The Theory of Atomic Structure and Spectra May 17 2022 Both the interpretation of atomic spectra and the application of atomic spectroscopy to current problems in astrophysics, laser physics, and thermonuclear plasmas require a thorough knowledge of the Slater-Condon theory of atomic structure and spectra. This book gathers together aspects of the theory that are widely scattered in the literature and augments them to produce a coherent set of closed-form equations suitable both for computer calculations on cases of arbitrary complexity and for hand calculations for very simple cases.

Radar Technology for Coastal Areas and Open Sea Monitoring Jan 21 2020

Monitoring oceans and coastal areas has a fundamental social impact, and this scenario is made still more challenging with the present and future issues related to climate change. In this context, radar systems have gained increasing interest, since they are remote sensing devices capable of providing information about sea waves, currents, tides, bathymetry, and wind. Moreover, radar systems can be designed to perform both large-scale and small-scale monitoring, with different spatial and temporal resolutions, and can be installed on different observation platforms (ship-based, ground-based, airborne, satellite or drones). In this regard, this book aims at engendering a virtual forum for ocean radar researchers, where state-of-the-art methodologies and applications concerning ocean monitoring by means of radar technologies are reviewed and discussed.

Transdermal and Related Drug Delivery Systems Dec 20 2019

The Voyager Tarot Deck Nov 11 2021 The Voyager Tarot Deck is a revolutionary holistic symbology that combines ancient and modern symbols. It takes the old tarot and brings it into the 21st century through its visually stunning artwork. This deluxe slipcase set contains 78 full color oversized cards and a 98 page guidebook.

How to Create and Manage a Hedge Fund Mar 23 2020 Includes trading examples that

illustrate points about risk management and leverage. Presents all the practical knowledge necessary to run a leveraged investment company. Non-technical explanations brings an element of transparency to a part of the investment world often thought of as difficult to understand.

Silence within and beyond Pedagogical Settings Nov 30 2020 This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

THE ORGANIZATION AND ORDER OF BATTLE OF MILITARIES IN WORLD WAR II Mar 03 2021 There are numerous “order of battle” books on the market. So what makes this one so special? Why should one decide on this particular book? Most “order of battle” books usually deal only at the division and corps level of a country’s

army. Most higher commands are not covered. This book deals with all the branches of a country's military, giving a breakdown of all the major echelons of command, from theater down to brigade, under each component (army groups, armies, corps, divisions, and brigades), and the equivalent command structure for the other military branches are included. Second, it attempts to give an overall command structure of the country's military, showing the central headquarters command structure as well as the major components (army groups, armies, corps, etc.). Third, most "order of battle" books list the commander and their dates of tenure. This book includes those but also lists their next duty assignments or where they went after leaving the post. One can literally trace a general officer's career through the upper echelons of command, making this completely different from all the other books on order of battle in the market.

Video Nation Feb 26 2023 "All kinds of people are creating video for the web: bloggers, small business owners, web show hosts, and corporate marketing departments, to name just a few. How do the best videos get made and go viral? What secrets lie behind them? In Video Nation you'll learn everything you need to make great-looking video for YouTube, Facebook or your blog-from one of the top experts around!" -- Cover.

The Practice of Oil Painting and of Drawing as Associated with it Jul 07 2021

The Training of the Memory in Art: And the Education of the Artist Sep 28 2020

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Golden Dawn Magical Tarot Apr 16 2022 Since its inception over 100 years ago, the Hermetic Order of the Golden Dawn has continued to be the authority on the initiatory and meditative teachings of the Tarot. This Tarot incorporates all of the temple symbolism needed for use in the Golden Dawn rituals. Created at the behest of the renowned occultist and father of the modern Golden Dawn movement Israel Regardie,

this stunning deck masterfully blends traditional Tarot imagery with descriptions from the Golden Dawn initiation ceremonies. This is the first Tarot deck to incorporate the symbolism necessary for use in rituals. Written and created by internationally known adepts Chic Cicero and Sandra Tabatha Cicero, this is ideal for the beginning student but equally appealing to expert Tarot readers. The accompanying book provides an introduction to Cabalistic, Zodiacal and Alchemical symbolism creating a powerful tool for divination and spiritual growth. Complete with 256-page book and two versions of the Temperance card—as required in Golden Dawn rituals—this is the best Tarot available for students of the Golden Dawn and the Western magical tradition.

The Jungian Tarot and Its Archetypal Imagery Sep 09 2021 In Volume II, Dr. Wang explores the imagery of The Jungian Tarot from the standpoints of archetypal symbolism, history, and comparative religion.

Reclaiming Fair Use Jun 25 2020 In the increasingly complex and combative arena of copyright in the digital age, record companies sue college students over peer-to-peer music sharing, YouTube removes home movies because of a song playing in the background, and filmmakers are denied a distribution deal when some permissions “i” proves undottable. Patricia Aufderheide and Peter Jaszi chart a clear path through the confusion by urging a robust embrace of a principle long-embedded in copyright law,

but too often poorly understood—fair use. By challenging the widely held notion that current copyright law has become unworkable and obsolete in the era of digital technologies, *Reclaiming Fair Use* promises to reshape the debate in both scholarly circles and the creative community. This indispensable guide distills the authors' years of experience advising documentary filmmakers, English teachers, performing arts scholars, and other creative professionals into no-nonsense advice and practical examples for content producers. *Reclaiming Fair Use* begins by surveying the landscape of contemporary copyright law—and the dampening effect it can have on creativity—before laying out how the fair-use principle can be employed to avoid copyright violation. Finally, Aufderheide and Jaszi summarize their work with artists and professional groups to develop best practice documents for fair use and discuss fair use in an international context. Appendixes address common myths about fair use and provide a template for creating the reader's own best practices. *Reclaiming Fair Use* will be essential reading for anyone concerned with the law, creativity, and the ever-broadening realm of new media.

Indian Trade Journal Feb 14 2022

Film on Video Jul 19 2022 *Film on Video: A Practical Guide to Making Video Look*

like Film is an accessible guide to making video captured on a camcorder, DSLR camera, smartphone, action camera or cinema camera look like it was shot on motion-picture celluloid film. Chapter by chapter, Jonathan Kemp introduces the reader to a key characteristic of celluloid film, explains the historical and practical reasons why it exists, before providing a simplified method for best replicating that characteristic on a digital camera. The book includes various practical exercises throughout that are designed to underline the takeaway principles of each chapter and features case studies on specific cameras including the Sony NX5 Camcorder, Canon 5D Mk IV, Canon 4000D, iPhone X, GoPro Hero 6, Blackmagic URSA Mini Pro 4.6K and Canon C200. Ideal for students studying film and media production and filmmaking newcomers who want to get up to speed quickly, this is an indispensable guide to how the numerous settings on a digital camera can be used to create footage that more closely resembles the film 'look'.

Facial-Oral Tract Therapy (F.O.T.T.) Feb 20 2020 The book offers a comprehensive approach to the assessment and treatment of disturbances in facial expression, oral movement, swallowing, breathing, voice and speech production caused by developmental and acquired neurological conditions. The principles outlined are used in patients with different etiologies (e.g. stroke, tumors, traumas). F.O.T. T., developed

by Kay Coombes, is a hands-on approach based on an understanding of neurological functions and the way we learn from experience. The approach aims to give the patient experience of physiological posture and movement using facial-oral functions in normal activities of daily living (ADL). Rather than mere “exercises”, F.O.T.T involves meaningful activities aiming to promote participation, according to ICF criteria. Four main areas are covered: nutrition, oral hygiene, nonverbal communication and speech. Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered. Separate chapters discuss tracheostomy management and the training of the carers involved, including relatives. The chapter authors are experienced specialists (physio-, occupational- and speech-language therapists and physicians), whose contributions aim to provide interdisciplinary perspectives and translate latest research into clinical practice.

Nuclear Science Abstracts Dec 24 2022

Professional Results With Canon Vixia Camcorders Nov 23 2022 We're in the midst of a digital media-making revolution--and the Canon© Vixia© G10 and XA10 camcorders are at the forefront. Blurring the line between 'prosumer' and professional, the G10 and XA10 are sharper, cleaner, more compact, more portable, and boast more professional features than any prior palm-sized camcorder in their price range. This

book is a comprehensive field guide to the concepts, strategies, equipment, and procedures for achieving the best results possible with Canon's top-of-the-line palm-sized camcorders. The guide focuses on the specific features of the Canon Vixia HF G10 and XA10, but users of other camcorders in the Vixia series, the Legria series (shooting PAL), and other camcorders will find a wealth of relevant information. With a high-definition palm-sized camcorder such as the Canon Vixia G10 or XA10, your potential is limited only by your imagination and your resourcefulness.

New Frontiers in Operational Oceanography May 25 2020 The implementation of operational oceanography in the past 15 years has provided many societal benefits and has led to many countries adopting a formal roadmap for providing ocean forecasts. Continuing the tradition of two very successful international summer schools held in France in 2004 (Chassignet and Verron, 2006) and in Australia in 2010 (Schiller and Brassington, 2011), a third international school that focused on frontier research in operational oceanography was held in Majorca in 2017. In the coming years, graduate students and young scientists will be challenged by many new observations (SWOT, Sentinel, AUVs, floats, etc.), complex high resolution numerical models and data assimilation (high resolution, predictability, uncertainty, changing computing platforms, etc.), and the need to work on many scales (open ocean-shelf interactions,

coupled ocean-ice-atmosphere, biogeochemistry, etc.). The latter school brought together senior experts and young researchers (pre- and post-doctorate) from across the world and exposed them to the latest research in oceanography, specifically how it will impact operational oceanography. This book is a compilation of the lectures presented at the school and presents a summary of the current state-of-the-art in operational oceanography research. About the Editors: Eric P. Chassignet is a professor of Physical Oceanography in the Department of Earth, Ocean and Atmospheric Science and director of the Center for Ocean-Atmospheric Prediction Studies at Florida State University (Tallahassee, FL, USA). Ananda Pascual is a research scientist at the Instituto Mediterráneo de Estudios Avanzados, IMEDEA(CSIC-UIB) in Esporles (Majorca, Spain). Joaquin Tintore is professor of Physical Oceanography at IMEDEA and director of SOCIB (Sistema d'Observacio iPredictio Coastaner de les Iles Balears) in Palma (Majorca, Spain). Jacques Verron is a senior research scientist emeritus at the Institut des Geosciences de l'Environnement (IGE) (Grenoble, France). About GODAE OceanView: GODAE OceanView provides coordination and leadership in consolidating and improving global and regional ocean analysis and forecasting systems on an international level. It encourages international collaboration to address the scientific and technical challenges associated with operational oceanography. It also

fosters research that will lead to the enhancement of existing systems and the development of next generation of ocean prediction systems.

The Rise of Global Health Mar 15 2022 Chronicles the expanding global effort to confront public health challenges. Since the year 2000, unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments, multilateral organizations, and civil society groups. This vast global movement is one of the most remarkable political phenomena of twenty-first-century international relations—but is it working? In *The Rise of Global Health*, Joshua K. Leon argues against the conventional wisdom, which argues that collective action on development issues—including controversial increases in foreign aid—is too inherently inefficient to succeed. Leon shows that public action on a global level can successfully pursue health equality. Often at the behest of grassroots activists, these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health. Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming the Global South, we learn something surprising about global health governance—it is evolving in ways more efficient than we think. Joshua K. Leon is Assistant Professor of Political Science and International Studies at Iona College.

Pin Me Up Proper Aug 28 2020 Shackles, blindfolds and ropes, oh my...she's not in Kansas anymore. Bored with the men in her life, actress Janie Monroe is looking for something different. On a whim, she decides to seduce her cameraman, a guy who comes off as a nerdy video gamer. After enticing him at a pin-up photo shoot, she learns that he does indeed like to play, but instead of a game console and controller, his toys are shackles, blindfolds and ropes. Janie soon finds herself immersed in a world of dark passions where her boundaries are challenged and pleasure beyond her wildest imagination is the prize.

Trauma and Transcendence Oct 10 2021 Trauma theory has become a burgeoning site of research in recent decades, often demanding interdisciplinary reflections on trauma as a phenomenon that defies disciplinary ownership. While this research has always been challenged by the temporal, affective, and corporeal dimensions of trauma itself, trauma theory now faces theoretical and methodological obstacles given its growing interdisciplinarity. *Trauma and Transcendence* gathers scholars in philosophy, theology, psychoanalysis, and social theory to engage the limits and prospects of trauma's transcendence. This volume draws attention to the increasing challenge of deciding whether trauma's unassimilable quality can be wielded as a defense of traumatic experience against reductionism, or whether it succumbs to a form of

obscurantism. Contributors: Eric Boynton, Peter Capretto, Tina Chanter, Vincenzo Di Nicola, Ronald Eyerman, Donna Orange, Shelly Rambo, Mary-Jane Rubenstein, Hilary Jerome Scarsella, Eric Severson, Marcia Mount Shoop, Robert D. Stolorow, George Yancy.

Management of Motor Speech Disorders in Children and Adults Oct 18 2019

MANAGEMENT OF MOTOR SPEECH Disorders in Children and Adults emphasizes how to make clinical decisions based on the underlying neuropathology and severity OF the disorder. The third edition OF this must-have book covers basic neurologic and general information associated with the various diseases, disorders, and syndromes that cause MOTOR SPEECH disorders, and it will serve as an excellent reference source for those practicing in a medical setting. This text contains several noteworthy modifications. 1. DVD - contains 26 video segments showing children and adults with dysarthria and apraxia OF SPEECH engaged in a range OF speaking tasks.

Intelligibility, aerodynamic, and endoscopic assessments OF SPEECH performance are illustrated, as are brief demonstrations and interviews with a prosthodontist and a SPEECH-language pathologist involved in respiratory, palatal lift, and nasal obturation

interventions. 2. ANCDs - content from the eight recently published practice guidelines developed by the Academy OF Neurologic Communication Disorders and Sciences (ANCDs) for the MOTOR SPEECH disorders field are integrated into this edition. 3. ICF - terminology and concepts OF the International Classification OF Function, Disability and Health (ICF) model are integrated through the book 4. New Chapter 13 - lists conditions associated with MOTOR SPEECH disorders and summarizes the medical aspects and SPEECH characteristics OF various conditions. Complete Kit Includes: Textbook and Video Segments DVD. c2010

The Jungian Tarot Deck Jun 06 2021 Dr. Robert Wang developed The Jungian Tarot as a "visual gateway into the complexities of Jungian psychology" to aid in the process of active imagination proposed by Carl Jung. The 22 Major Arcana represent Jungian archetypes of the collective unconscious. The figures are visually presented with archways and circular mandalas, which aid in meditation. The court cards depict family roles: father, mother, daughter and son. The deck is a companion to the Jungian Tarot Trilogy by Robert Wang.

Presbyterian Women in America Aug 08 2021 This second edition traces women's affiliation with Presbyterianism in the United States for more than two centuries--from 1789 when women were silent in the church to the present, where women serve equally

in the pulpits, sessions, and courts of the church.

Memory Drawing Feb 02 2021 From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved. What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. *Memory Drawing: Perceptual Training and Recall* exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize essentials, and even enhance your imagination.

Gels Handbook, Four-Volume Set Jul 27 2020 This major reference work, covering the important materials science area of gels, is a translation of a Japanese handbook.

The three-volume set is organized to cover the following: fundamentals, functions, and environmental issues. Gels Handbook also contains an appendix, complete references, and data on gel compounds. Recently, polymer gels have attracted many scientific researchers, medical doctors, and pharmaceutical, chemical, and agricultural engineers to the rapidly growing field. Gels are considered to be one of the most promising materials in the 21st Century. They are unique in that they are soft, gentle, and can sense and accommodate environmental changes. Because of these unique characteristics gels have a huge potential in technological and medical applications. They are irreplaceable in the separation of molecules, the release of drugs, artificial skins and organs, sensors, actuators, chemical memories, and many other applications. The 21st century is also said to be the century of biotechnology, where two kinds of biopolymers play crucial roles: DNA as a bearer of genetic information and proteins as molecular machines. In spite of the dramatic progress in molecular biology and the Human Genome project, the basic principles behind the function and design of such polymeric machines are in the black box. Science and technologies that will emerge from those of polymer gels will shed light on such principles. Some researchers have already developed prototypes of artificial glands (pancreas), artificial muscles and actuators, and chemical sensors and molecular recovery systems using polymer gels.

The Gels Handbook is an invaluable source of information on this rapidly growing field. It covers the entire area from the scientific basics to the applications of the materials. The authors are among the leading researchers, doctors, engineers, and patent officers in Japan. This book can be used as a textbook or an encyclopedia and is a must for those involved in gel research or applications. Key Features *

Comprehensive coverage of a popular topic in materials science * Is the first english-language gels handbook * Includes numerous figures, tables, and photos

Video Nation Aug 20 2022 A DIY guide to planning, shooting, and sharing great video from USA Today Talking Tech host All kinds of people are creating video for the web: bloggers, small business owners, web show hosts, and corporate marketing departments, to name just a few. How do the best videos get made and go viral? What secrets lie behind them? In Video Nation you'll learn everything you need to make great-looking video for YouTube, Facebook or your blog—from one of the top experts around! Jefferson Graham, host of USA Today's Talking Tech and Talking Your Tech, takes you skillfully through the art of video creation and distribution. And you'll have a lot of fun along the way. You'll learn what equipment you need to get started--from bare bones to wish list state-of-the-art great. You'll get the skinny on sound and lighting. You'll learn how to properly set up for and shoot an interview. You'll even

get to take your video to the next level by using multiple cameras as they do on TV. You'll also find 30 downloadable video lessons so you see the concepts from the book in action, including how to make a great video on an iPhone, lighting techniques, simple editing techniques, and much more. To access the videos go to www.peachpit.com/videonation and click "register your product." Here are just a few things you'll find in Video Nation: tips on developing fresh new ways to promote your business or yourself a guide to the tools available for a "one-man band" production, including advice on shooting with DSLRs, point-and-shoot cameras, and iPhones best techniques for setting up, preparing questions for, and interviewing a subject from a video producer who has interviewed everyone from comedian Jeff Dunham and the late Steve Jobs to Kermit the Frog detailed descriptions of working with sound and lighting for a variety of indoor and outdoor scenarios step-by-step coverage of using editing programs such as Apple iMovie, Adobe Premiere Elements, and Final Cut Pro X a guide to uploading your video to YouTube, create a channel, market your video with Twitter and Facebook, and earn thousands of dollars a year from your efforts via the YouTube Partner program and much more!

Coastal Altimetry Jun 18 2022 The book describes experience in application of coastal altimetry to different parts of the World Ocean. It presents the principal problems

related to the altimetry derived products in coastal regions of the ocean and ways of their improvement. This publication is based on numerous satellite and observational data collected and analyzed by the authors of the various chapters in the framework of a set of international projects, performed in UK, France, Italy, Denmark, Russia, USA, Mexico and India. The book will contribute both to the ongoing International Altimeter Service effort and to the building of a sustained coastal observing system in the perspective of GMES (Global Monitoring for Environment and Security) and GEOSS (Global Earth Observation System of Systems) initiatives. This book is aimed at specialists concerned with research in the various fields of satellite altimetry, remote sensing, and coastal physical oceanography. The book will be also interesting for lecturers, students and post-graduate students.

Coastal Ocean Observing Systems Apr 04 2021 Coastal Ocean Observing Systems provides state-of-the-art scientific and technological knowledge in coastal ocean observing systems, along with guidance on establishing, restructuring, and improving similar systems. The book is intended to help oceanographers understand, identify, and recognize how oceanographic research feeds into the various designs of ocean observing systems. In addition, readers will learn how ocean observing systems are defined and how each system operates in relation to its geographical, environmental,

and political region. The book provides further insights into all of these problem areas, offering lessons learned and results from the types of research sponsored and utilized by ocean observing systems and the types of research design and experiments conducted by professionals specializing in ocean research and affiliated with observing systems. Includes international contributions from individuals working in academia, management, and industry Showcases the application of science and technology in coastal observing systems Highlights lessons learned on partnerships, governance structure, data management, and stakeholder relationships required for successful implementation Provides insight into how ocean research transfers to application and societal benefit

Solar Applications Seminar Jan 25 2023

The Essential Jesus Dec 12 2021 After his definitive *The Historical Jesus*, John Dominic Crossan delivered *Jesus: A Revolutionary Biography*--a popularized,

bestselling account of what we can know about the life of Jesus. Here he offers the core of his life's work--a concise and astonishing presentation of the authentic teachings and earliest images of the revolutionary Galilean sage. Crossan's fresh translations of Jesus' sayings show Jesus to be a teacher whose radical message that all are equal before God is as timely today as it was two thousand years ago. This picture is dramatically confirmed by the preConstantinian, Christian renderings of Jesus, which show that he was remembered by the first Christians not as God but as a revolutionary healer and leader.

Methods in Observational Epidemiology Apr 23 2020 This is the second edition of the first book to provide a complete picture of the design, conduct and analysis of observational studies, the most common type of epidemiologic study. Stressing sample size estimation, sampling, and measurement error, the authors cover the full scope of observational studies, describing cohort studies, case-control studies, cross-sectional studies, and epidemic investigation. The use of statistical procedures is described in easy-to-understand terms.

The Real Toy Story Oct 22 2022 The American toy business is massive, world dominating, cutthroat, exciting, and increasingly willing to sacrifice our kids in its frantic rush for profit. And yet, for all its rapaciousness, the industry is in the business

of delighting and fascinating our children. Toys are one of the most emotive subjects in the world. We all remember our own toys; we care desperately about those we choose for our kids, knowing these objects help shape children's lives. They are also a constantly newsworthy item: every Christmas, which toys are hot -- and the scramble by parents to grab them before the stores are empty -- is front-page and TV bulletin news. The Real Toy Story tells the tales of these toys and of the vast, world-dominating \$22 billion American industry that creates them. The rewards for success are enormous: a top toy can earn billions -- H. Ty Warner shot into Forbes's World's Richest People list with his creation of Beanie Babies. The price of failure is just as huge -- the battlefield is littered with the corpses of once-successful toy companies whose multimillion-dollar gambles did not pay off. It is a world of contrasts. The Real Toy Story looks at both sides: at Slinky, Elmo, Barbie, Transformers, and their creators, but also at the dark side of an industry that leads the way in cold-blooded marketing targeted at children. Parents will want to learn about how this seemingly benign industry exploits, sometimes surreptitiously, the many new media: cable television, the internet, CD-ROMs, sometimes even invading the playgrounds to peddle their wares to unsuspecting young people. Perhaps more disturbingly, this hard-hitting book examines the vast gap between the cuddly image of toys and how almost all toys

destined for America are actually produced in China under sweatshop conditions. Today the toy industry is in the midst of rapid change. Tapping into the concern millions of adults have about the toys they choose for the children in their lives, this riveting exposé is essential reading for everyone who cares about kids.
