Imagine waking up to the gentle noises of the city, and moving through your day with complete confidence that you will get where you need to go quickly and efficiently. Soft City is about ease and comfort, where density has a human dimension, adapting to our ever-changing needs, nurturing relationships, and accommodating the pleasures of everyday life. How do we move from the current reality in most cities—separated uses and lengthy commutes in single-occupancy vehicles that drain human, environmental, and community resources—to support a soft city approach? In Soft City David Sim, partner and creative director at Gehl, shows how this is possible, presenting ideas and graphic examples from around the globe. He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale, which he presents through a series of observations of older and newer places, and a range of simple built phenomena, some traditional and some totally new inventions. Sim shows that increasing density is not enough. The soft city must consider the organization and layout of the built environment for more fluid movement and comfort, a diversity of building types, and thoughtful design to ensure a sustainable urban environment and society. Soft City begins with the big ideas of happiness and quality of life, and then shows how they are tied to the way we live. The heart of the book is highly visual and shows the building blocks for neighborhoods: building types and their organization and orientation; how we can get along as we get around a city; and living with the weather. As every citizen deals with the reality of a changing climate, Soft City explores how the built environment can adapt and respond. Soft City offers inspiration, ideas, and guidance for anyone interested in city building. Sim shows how to make any city more efficient, more livable, and better connected to the environment. Munde clears the air in her new handbook, providing basic explanations and rationales for the most common and practical applications of HR management in colleges, universities and academic libraries. This ground-breaking book aims to take a new and innovative view on how disability and architecture might be connected. Rather than putting disability at the end of the design process, centred mainly on compliance, it sees disability – and ability – as creative starting points for the whole design process. It asks the intriguing question: can working from dis/ability actually generate an alternative kind of architectural avant-garde? To do this, Doing Disability Differently: explores how thinking about dis/ability opens up to critical and creative investigation our everyday social attitudes and practices about people, objects and space argues that design can help resist and transform underlying and unnoticed inequalities introduces architects to the emerging and important field of disability studies and considers what different kinds of design thinking and doing this can enable asks how designing for everyday life – in all its diversity – can be better embedded within contemporary architecture as a discipline offers examples of what doing disability differently can mean for architectural theory, education and professional practice aims to embed into architectural practice, attitudes and approaches that creatively and constructively refuse to perpetuate body 'norms' or the resulting inequalities in access to, and support from, built space. Ultimately, this book suggests that re-addressing architecture and disability involves nothing less than re-thinking how to design for the everyday occupation of space more generally. What exactly is inside a laptop, a golf ball, a vacuum cleaner, or a novelty singing fish toy? The insides of these and dozens of other objects are revealed in this photographic exploration of the stuff all around us, exposed and explained. With the help of a high-pressure waterjet cutter able to slice through 4 inches of steel plate, designer and fabricator Mike Warren (creator of the popular Cut in Half YouTube channel) cuts into everything from boom boxes to boxing gloves, oil filters to seashells, describing and demystifying the inner workings and materials of each. With gorgeously detailed photography, Cut in Half is a fascinating and accessible popular science look at the extraordinary in the everyday. The definitive guide for people wanting to make a positive difference in the world. "Grow a garden inside! Houseplants bring life and color to any room, and with the right care you can successfully cultivate everything from succulents and bonsai to foliage, flowers, and fruit. Here is everything you always wanted to know about houseplants packed into one easy-to-use volume. Horticulturist David Squire provides simple, step-by-step instructions on choosing the right plants and helping them thrive, with tips on propagation, repotting, grooming, and pest control. The heart of the book is a well-illustrated plant directory that offers a fresh perspective on more than 300 popular varieties, arranged by houseplant families. Each entry features a color photograph for identification; the plant's botanical and common names; its height, spread, optimum climate and light; and propagation tips. Other essential information on feeding, watering, and grooming is covered in a handy quick reference icon panel. Inside The Houseplant Handbook: Complete guide to caring for houseplants, written by an expert horticulturist. User-friendly reference, rich in practical advice on every stage of indoor gardening. Explains how to achieve lasting success with flowering and fruiting plants, cacti, succulents, palms, cycads, bulbs, bromeliads, and ferns. " "Daily Planet: The Ultimate Book of Everyday Science" captures everything that has made the enormously popular TV show "Daily Planet" great for the past 15 years: unusual, innovative people; technologies and inventions that you couldn't have imagined before you saw them; the extravagance of nature; the incomprehensibility of the universe; and even glimpses of the future. Full-colour throughout, the book combines vivid images with the actual thoughts and words of scientists, adventurers, and inventors. The diversity of subjects is striking, but while

some stories stand alone, most have subplots and spinoffs, and the reader is carried along from one to the other, sometimes in totally unpredictable ways. For instance, Jay Ingram seamlessly connects the dots between climate change, revealed mummies, ancient Egypt, and homebuilt pyramids, both stationary and mobile. The book moves from the serious to the satirical, from planetary crises to Mars missions, from bartending robots to dolphins with prosthetic tails. In what other single volume could you read about robot female bower birds driving (real) males crazy or a one-man reconstruction of Stonehenge?

"Daily Planet: The Ultimate Book of Everyday Science" is all about ingenuity and the desire to know. If a zombie enthusiast isn't ready to plow through a lot of reading and heavy study, this book offers a quick read. Even the smartest among us can feel inept as we fail to figure out which light switch or oven burner to turn on, or whether to push, pull, or slide a door. The fault, argues this ingenious—even liberating—book, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from ambiguous and hidden controls to arbitrary relationships between controls and functions, coupled with a lack of feedback or other assistance and unreasonable demands on memorization. The Design of Everyday Things shows that good, usable design is possible. The rules are simple: make things visible, exploit natural relationships that couple function and control, and make intelligent use of constraints. The goal: guide the user effortlessly to the right action on the right control at the right time. In this entertaining and insightful analysis, cognitive scientist Don Norman hails excellence of design as the most important key to regaining the competitive edge in influencing consumer behavior. Now fully expanded and updated, with a new introduction by the author, The Design of Everyday Things is a powerful primer on how—and why—some products satisfy customers while others only frustrate them. A science book of questions and explanations about the sky and the outdoors, water, fire and heat, your body, food you eat, things you use, machines that work for you. Through this delightful, heartfelt collection of prayers for kids, children learn how easy it is to pray every day. Loyola Kids Book of Everyday Prayers by Catherine Odell and Margaret Savitskas is thematically divided into nine chapters, offering prayers for all occasions and seasons of the year. From the Hail Mary to the Breastplate of St. Patrick to a little boy's prayer for his new baby sister, these prayers for kids will help children grow in their faith. Ages 8 to 12. Bringing together leading authorities, this unique handbook reviews the breadth of current approaches for studying how people think, feel, and behave in everyday environments, rather than in the laboratory. The volume thoroughly describes experience sampling methods, diary methods, physiological measures, and other self-report and non-self-report tools that allow for repeated, real-time measurement in natural settings. Practical guidance is provided to help the reader design a high-quality study, select and implement appropriate methods, and analyze the resulting data using cutting-edge statistical techniques. Applications across a wide range of psychological subfields and research areas are discussed in detail. This irresistible list book from National Geographic provides lighthearted quick hits of inspiration for those of us who feel overwhelmed--which is to say, all of us. Musings, activity suggestions, and illuminating quotes are paired with whimsical art on themes such as living in the moment, achieving balance, relieving stress, developing patience, and appreciating the world around us. "Slow living" sidebars, such as "Foods to Cook Slowly" and "Things to Do the Old-Fashioned Way," are interspersed throughout the book. "Includes 109 essential oils & more than 450 remedies and uses"--Cover. See Play Do is a children's activity annual which encourages open-ended creative play with 3- to 10-year-olds. It is a collaboration between creatives of all ages; from chefs to scientists to 5-year-olds, and is filled with fun ideas to make glitter playdough and dress a dinosaur in your own clothes. See Play Do was conceived by designer Louise Cuckow after seeing her young daughter frustrated that her finished artwork didn't look like the picture. There is no one picture to follow in See Play Do; all creations can be celebrated. "In Everyday Life Joseph A. Amato offers a panoramic account of the evolution of our daily existence and reflects on the complex and changing textures of everyday life. Beginning with societies of scarcity and relative lack of change and ending with our own twenty-first-century lives, he ranges widely through topics as varied as dirt and muck, walking and the charm of spices, and through time from early agriculture to mechanization and the modern urban existence. Amato argues that what seems to be ordinary is in fact extraordinary, and shows how life, even in the very recent past, differed from life in our present-day societies of abundance and of remorseless change. The result is a challenging and thought-provoking introduction to change and continuity in daily

life"--Publisher's description. 'OMG! This book is SO me! The tips and stories shared by Ed, Mark and Nicky will help you live a life filled with more fun, joy and enthusiasm!' "IT'S AS IF WE'VE BECOME AMERICA'S GRANDMAS." That's how Sadie Delany described the outpouring of affection and admiration that followed the success of Having Our Say, the best-selling memoir she and her sister published in 1993. Now they offer their fans a treasury of grandmotherly good sense: memorable aphorisms, engaging anecdotes, rules for managing money, practical advice on staying active in old age, and some favorite recipes, too. It's a book filled with the secrets of living well, from two women who did it for more than a century. THE NEW YORK TIMES BESTSELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR by Booklist • Kirkus Celebrate all the ways love makes us who we are with the romance that Entertainment Weekly calls "wise, wildly unique"--from the bestselling co-author of Nick and Norah's Infinite Playlist and Will Grayson, Will Grayson--about a teen who wakes up every morning in a different body, living a different life. Now a major motion picture! Every day a different body. Every day a different life. Every day in love with the same girl. There's never any warning about where it will be or who it will be. A has made peace with that, even established guidelines by which to live: Never get too attached. Avoid being noticed. Do not interfere. It's all fine until the morning that A wakes up in the body of Justin and meets Justin's girlfriend, Rhiannon. From that moment, the rules by which A has been living no longer apply. Because finally A has found someone he wants to be with—day in, day out, day after day. With his new novel, David Levithan, bestselling co-author of Will Grayson, Will Grayson, and Nick and Norah's Infinite Playlist, has pushed himself to new creative heights. He has written a captivating story that will fascinate readers as they begin to comprehend the complexities of life and love in A's world, as A and Rhiannon seek to discover if you can truly love someone who is destined to change every day. "A story that is always alluring, oftentimes humorous and much like love itself—splendorous." —Los Angeles Times A practical, easy-to-read introduction to the ideas and strategies that can be implemented within the classroom to help autistic children achieve their full potential. Invites young readers to find the labeled items around the edges and other hidden articles in the intricate model scenes. Warm, feisty, and intelligent, the Delany sisters speak their mind in a book that is at once a vital historical record and a moving portrait of two remarkable women who continued to love, laugh, and embrace life after over a hundred years of living side by side. Their sharp memories show us the post-Reconstruction South and Booker T. Washington, Harlem's Golden Age and Langston Hughes, W. E. B. Du Bois, and Paul Robeson. Bessie breaks barriers to become a dentist; Sadie quietly integrates the New York City system as a high school teacher. Their extraordinary story makes an important contribution to our nation's heritage—and an indelible impression on our lives. This is the perfect introduction for those who have a lingering fear of math. If you think that math is difficult, confusing, dull or just plain scary, then The Math Handbook is your ideal companion. Covering all the basics including fractions, equations, primes, squares and square roots, geometry and fractals, Dr. Richard Elwes will lead you gently towards a greater understanding of this fascinating subject. Even apparently daunting concepts are explained simply, with the assistance of useful diagrams, and with a refreshing lack of jargon. So whether you're an adult or a student, whether you like Sudoku but hate doing sums, or whether you've always been daunted by numbers at work, school or in everyday life, you won't find a better way of overcoming your nervousness about numbers and learning to enjoy making the most of mathematics. Striving for personal happiness, however one defines it, is a goal that many people have in common, and this book teaches readers how to find that joy using modern and spiritual means. Happiness seekers will learn how karma blocks personal happiness and how to dissolve it on a moment-by-moment basis, learn how to activate their personal GPS system to guide them out of negative reactions and old patterns, and learn simple techniques to transform everyday, stressful situations into positive energy and self-awareness. Written for those beginning their spiritual journey of self-discovery, lighthearted dialogue and hands-on exercises give readers an accessible way to vanquish potential roadblocks to happiness.
