ROGERS.** *The Effective Teacher*

An exploration and discussion of the relationship between man and woman. Couples talk about the intimate details of their relationship and express their innermost feelings. Carl Rogers is the innovator of client-centred therapy. In this book he takes an objective position. Presenting the non-directive and related points of view in counselling and therapy, Rogers gives a clear exposition of procedures by which individuals who are being counselled may be assisted in achieving for themselves new and more effective personality adjustments. As founder of the person-centred approach, Carl Rogers (1902-1987) is arguably the most influential psychologist and psychotherapist of the 20th century. This book provides unique insights into his life and a clear explanation of his major theoretical ideas. This Third Edition is co-authored by Brian Thorne and Pete Sanders, leading person-centred practitioners and bestselling authors. Pete Sanders contributes a new chapter on "The Ongoing Influence of Carl Rogers", covering topics such as research, the emerging tribes in person-centred tradition, and its interaction with the medical profession. Brian Thorne draws on his experience of having known and worked with Rogers to beautifully describe the way in which Rogers worked with clients and from that, to draw out the practical implications of what is, in effect, a functional philosophy of human growth and relationships. In the twenty years since the first edition of Carl Rogers appeared, the book has continued to provide an accessible introduction for all practitioners and students of the person-centred approach. 2015 Reprint of 1954 Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition Software. Carl Rogers was among the founders of the humanistic approach (or client-centered approach) to psychology. The person-centered approach, his own unique approach to understanding personality and human relationships, found wide application in various domains such as psychotherapy and counseling (client-centered therapy), education (student-centered learning), organizations, and other group settings. These two lectures, first delivered in 1954, comprise the core of his teachings. In 1961 his shorter works would be collected and published as "On Becoming a Person." Contents: Some Hypotheses Regarding the Facilitation of Personal Growth What It Means to Become a Person Selected from a body of Rogers' work, essays deal with his approach to psychotherapy, theory and research, and philosophies. A repackaged edition of the revered author's classic work that examines the four types of human love: affection, friendship, erotic love, and the love of God—part of the C. S. Lewis Signature Classics series. C.S. Lewis—the great British writer, scholar, lay theologian, broadcaster, Christian apologist, and bestselling author of *Mere Christianity*, *The Screwtape Letters*, *The Great Divorce*, *The Chronicles of Narnia*, and many other beloved classics—contemplates the essence of love and how it works in our daily lives in one of his most famous works of nonfiction. Lewis examines four varieties of human love: affection, the most basic form; friendship, the rarest and perhaps most insightful; Eros, passionate love; charity, the greatest and least selfish. Throughout this compassionate and reasoned study, he encourages readers to open themselves to all forms of love—the key to understanding that brings us closer to God. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. A biography of the American psychologist Carl Rogers, founder of the humanistic psychology movement. -- Back cover. This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. In an attempt to cease from reducing the world and its (emergent) phenomena to linear modeling and analytic dissection, Dynamic Systems Theories (DST) and Embodiment theories and methods aim at accounting for the complex, dynamic, and non-linear phenomena that we constantly deal with in psychology. For instance, DST and Embodiment can enrich psychology's understanding of the communicative process both in clinical and non-clinical settings. In psychotherapy, an important amount of research has shown that – next to other ingredients – the therapeutic relationship is the most important active factor contributing to psychotherapy outcome. These findings give communication a central role in the psychotherapy process. In the traditional view, the underlying model of understanding psychotherapy processes is that of a number of components summatively coming together enabling us to make a linear causal prediction. Yet, communication is inherently dynamic. A shift to viewing the communication process in psychotherapy as a field dynamic phenomenon helps us to take into account nonlinear phenomena, such as feedback processes within and between persons. We thus propose an embodied enactive dynamic systems view as a new theoretical and methodological perspective that can more realistically capture what happens among and between two persons in psychotherapy. This view reaches beyond the current narrow model of psychotherapy research. DST and Embodied Enactive Approaches can offer solutions to the loss of non-linear phenomena, the complex dynamics of reality, and the holistic level of analysis. DST and Embodied Enactive Approaches have developed not in a single discipline but in a joined movement based on various fields such as physics, biology, robotics, anthropology, philosophy, linguistics, neuroscience, and psychology, and have only recently entered clinical theorizing. The two new paradigms have already triggered a rethinking of the therapeutic exchange by recognizing the embodied nature of psychological and communicative phenomena. Their integration opens up a promising scenario in the field of psychotherapy research, developing new, profoundly transdisciplinary, theoretical concepts, methodologies, and standards of knowledge. The notion of field dynamics enables us to account for the role of the communicational context in the regulation of intra-psychological processes, while at the

same time avoiding the pitfalls of an ontologization of the hierarchy of systemic organization. Moreover, the new approach implements methodological strategies that can transcend the conventional opposition between idiographic and nomothetic sciences. `This book is a monumental achievement, and person-centred practitioners will be indebted to Goff Barrett-Lennard for many years to come. He has written no only a definitive study of the history of person-centred approach - what he calls a report of the "evolutionary course of a human science" - but also an accompanying commentary which is unfailingly enlightening, sometimes provocative and occasional lyrical' - Brian Thorne, Emeritus Professor of Counselling, University of East Anglia and Co-Founder, Norwich Centre `I highly recommend this book as a reference source of major import, as bibliography, as history as art, and as a complex discussion of questions that plague the person-centred practitioner and the client-centred therapist' - The Person-Centered Journal `If you only ever buy one book about the Person-Centred Approach, other than those written by Rogers himself, this is the one. It is a staggering achievement by one of the most knowledgeable writers in the field' - PCP Reviews `This book is a gem, and should have wide appeal. It is an excellent introduction to person-centred psychology, written in accessible style, and it takes the reader beyond the simplicity often confused with naivety Goff Barrett-Lennard reveals a sophisticated complexity that challenges us to view the "person" with fresh eyes and an open mind' - Tony Merry, University of East London `I strongly recommend this book as a sophisticated treatment of the client-or person-centred approach to therapy and its applications to areas outside therapy. It is also a useful overview of research on all aspects of person-centred ideas' - Psychotherapy Research `This book... is not a single "meal" in itself but a positive "larder" containing every imaginable staple food and condiment all exquisitely and thoroughly researched. The book took Godfrey T Barrett-Lennard 20 years to write and it will stand as a reference text for person-centred specialists for longer than that... an essential reference text... and a pantry full of delicious surprises' - Counselling and Psychotherapy, The Journal of the British Association for Counselling and Psychotherapy `Probably the most important piece of work on the person-centred approach to have emerged in recent years... an essential source of reference for anyone with a serious interest in the person-centred approach' - Counselling News Written by an ex-student and long-time colleague of Carl Rogers, this in-depth and challenging book charts the development of person-centred therapy from its origins through to the present day. Godfrey T Barrett-Lennard traces the central concepts and key figures within the movement, set against the contemporary historical, social and political context. As an integrated overview of the person-centred approach, Carl Rogers' Helping System presents a wealth of fascinating ideas and information which is linked to a fresh, incisive account of the unfolding theory, process and research. Active Listening is a short 1957 work by Drs. Carl R. Rogers and Richard E. Farson, two influential American psychologists. The work brings the counselling technique of active listening to the layperson, demonstrating how it can be applied to interactions between an employee and employer. Carl R. Rogers (1902-1987) was one of the pioneers of the "client-centered" approach to psychotherapy. He is considered one of the founding fathers of modern psychotherapy research and is widely regarded among others in the field as the most influential psychotherapist of all time - viewed even more highly than Sigmund Freud. Dr. Rogers served as a professor of psychology at the University of Chicago, where he set up the university's counselling and research clinic, the Industrial Relations Center. He wrote many books on psychotherapy, and in later years, travelled the world to bring his theories to areas of great political and social strife like Northern Ireland, South Africa, and Brazil. Richard E. Farson (1926-2017) had already completed his bachelor's and master's degrees when he met Dr. Rogers in 1949. Dr. Rogers invited Farson to continue his studies with him at the University of Chicago. Farson became Dr. Rogers' research assistant while he completed his Ph.D. in psychology and began counselling at the Industrial Relations Center. Dr. Farson held leadership positions in a number of research institutions. He co-founded the Western Behavioral Sciences Institute, where he served as president and CEO. He was later appointed as the founding dean of the California Institute of the Arts School of Design and served as president of the Esalen Institute. Drs. Rogers and Farson collaborated on many projects, including 1957's Active Listening. They also led a 16-hour group therapy session that was recorded and released as a film called Journey Into Self. The film won the 1968 Academy Award for Best Documentary. Active Listening describes a method of communication used in counselling and conflict resolution. Rather than serving as a passive participant in a conversation, active listeners take a functional role in helping the speaker to work out their issues. As the speaker shares, the listener repeats back what they've heard in their own words. This both confirms that they've heard the speaker and verifies that they understand. Unlike the way many of us instinctively communicate - trying to get another to see things from our own perspective - active listening requires that we see things from the speaker's perspective. The listener must address not only the meaning of the words, but also the feeling behind them, in order to make the speaker truly feel heard. These feelings can be conveyed through words, tone, volume, body language, and even breathing. This method is not without risks. It can be tempting to lose your sense of self in the practice of sensing the feelings of another person. As Drs. Rogers and Farson put it, "It takes a great deal of inner security and courage to be able to risk one's self in understanding another." In contrast to many psychological texts, Active Listening is written for the non-clinician or psychologist. In plain, everyday language, the book explains both the concepts of active listening and how they can be applied to the workplace. Employers who engage in active listening, the book argues, can help employees to become more cooperative, less argumentative, and clearer in their own communication. While the book is written in the context of the employee/employer relationship, the technique can be applied to all relationships in our lives. The concept is still highly influential, and Drs. Rogers and Farson's ideas about client-centered psychology are used in clinical practice today. Seminar paper from the year 2010 in the subject Pedagogy - Science, Theory, Anthropology, grade: 1,3, Free University of Berlin, language: English, abstract: First in this paper, an overview of Dr. Carl Rogers' client-centered counseling is given. Then, focus is put on the importance of active listening, of understanding, and of attention paid to the client. As a conclusion, a professional approach to interpersonal communication for knowledge management in today's world will be explained and the perspective is widened to include general conversations beyond the therapeutic context. As a summary, this paper will discuss to what extent listening actually plays a major part in the communication process and where the limits of practical and professional application of Rogers' concept are. The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873) Offers a brief profile of Rogers, and shares his discussions with theologians and psychologists issues in psychotherapy On Becoming an Effective Teacher describes exemplary practices like Teach For America, which highlight the power of person-centered teaching to bring about higher student achievement and emotional intelligence. Lyon situates the classic with the cutting-edge, integrating wisdom with research, anecdote with practical advice, to find truths that reveal paths toward effective teaching. Jeffrey Cornelius-White, Psy.D., LPC, Professor of Counseling, Missouri State University, USA, Author of Learner Centered Instruction: Building Relationships for Student Success This fascinating book reveals through current research and contemporary applications that Carl Rogers' pioneering and radical approach to education is as relevant today as it was in the 1970s and '80s. Brian Thorne, University of East Anglia, UK Carl Rogers is one of the most influential psychologists of the twentieth century. His influence is similarly outstanding in the fields of education, counselling, psychotherapy, conflict resolution, and peace. On Becoming an Effective Teacher presents the final unpublished writings of Rogers and as such has, not only unique historical value, but also a vital message for today's educational crises, and can be read as a prescription against violence in our schools. It documents the research results of four highly relevant, related but independent studies which comprise the biggest collection of data ever accumulated to test a person-centred theory in the field of education. This body of comprehensive research on effective teaching was accomplished over a twenty-year period in 42 U.S. States and in six other countries including the UK, Germany, Brazil, Canada, Israel, and Mexico and is highly relevant to the concerns of teachers, psychologists, students, and parents. The principal findings of the

research in this book show that teachers and schools can significantly improve their effectiveness through programs focusing on facilitative interpersonal relationships. Teachers who either naturally have, or are trained to have empathy, genuineness (congruence), and who prize their students (positive regard) create an important level of trust in the classroom and exert significant positive effects on student outcomes including achievement scores, interpersonal functioning, self-concept, attendance, and violence. The dialogues between Rogers and Lyon offer a unique and timeless perspective on teaching, counselling and learning. The work of Reinhard Tausch on person-centered teaching for counselors, parents, athletics, and even textbook materials, and the empathic interactions of teachers and students, is among the most thorough and rigorous research ever accomplished on the significance and potential of a person-centered approach to teaching and learning. This pioneering textbook is highly relevant to educational psychologists and researchers, as well as those in undergraduate and graduate university courses in education, teacher training, counseling, psychology and educational psychology. To anyone interested in psychology or sociology or politics or morality, Rogers will give a new dimension of awareness. The Month 'What is evident from this book is how widely Carl Rogers' ideas have spread throughout the humanistic scene - and how valuable they have been.' - Self & Society '...a stimulating, enjoyable book and I recommend it to anyone interested in the person-centred approach.' - Counselling This book is edited by David Brazier and includes his chapter "The Necessary Condition is Love". A corrected and extensively annotated version of the sole meeting between two of the most important figures in twentieth-century intellectual life. Collection of essays by American psychotherapist Carl Rogers written between 1951 and 1961, in which he put forth his ideas about self-esteem, flexibility, respect for self, and acceptance of others. "Rogers, founder of the humanistic psychology movement and father of client-centered therapy ... traces his professional development from the sixties to the eighties and ends with a person-centered prophecy in which [he] calls for a more humane future."--Back cover. 2021 Reprint of the 1960 Edition. Facsimile of the original edition and not reproduced with Optical Recognition Software. In this essay, delivered as an address at Haverford College, Pennsylvania in 1959, Rogers discusses man's purpose and goal in life. In his therapeutic work Rogers sees clients take such directions as: away from facades; away from "oughts"; away from meeting expectations; away from pleasing others; toward being a process; toward being a complexity; toward openness to experience; toward acceptance of others; toward trust of self. Given a therapeutic climate of warmth, acceptance, and empathic understanding, the client moves from what he is not toward "being," toward becoming that which he inwardly and actually is. Quoting Kierkegaard, "to be that self which one truly is." A worthy goal indeed. In 1922, at just 20 years of age, farm boy Carl Rogers embarked on a journey halfway around the world. The China Diaries provides an intimate portrait of a young man exploring his faith, his purpose, and his personhood. Situated during the Chinese Civil War that birthed the Communist Party, The China Diaries also provides insight into the benevolent, yet at times ugly, history of Christian and Western influence in East Asia, the global YMCA movement at its apex, and Nobel Peace Prize winner and traveling companion, John R. Mott. For the life of me, I can't realize that I am really off for six months of high adventure, with great experiences, and tremendous opportunities ahead of me. I can't help but wonder how much the trip will change me, and whether the Carl Rogers that comes back will be more than a speaking acquaintance of the Carl Rogers that is going out. As long as I have a will of my own, I guess it is up to me whether the trip changes me for better or for worse. Complete with maps, photographs, historical context, phenomenological analysis, and a Forward by his daughter, Natalie, The China Diaries provides a window into the origins of Carl, the person, and Rogers, the founder of person-centered therapy. Originally published in 1897, this early works is a fascinating novel of the period and still an interesting read today. Contents include; The function of Latin, Chansons De Geste, The Matter of Britain, Antiquity in Romance, The making of English and the settlement of European Prosody, Middle High German Poetry, The 'Fox,' The 'Rose,' and the minor Contributions of France, Icelandic and Provençal, The Literature of the Peninsulas, and Conclusion..... Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwor 2015 Reprint of 1957 Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition Software. "Active Listening," first developed by Rogers and Farson, is a therapeutic technique designed to promote positive change in the client. Active listening is a communication technique used in counselling, training and conflict resolution, which requires the listener to feed back what they hear to the speaker, by way of re-stating or paraphrasing what they have heard in their own words, to confirm what they have heard and moreover, to confirm the understanding of both parties. It continues to have a lasting influence to this day. Psychology Classics: Significant Aspects of Client-Centered Therapy Widely regarded as one of the most influential psychologists of all time, Carl Rogers was a towering figure within the humanistic movement towards person centered theory and non-directive psychotherapy. Originally published in 1946 his classic article Significant Aspects of Client-Centered Therapy is essential reading for anybody interested in psychotherapy and counseling. In this landmark publication Carl Rogers outlines the origins of client-centered therapy, the process of client-centered therapy, the discovery and capacity of the client and the client-centered nature of the therapeutic relationship. Bonus Material: Significant Aspects of Client-Centered Therapy builds upon some of Carl Rogers' previously published work. Among the most notable of these earlier works were The Processes of Therapy and The Development of Insight in A Counseling Relationship; both of which are also presented in full. Significant Aspects of Client-Centered Therapy has been produced as part of an initiative by the website All About Psychology to make important psychology publications widely available. www.all-about-psychology.com Richard Rogers was born in Florence in 1933. He was educated in the UK and then at the Yale School of Architecture, where he met Norman Foster. Alongside his partners, he has been responsible for some of the most radical designs of the twentieth century, including the Pompidou Centre, the Millennium Dome, the Bordeaux Law Courts, Leadenhall Tower and Lloyd's of London. He chaired the Urban Task Force, which pioneered the return to urban living in the UK, was chief architectural advisor to the Mayor of London, and has also advised the mayors of Barcelona and Paris. He is married to Ruth Rogers, chef and owner of the River Café in London. He was knighted in 1991 by Queen Elizabeth II, and made a life peer in 1996. He has been awarded the Légion d'Honneur, the Royal Institute of British Architects' Royal Gold Medal, and the Pritzker Prize, architecture's highest honour. Richard Brown is Research Director at Centre for London, the independent think tank for London. He was previously Strategy Director at London Legacy Development Corporation, Manager of the Mayor of London's Architecture and Urbanism Unit, and an urban regeneration researcher at the Audit Commission.
