**American Cars, 1960-1972** Sep 09 2021 The automotive industry underwent great change in the 1960s and the early 1970s. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

*Chevelle Restoration and Authenticity Guide 1970-1972* Jun 18 2022 The high-water mark of the muscle car era is usually credited as 1970, and for good reason; Chevrolet was now stuffing high-powered 454 engines into Chevelles. Adding a larger displacement above the still-available 396 (402) offered buyers the option to order the most powerful production car of that era. The 1970-1972 Chevelles remain the most collectible of the model to this day. Author and historian Dale McIntosh pairs with restoration expert Rick Nelson to provide this bible of authenticity on the legendary 1970, 1971, and 1972 Chevelle models. Everything about restoring your Chevelle back to bone-stock is covered meticulously, including step-by-step instructions for chassis and interior restoration. Understanding date variances on parts applicable to the build date of your Chevelle is vital to a factory-correct restoration, and including them in this book provides a depth of coverage on these cars that is unequaled. Restoring a 1970-1972 Chevelle back to concours correct takes a certain amount of expertise. Thankfully, Rick and Dale have done a lot of the heavy lifting on the research side. With this authenticity guide, you can be confident that you have all the correct components and options accurately and expertly represented for your stock restoration. These fine details put the Chevelle Restoration and Authenticity Guide 1970-1972 a cut above the rest.

*1969 Plymouth Road Runner* Oct 22 2022 The late 1960s was an interesting time in the automotive world. Muscle cars, as we now know them, were well established, with all manufacturers joining the horsepower

race. You could walk into the showroom for any brand from any manufacturer and find a variety of performance models. Competition being what it is, the manufacturers were looking for ways other than winning races to lure buyers into the showrooms and entice them to buy their products. Some tried to accomplish this with fancy marketing schemes and graphic paint packages and decals, and for the first time, some tried to win over buyers with price. Volume No. 5 of CarTech's In Detail series covers the 1969 Plymouth Road Runner. It was an interesting marriage of a car that attempted to appeal to potential buyers with a low cost, light weight, and potent bare-bones package. It also added a brilliant marketing strategy of partnering with a famous studio and a popular cartoon character. The end result was a wildly popular, big-block, affordable muscle car with great graphics and a cool beep-beep horn. The public loved it. All In Detail Series books include an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, and an in-depth study of all hardware and available options, as well as an examination of where the car is on the market today. Also included is an appendix of paint and option codes, VIN and build-tag decoders, as well as production numbers.
