François Ricard's essay enters into the writings of Milan Kundera in much the same way. The landscape he explores includes a chain of ten novels, composed between 1959 and 1999, and two books containing one of the most important elements on the novel.

Unilateral Biportal Endoscopic Spine Surgery 16 2019 Biportal endoscopic spine surgery has been rapidly developed in recent years, and Unilateral biportal endoscopic spine (UBE) surgery may be a new stream in spine surgery. UBE surgery is a concept of surgery that is different from the existing one portal endoscopic surgery, and has the advantage of being more familiar with spinal surgeons as the surgical anatomy is similar to a general surgical method, and the learning curve period is short. The 4mm diameter endoscope provides a very clear image, and it can be safely operated under magnified and clear endoscopic view. It is also available to use general surgical instruments in addition to endoscopic surgical instruments during UBE approaches. Currently it is being performed not only in the lumbar spine, but also in the cervical and thoracic spine. In addition, simple laminectomy, disc removal, and spinal fusion are possible. With the advancement of UBE surgery, spinal surgeons from various countries have been performing UBE in recent years, and it is gradually spreading to more and more countries.

world. This will be the first book summarizing from basic to advanced techniques with abundant illustrations and for easy understanding.

Schein's Common Sense Emergency Abdominal Surgery 28 2020 ix Preface Smart surgeons learn from their own  
mistakes, smarter surgeons learn from mistakes of others, some never learn . . . You are a resident, overworked  
constantly tired; sitting down with your mentor for a brief tutorial. What do you want to get out of these few  
organize your thoughts and approaches to the particular problem; to learn how he -the weathered surgeon -"takes  
grasp a few practical "recipes" or "goodies" and take home a message or two; to laugh a bit and unwind. This is  
goal in this book. We hope that you are not repelled or offended by the non-formal character of this book. This  
emergency abdominal surgery is taught best, by trial and error and repetitions, with emphasis on basics. This is  
"complete" textbook, nor is it a cookbook type manual or discussion of case studies; neither is it a collection of  
lecture notes or exhaustive lists. Instead, it consists of a series of informal, uncensored, chats between experienced

and their trainees. No percentages, series, elaborated figures or complicated algorithms are included; only a surgical narrative, explaining how "he does it" -based on his experience and state of the art knowledge of the literature. are included as it was our aim to put down nothing which has not been experienced, confirmed and practiced in hands.

Standard Acupuncture Nomenclature 6-2019 Now in its second edition, Standard Acupuncture Nomenclature has been extensively revised following a number of consultations with experts representing all the major traditions of acupuncture. The nomenclature covers the 361 classical acupuncture points organized according to the fourteen meridians. Each entry gives the standardized name of the point in its three elements: an alphanumeric code derived from the English language, the translation of the meridian name the Chinese phonetic alphabet (Pinyin) name, and the Han (Chinese) character. The original form of the writing is shown first followed by a simplified form of the character. Each entry also provides a comment on the point explaining the meaning of the Han character and the significance of the point's location. The nomenclature is facilitated by the inclusion of two indexes. The first lists the equivalent names and code names for the 361 acupuncture points as used in English French Japanese Korean and Vietnamese. The second lists the Han characters for the 361 points.
