A guide to Ecuador and the Galapagos Islands. Explore the rich culture and hip nightlife of Quito; take a canoe trip down the Amazon River; discover the farming villages and vibrant colonial heritage in the Central Valley; see Flamingo Lake on the island of Floreana; or relax along pristine Pacific Coast beaches in Puerto Bolivar, La Libertad, Manta or Esmeraldas. Ecuador's national parks are featured throughout. All ranges of hotels and restaurants are covered, particularly focusing on unique and special Ecuadorean locales. The authors wield a keen eye on value for money while prioritizing quality, regional culture and personality. An entire chapter details the best places to stay in the country. Another chapter on food and drink highlights the tasty seafood just offshore in Ecuador's bountiful coastal waters. Expert travel writer and naturalist Rachowiecki provides background essays on people and places, comprehensive information on the country's many national parks and private reserves, plus a colour guide to Galapagos wildlife. This book contains numerous suggestions for where to stay and eat on any budget, and tips for getting around by bus, boat, plane, train, and rental car. Regional and city maps, all updated and revised, are included. The Galápagos is a truly special place. Unlike the rest of the world's archipelagoes, it still has 95 percent of its prehuman quota of species. Wildlife of the Galápagos is the most superbly illustrated and comprehensive identification guide ever to the natural splendor of these incomparable islands--islands today threatened by alien species and diseases that have diminished but not destroyed what so enchanted Darwin on his arrival there in 1835. Covering over 200 commonly seen birds, mammals, reptiles, invertebrates, and plants, it reveals the archipelago's striking beauty through more than 400 color photographs, maps, and drawings and well-written, informative text. While the Galápagos Giant Tortoise, the Galápagos Sea Lion, and the Flightless Cormorant are recognized the world over, these thirty-three islands--in the Pacific over 600 miles from mainland Ecuador--are home to many more unique but less famous species. Here, reptiles well outnumber mammals, for they were much better at drifting far from a continent the archipelago was never connected with; the largest

native land mammals are rice rats. The islands' sixty resident bird species include the only penguin to breed entirely in the tropics and to inhabit the Northern Hemisphere. There is a section offering tips on photography in the Equatorial sunlight, and maps of visitors' sites as well as information on the archipelago's history, climate, geology, and conservation. *Wildlife of the Galápagos* is the perfect companion for anyone who wants to know what so delighted Darwin. Covers over 200 commonly seen species including birds, mammals, reptiles, invertebrates, plants, and coastal and marine life Illustrated with over 400 color photographs, maps, and drawings; includes maps of visitors' sites Written by wildlife experts with extensive knowledge of the area Includes information on the history, climate, geology, and conservation of the islands The most complete identification guide to the wildlife of the Galápagos This is a synthesis of both previously published information and abundant new data derived from field studies on Galagos insects. The dynamics and patterns of the evolution, ecology and distribution of the entire insect fauna are presented in general. The core of the book is an account of the 495 species of insects in the smaller orders with detailed information on their distribution and bionomics. Bradt's fully illustrated wildlife guides focus on regions of the world particularly celebrated for their amazing and often unique species. With spectacular photography or exclusive watercolour drawings throughout, each visitors' guide provides an introduction to the region's principal flora and fauna alongside suggested wildlife itineraries, practical information on when to go and what to take and photography tips. Written in a deliberately engaging way, they offer something different from dry field guides, and will appeal to the interested layman as much as the wildlife devotee. Ideal as a lightweight companion to any wildlife trip they also make a handsome souvenir. The Pantanal of Brazil, Bolivia and Paraguay is South America's Serengeti: its wetlands are the largest on earth (they're half the size of France) and, in the dry season, crocodiles and storks jostle to gobble the last of the dying fish. Here, the continent's largest cat, the jaguar, lives alongside giant otters, anacondas and the world's largest parrot. A comprehensive introduction to the best place to watch wildlife in South America, and beautifully illustrated throughout, Bradt's *Pantanal Wildlife* is the only portable book to cover all the main wildlife groups while focussing exclusively on the Pantanal. Based in Argentina, James Lowen is a wildlife writer, editor, photographer and lecturer. He is editor of the only magazine to focus on birdwatching in Latin America. *Insight Guides: all you need to inspire every step of your journey. From deciding when to go, to choosing what to see when you arrive, this is all you need to plan your trip and experience the best of Ecuador and Galapagos, with in-depth insider information on must-see, top attractions like The Avenue of the Volcanoes and Banos and hidden cultural gems like Cuenca and Otavalo. · Insight Guides Ecuador and Galapagos is ideal for*

'Lonely Planet guides are, quite simply, like no other.' - New York Times 'Lonely Planet. It's on everyone's bookshelves; it's in every traveler's hands. It's on mobile phones. It's on the Internet. It's everywhere, and it's telling entire generations of people how to travel the world.' - Fairfax Media (Australia) Photographs of some of the birds of Ecuador and the Galapagos Islands, seen in their natural habitat. * The Galápagos Islands (official name: Archipiélago de Colón, other Spanish name: Islas Galápagos, part of the Republic of Ecuador, are an archipelago of volcanic islands distributed on either side of the Equator in the Pacific Ocean surrounding the centre of the Western Hemisphere, 906 km (563 mi) west of continental Ecuador. The islands are known for their vast number of endemic species and were studied by Charles Darwin during the second voyage of HMS Beagle, as his observations and collections contributed to the inception of Darwin's theory of evolution by means of natural selection.* The Galápagos Islands and their surrounding waters form the Galápagos Province of Ecuador, the Galápagos National Park, and the Galápagos Marine Reserve. The principal language on the islands is Spanish. The islands have a population of slightly over 25,000* The 18 main islands (each having a land area at least 1 km²) of the archipelago (with their English names) shown alphabetically: Baltra (South Seymour) Island, Bartolomé (Bartholomew) Island, Darwin (Culpepper) Island, Española (Hood) Island, Fernandina (Narborough) Island, Floreana (Charles or Santa María) Island, Genovesa (Tower) Island, Isabela (Albemarle) Island, Marchena (Bindloe) Island, North Seymour Island, Pinzón (Duncan) Island, Pinta (Louis) Island, Rábida (Jervis) Island, San Cristóbal (Chatham) Island, Santa Cruz

(Indefatigable) Island, Santa Fe (Barrington) Island, Santiago (San Salvador, James) Island, Wolf (Wenman) Island* Minor islands : Daphne Major, South Plaza Island, Nameless Island, Roca Redonda Although it is one of South America's smallest countries, Ecuador is home to nearly 1,600 species of birds. This is thanks to the huge variety of habitats created by the Andes. The country is a birder's paradise and an increasingly popular tourist destination. Areas such as Tandayapa, Mindo and La Selva are renowned for their birdwatching potential and boast such dramatic species as Toucan Barbet, Andean Cock-of-the-Rock, Andean Condor, Giant Conebill and Ocellated Tapaculo, plus an array of brightly coloured manikins, cotingas, tanagers and hummingbirds. Offshore, the Galapagos Islands provide one of the world's greatest wildlife spectacles. Two hundred and fifty-two of Ecuador and the Galapagos' most interesting and spectacular birds are featured in this concise and easy-to-use guide. Illustrated with clear colour photography and brief but authoritative descriptions the Pocket Photo Guides highlight the species of birds and animals from each region that the traveller is most likely to see, as well as those that are genuinely endemic (only to be seen in that country or region) or special rarities. The genuine pocket size allow the books to be carried around on trips and excursions and will take up minimal rucksack and suitcase space.

"A madcap genealogical adventure . . . Vonnegut is a postmodern Mark Twain."—The New York Times Book Review Galápagos takes the reader back one million years, to A.D. 1986. A simple vacation cruise suddenly becomes an evolutionary journey. Thanks to an apocalypse, a small group of survivors stranded on the Galápagos Islands are about to become the progenitors of a brave, new, and totally different human race. In this inimitable novel, America's master satirist looks at our world and shows us all that is sadly, madly awry—and all that is worth saving. Praise for Galápagos "The best Vonnegut novel yet!"—John Irving "Beautiful . . . provocative, arresting reading."—USA Today "A satire in the classic tradition . . . a dark vision, a heartfelt warning."—The Detroit Free Press "Interesting, engaging, sad and yet very funny . . . Vonnegut is still in top form. If he has no prescription for alleviating the pain of the human condition, at least he is a first-rate diagnostician."—Susan Isaacs, Newsday "Dark . . . original and funny."—People "A triumph of style, originality and warped yet consistent logic . . . a condensation, an evolution of Vonnegut's entire career, including all the issues and questions he has pursued relentlessly for four decades."—The Philadelphia Inquirer "Wild details, wry humor, outrageous characters . . . Galápagos is a comic lament, a sadly ironic vision."—St. Louis Post-Dispatch "A work of high comedy, sadness and imagination."—The Denver Post "Wacky wit and irreverent imagination . . . and the full range of technical innovations have made [Vonnegut] America's preeminent experimental novelist."—The Minneapolis Star and Tribune Colonial cities, misty cloud rainforests, towering peaks, Amazonian rainforests, and the otherworldly Galapagos: for such a small country Ecuador has a stunning array of natural and cultural wonders.
