All of our practice questions are just like those

you'll see on the actual exam, and we explain how to answer every question. Cracking the AP European History Exam has been fully updated for the 2009 test. A groundbreaking history of the Big Questions that dominated the nineteenth century In the early nineteenth century, a new age began: the age of questions. In the Eastern and Belgian questions, as much as in the slavery, worker, social, woman, and Jewish questions, contemporaries saw not interrogatives to be answered but problems to be solved. Alexis de Tocqueville, Victor Hugo, Karl Marx, Frederick Douglass, Fyodor Dostoevsky, Rosa Luxemburg, and Adolf Hitler were among the many who put their pens to the task. The Age of Questions asks how the question form arose, what trajectory it followed, and why it provoked such feverish excitement for over a century. Was there a family resemblance between questions? Have they disappeared, or are they on the rise again in our time? In this pioneering book, Holly Case undertakes a stunningly original analysis, presenting, chapter by chapter, seven distinct arguments and frameworks for understanding the age. She considers whether it was marked by a progressive quest for emancipation (of women, slaves, Jews, laborers, and others); a steady, inexorable march toward genocide and the "Final Solution"; or a movement toward federation and the dissolution of boundaries. Or was it simply a farce, a false frenzy dreamed up by publicists eager to sell subscriptions? As the arguments clash, patterns emerge and sharpen until the age reveals its full and peculiar nature. Turning convention on its head with meticulous and astonishingly broad scholarship, The Age of Questions illuminates how patterns of thinking move history. Mastering Modern European History traces the development of Europe from the French Revolution to the present day. Political, diplomatic and socio-economic strands are woven together and supported by a wide range of pictures, maps, graphs and questions. Documentary extracts are included throughout to encourage the reader to question the nature and value of various types of historical evidence. The second edition brings us fully up to the present day. Chapters on European Decolonisation, Communist Europe 1985-9, and European Unity and Discord have been added, and others have been substantially rewritten. An even wider range of illustrations and documentary source questions are included. The book is presented in a readable and well ordered format and is an ideal reference text for students. 500 AP style questions with detailed answer explanations to prepare you for what you'll see on test day From the Renaissance and the Rise of Sovereignty to Nationalism, the Cold War and beyond—there is a lot of subject matter to know if you want to succeed on your AP European History exam. Excerpt from Our European Ancestors: An Introduction to United States History Recent years have brought the United States into a wilderness of problems. Our world is a very different place from the world of a century ago. Looking back not so very many decades, history was an outline of wars and a series of statements more or less partisan, for whose modification there was little demand. History to-day is a study of motives and men, of causes and effects. Geography used to be in great degree a matter of unknown quantities. A large area of our own country was contentedly marked on the map "Great American Desert." People made their wills before they ventured to cross the ocean.

Any mediocre book of wanderings in Europe was read almost as eagerly as one of travels on a distant planet might have been. To-day oceans have narrowed; time and distance have been almost annihilated. In the earlier days science moved slowly. A scientific discovery was the property of a few scholars. Simplified lectures gradually brought it to the knowledge of the people. Inventions appeared one at a time. A single machine overturned the customs of a country. To-day inventions come by handfuls; knowledge is thrust upon us. The boy in the street knows more of electricity than did his learned grandfather. Science has become spectacular; but we are well used to marvels. We are blinded by excess of light. A scientific discovery is described in the Sunday papers. Monday morning it is transmuted into some simple household convenience, perhaps even a toy for children. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
