a dog named Petie, who loves treats and gets them often because he is such a good boy. In the summer, when his favorite fig tree produces fruit, Petie sits under the tree and eats the figs that have fallen to the ground. When winter arrives and the figs have stopped falling to the ground, acorns taste good too.

This Cold House Aug 18 2022 Does turning the thermostat down on a winter's night offset the costs of reheating the house in the morning? What will best prevent energy loss: new windows or insulation in the attic? Is heating oil cheaper than natural gas? Blending science with anecdote and example, Colin Smith answers questions like these, providing an insightful guide to creating an environmentally friendly home without sacrificing comfort. This Cold House helps homeowners identify heating and cooling priorities and choose the most appropriate methods, tools, and equipment. Basic equations allow you to estimate possible savings in annual heating and cooling bills and determine payback times for improvement projects. Practical and entertaining, This Cold House illuminates the concepts behind energy efficiency and translates them into ideas you can use, whether you live in a castle, igloo, or house. -- Dan Holohan

Retrofitting for Energy Conservation Jul 05 2021 Convert residences and light-commercial buildings from energy-wasters to energy-efficiency. New remodelling codes require improvements in energy efficiency. Home and building owners want to reduce their energy costs. And now with Retrofitting for Energy Conservation, construction and design professionals can discover the most up-to-date plans, methods, tools, and materials for improving energy conservation in existing structures. Almost 85% of energy-conserving projects are retrofits, according to the National Association of Homebuilders. Retrofitting for Energy Conservation gives you the tools you need to meet this demand with step-by-step help in retrofitting any residence or light commercial building for energy savings. From assessing the challenge and offering the client options through initial project design and final execution of the building plan, this book gives you solutions that meet and exceed code requirements.
