India as an Organization: Volume Two Dec 27 2020 This book, the second of two volumes, continues the authors' ground-breaking re-examination of India's history and political economy. This volume describes the economic fortunes of India in the second half of the 20th century. Beginning with the reconstruction of the Planning Commission and India's hybrid model of economic planning, the authors describe the multiple shocks weathered by the system before being replaced with a fully free market model after the collapse of the Soviet Union. Chapters consider the stresses placed on India's organisation by the shocks of the twentieth century, from its experiments with a socialist economy to its embrace of the Washington consensus in the 1980s. The impact of the invasion of China in 1962 and India's struggle to find its feet post-partition are also given detailed analysis. The book's unique perspective helps to shed light, for the first time, on how India's organisational structure negotiated the country's immense historical and cultural inheritance with the stresses of a twentieth century nation state.

The Northeastern Reporter Feb 26 2021 Includes the decisions of the Supreme Courts of Massachusetts, Ohio, Indiana, and Illinois, and Court of Appeals of New York; May/July 1891-Mar./Apr. 1936, Appellate Court of Indiana; Dec. 1926/Feb. 1927-Mar./Apr. 1936, Courts of Appeals of Ohio.

Untouchability in Rural India Apr 18 2020 This important book presents systematic evidence of the incidence and extent of the practice of untouchability in contemporary India. It is based on the results of a very large survey covering 560 villages in 11 states, which found that untouchability continues to be widely prevalent and is practiced in one form or another in almost 80 percent of the villages. While the evidence presented in this book suggests that the more blatant and extreme forms of untouchability appear to have declined, discrimination continues and is most prevalent in the religious and personal spheres. The authors show that the notion of untouchability continues to pervade the public sphere, including in a host of state institutions and the interactions that occur within them.

Industrial Aviation Management Apr 11 2022 This book outlines the structure and activities of companies in the European aviation industry. The focus is on the design, production and maintenance of components, assemblies, engines and the aircraft itself. In contrast to other industries, the technical aviation industry is subject to many specifics, since its activities are highly regulated by the European Aviation Safety Agency (EASA), the National Aviation Authorities and by the aviation industry standard EN 9100. These regulations can influence the companies' organization, personnel qualification, quality management systems, as well as the provision of products and services. This book gives the reader a deeper, up-to-date insight into today's quality and safety requirements for the modern aviation industry. Aviation-specific interfaces and procedures are looked at from both the aviation legislation standpoint as well as from a practical operational perspective.
