Desperately hilarious and achingly bleak, this is an intricate and tender question mark around our attempts to encounter each other in a technologized world. Sam wants to tell you about five encounters he had on a site called Craigslist. Sam is anxious about the way he gets to know people. About the way he self-sabotages his attempts to communicate and reach out to those around him. Sam wants this to be a chance for you to get to know him. Cross-Cultural Encounters in Modern World History explores cultural contact as an agent of change. It takes an encounters approach to world history since 1500, rather than a political one, to reveal different perspectives and experiences as well as key patterns and transformations. It studies the spaces between cultures historically to help us transcend human differences today in a rapidly globalizing world. The text focuses on first encounters that suggest long-term developments and particularly significant encounters that have changed the direction of world history. Because of the complexities of these encounters, the author takes a user-friendly approach to keep the text accessible to students with varying backgrounds in history. Epic Encounters examines how popular culture has shaped the ways Americans define their "interests" in the Middle East. In this innovative book—now brought up-to-date to include 9/11 and the Iraq war—Melani McAlister argues that U.S. foreign policy, while grounded in material and military realities, is also developed in a cultural context. American understandings of the region are framed by narratives that draw on religious belief, news media accounts, and popular culture. This remarkable and pathbreaking book skillfully weaves lively and accessible readings of film, media, and music with a rigorous analysis of U.S. foreign policy, race politics, and religious history. The new chapter, titled "9/11 and After: Snapshots on the Road to Empire," considers and brilliantly analyzes five images that have become iconic: (1) New York City firemen raising the American flag out of the rubble of the World Trade Center, (2) the televised image of Osama bin-Laden, (3) Afghani women in burqas, (4) the statue of Saddam Hussein being toppled in Baghdad, and (5) the hooded and wired prisoner in Abu Ghraib. McAlister's singular achievement is to illuminate the contexts of these five images both at the time they were taken and as they relate to current events, an accomplishment all the more remarkable since—to paraphrase her new preface—we are today struggling to look backward at something that is still rushing ahead. Numerous primary sources and a supportive tutorial that teaches students how to read and interpret, as well as how to write a history paper, document sources, and avoid plagiarism. Kaplan's, 5-Steps, Crash Course and the others are great resources for reviewing at the end, but Tamm's Textbook Tools accompanies students all year long. This AP World History companion is filled with vocab and assignments that follow the Bentley text throughout the year, chapter-by-chapter. It can be used for regular weekly assignments or review. It can be used on short notice if there is a sub, or be done as homework. All you need is the textbook. Teachers can copy at will, or the book can be used as a student consumable. As publishers started putting the majority of their content online, it opened a niche for traditional paper assignments, a void filled by this series. The textbook itself can be written in ink or electrons, but students still need to write and keep notes for themselves, and portfolios still matter. These activities challenge students to apply the concepts and give examples, diagramming each chapter as it comes. Facebook message or email (hudsonfla@gmail.com) if you want bulk pricing for a class set. This text is an accessible but challenging introduction to the debate on governmentality and the continued relevance of this body of work for the study of global politics. Paranormal expert Hans Holzer investigates the strangest cases of possession—the rare and disturbing instances when a ghost attaches itself to a living person Professor Hans Holzer explores the chilling phenomenon of possession: when a ghost is not yet ready to pass on to the next stage and thus inhabits a living person. These cases are not nearly as common as haunted houses or places, but do occur. In Haunted People, Holzer investigates chilling reports of ghosts who have attached themselves to living hosts. Connect students to the stories of history. Connect students to the experience of history. Connect students to success in history. At McGraw-Hill, we have dedicated the past few years to deepening our understanding of student and instructor experience. Joshua Becket enjoys being a truck driver and the independence it brings. All he wants is to save enough money so he can buy his own rig. But the bad economy and his company being sold stand in his way. Robert Oldfield has completed the takeover of his estranged parents' trucking company and moved back to Nashville, Tennessee. He hopes making Gordon Trucking a success will give him the recognition in his home town that he's so far only found in New York. The two men take one look at each other and fall in lust. They soon want more. Can they make a relationship work? Will it survive the attacks from a jealous competitor—or will they lose sight of what's really important? A relational approach to the study of interpersonal communication Close Encounters: Communication in Relationships, Fifth Edition helps students better understand their relationships with romantic partners, friends, and family members. Bestselling authors Laura K. Guerrero, Peter A. Andersen, and Walid A. Afifi offer research-based insights and content illustrated with engaging scenarios to show how state-of-the-art research and theory can be applied to specific issues within relationships—with a focus on issues that are central to describing and understanding close relationships. While maintaining the spotlight on communication, the authors also emphasize the interdisciplinary nature of the study of personal relationships by including research from such disciplines as social psychology and family studies. The book covers issues relevant to developing, maintaining, repairing, and ending relationships. Both the "bright" and "dark" sides of interpersonal communication within relationships are explored. Based on Bentley and Ziegler's best-selling, comprehensive survey program, Traditions & Encounters: A Brief Global History provides a streamlined account of the cultures and interactions that have shaped world history. A focus on the human experience helps frame the broad scope of world history into a clear and concise learning experience for students. Bentley's engaging narrative is available as a digital SmartBook™, a personalized eBook that enhances understanding by asking students to demonstrate comprehension as they read. It is also supported by engaging digital tools, such as interactive maps, that encourage critical thinking and retention of key course concepts. This book takes the novel approach of framing Political Obligation as a situation rather than a problem. By doing so, Political Obligation is not considered as an issue to be solved, but a central condition of existence to be investigated and understood. The book launches a hermeneutic inquiry into how this relationship of obligation is constructed through encounters in which the citizen comes face-to-face with the existential manifestations of the State. The book first discusses the dominant approaches to Political Obligation to elucidate the benefits of an existential hermeneutical approach. The notion of encounter is then developed into a hermeneutic approach capable of uncovering and interpreting the arguments, ideas, and narratives of obligation as are communicated in political communities. Finally, the limitations of this approach are considered in reference to the concerns of the Post-truth era. For many tabletop RPG players, the joy of an in-depth game is that anything can happen. Typical adventure modules include a map of the adventure's primary location, but every other location?whether it's a woodland clearing, a random apothecary or the depths of a temple players elect to explore?has to be improvised on the fly by the Game Master. As every GM knows, no matter how many story hooks, maps or NPCs you painstakingly create during session prep, your best-laid plans are often foiled by your players' whims, extreme skill check successes (or critical fails) or their playful refusal to stay on task. In a game packed with infinite possibilities, what are GMs supposed to do when their players choose those for which they're not prepared? The Game Master's Book of Random Encounters provides an unbeatable solution. This massive tome is divided into location categories, each of which can stand alone as a small stop as part of a larger campaign. As an example, the "Taverns, Inns, Shops & Guild Halls" section includes maps for 19 unique spaces, as well as multiple encounter tables designed to help GMs fill in the sights, sounds, smells and proprietors of a given location, allowing for each location in the book to be augmented and populated on the fly while still ensuring memorable moments for all your players. Each map is presented at scale on grid, enabling GMs to determine exactly where all of the characters are in relation to one another and anyone (or anything) else in the space, critical information should any combat or other movement-based action occur. Perhaps more useful than its nearly 100 maps, the book's one-shot generator features all the story hooks necessary for GMs to use these maps as part of an interconnected and contained adventure. Featuring eight unique campaign drivers that lead players through several of the book's provided maps, the random tables associated with each stage in the adventure allow for nearly three million different outcomes, making The Game Master's Book of Random Encounters an incredible investment for any would-be GM. The book also includes a Random NPC Generator to help you create intriguing characters your players will love (or love to hate), as well as a Party Makeup Maker for establishing connections among your PCs so you can weave together a disparate group of adventurers with just a few dice rolls. Locations include taverns, temples, inns, animal/creature lairs, gatehouses, courts, ships, laboratories and more, with adventure hooks that run the gamut from frantic rooftop chases to deep cellar dungeon-crawls, with a total of 97 maps, more than 150 tables and millions of possible adventures. No matter where your players end up, they'll have someone or something to persuade or deceive, impress or destroy. As always, the choice is theirs. But no matter what they choose, with The Game Master's Book of Random Encounters, you'll be ready. Eddie is a wounded war veteran, an old man who has lived, in his mind, an uninspired life. His job is fixing rides at a seaside amusement park. On his 83rd birthday, a tragic accident kills him, as he tries to save a little girl from a falling cart. He awakes in the afterlife, where he learns that heaven is not a destination. It's a place where your life is explained to you by five people, some of whom you knew, others who may have been strangers. One by one, from childhood to soldier to old age, Eddie's five people revisit their connections to him on earth, illuminating the mysteries of his "meaningless" life, and revealing the haunting secret behind the eternal question: "Why was I here?" Written by leading scholar and award-winning teacher Julia T. Wood, INTERPERSONAL COMMUNICATION: EVERYDAY ENCOUNTERS, 8e relates theory and skills directly to students' everyday interactions as it delivers a solid introduction to interpersonal communication. A reference text which covers health maintenance visits, and the guidelines recommended by

the American Academy of Pediatrics. Each visit described focuses on one or two important aspects of development for a specific age group: two year old, seven year old, office visit with the six month old. Cultural Encounters examines how 'otherness' has been constituted, communicated and transformed in cultural representation. Covering a diverse range of media including film, TV, advertisements, video, photographs, painting, novels, poetry, newspapers and material objects, the contributors, who include Ludmilla Jordanova and Ivan Karp, explore the cultural politics of Europe's encounters with Brazil, India, Israel, Australia and Africa, examining the ways in which visual and textual art forms operate in their treatment of cultural difference. This book concerns the challenges and tensions rising from mass migration flows, unbalanced north-south and east-west relations and the increasing multicultural nature of society. The scope of the book's theme is global, addressing diversity and identity, intercultural encounters and conflict, and the interrogations of a new socio-political order or paradigm. Thus, it highlights some of the most poignant and challenging outcomes of cultural diversity faced more or less palpably by everyone everywhere in today's societies. The book's theme of multi- and pluriculturalism is of particular current interest in the academic, socio-political, economic and entrepreneurial spheres. It covers Western and non-Western perspectives, representing a valuable resource in terms of international dialogue and experimentation. The chapters are complimentary, completing a rigorous theoretical framework offering detailed presentation and analysis of the phenomenon of diversity as encountered in society and the educational setting and at large viewed in a multidisciplinary multiperspective fashion. Among the theories and concepts represented are those intrinsic to sociology, psychology, political science, economics, history, literature, pedagogy, communication and linguistics. Encounters with Materials in Early Childhood Education rearticulates understandings of materials—blocks of clay, sheets of paper, brushes and paints—to formulate what happens when we think with materials and apply them to early childhood development and classrooms. The book develops ways of thinking about materials that are more sustainable and insightful than what most children in the Western world experience today through capitalist narratives. Through a series of ethnographic events and engagement with existing ideas of relationality in the visual arts, feminist ethics, science studies, philosophy, and anthropology, Encounters with Materials in Early Childhood Education highlights how materials can be conceptualized as active participants in early childhood education and generators of human insight. A variety of examples show how educators, young children, and researchers have engaged in thinking with materials in early years classrooms and explore what materials are capable of in their encounters with other materials and with children. Please visit the companion website at www.encounterswithmaterials.com for additional features, including interviews with the authors and the teachers featured in the book, videos and photographs of the classroom narratives described in these pages, and an ongoing blog of the authors' ethnographic notes. Based on Bentley and Ziegler's best-selling, comprehensive survey text, Traditions & Encounters: A Brief Global History provides a streamlined account of the cultures and interactions that have shaped world history. An effective part structure organizes developments into seven eras of global history, putting events into perspective and creating a framework for cross-cultural comparisons, while the strong themes of traditions (the formations and development of the world's major societies) and encounters (cross-cultural interactions and exchanges) bring focus to the human experience and help turn the giant story of world history into something more manageable. With an engaging narrative, visual appeal, extended pedagogy, and a strong emphasis on critical thinking, this concise version offers enhanced flexibility and affordability without sacrificing the features that have made the complete text a favorite among instructors and students alike. Winner of the 2015 Pulitzer Prize for History Encounters at the Heart of the World concerns the Mandan Indians, iconic Plains people whose teeming, busy towns on the upper Missouri River were for centuries at the center of the North American universe. We know of them mostly because Lewis and Clark spent the winter of 1804-1805 with them, but why don't we know more? Who were they really? In this extraordinary book, Elizabeth A. Fenn retrieves their history by piecing together important new discoveries in archaeology, anthropology, geology, climatology, epidemiology, and nutritional science. Her boldly original interpretation of these diverse research findings offers us a new perspective on early American history, a new interpretation of the American past. By 1500, more than twelve thousand Mandans were established on the northern Plains, and their commercial prowess, agricultural skills, and reputation for hospitality became famous. Recent archaeological discoveries show how these Native American people thrived, and then how they collapsed. The damage wrought by imported diseases like smallpox and the havoc caused by the arrival of horses and steamboats were tragic for the Mandans, yet, as Fenn makes clear, their sense of themselves as a people with distinctive traditions endured. A riveting account of Mandan history, landscapes, and people, Fenn's narrative is enriched and enlivened not only by science and research but by her own encounters at the heart of the world. The Janeway's Immunobiology CD-ROM, Immunobiology Interactive, is included with each book, and can be purchased separately. It contains animations and videos with voiceover narration, as well as the figures from the text for presentation purposes. Social Encounters is an approach to social psychology that is not what one might expect to find in textbooks on this subject. As a companion to Social Interaction advocated by Michael Argyle and his associates, it has been used by a rapidly growing number of researchers in social psychology, and related aspects of ethology, anthropology, and linguistics. The two key ideas are to study the detailed processes of social interaction at the level of the elements of interaction, and to relate social behavior to its biological basis and cultural setting. This work collects excellent representative studies of different aspects of social interaction; as such they are important in their own right. Within the general approach described, a range of different academic orientations are included. All selections report empirical findings, and most of them introduce conceptual notions as well. One achievement of the volume has been to establish the basic elements of which social interaction consists; current research is concerned with finding out precisely how these elements function. The contributors agree that the field consists of various signals: verbal and non-verbal, tactile, visible and audible, bodily contact, proximity, orientation, bodily posture, physical appearance, facial expression, movements of head and hands, direction of gaze, timing of speech, emotional tone of speech, speech errors, type of utterance and linguistic structure of utterance. These elements can be further analyzed and divided into categories or dimensions; each plays a distinctive role in social interaction. Social behavior is studied in natural settings or replicas of natural settings, for which there are cultural rules familiar to the subjects. This is a pioneering statement in sociobiology. This book critically investigates the pervasiveness of anthropomorphised animals in popular culture. Anthropomorphism in popular visual media has long been denounced for being unsophisticated or emotionally manipulative. It is often criticised for over-expressing similarities between humans and other animals. This book focuses on everyday encounters with visual representations of anthropomorphised animals and considers how attributing other animals with humanlike qualities speaks to a complex set of power relations. Through a series of case studies, it explores how anthropomorphism is produced and circulated and proposes that it can serve to create both misunderstandings and empathetic connections between humans and other animals. This book will appeal to academics and students interested in visual media, animal studies, sociology and cultural studies. Richard J. Bernstein is a leading exponent of American pragmatism and one of the foremost philosophers of the twentieth century. In this collection he takes a pragmatic approach to specific problems and issues to demonstrate the ongoing importance of this philosophical tradition. Topics under discussion include multiculturalism, political public life, evil and religion. Individual philosophers studied are Kant, Arendt, Rorty, Habermas, Dewey and Trotsky. Each of the sixteen essays, many of which are published here for the first time, offers a way of bridging contemporary philosophical differences. This book will be of interest to scholars of philosophy and those researching social and political theory. Microbes – can't live with them, can't live without them. Increasingly, we're finding out that our microbiota (the microbes that live on us) are essential for our wellbeing – they provide us with nutrients and vitamins and play a key role in developing our immune system. On the other hand, they are responsible for a great deal of misery, as they are major causes of death and debility around the world. As well as our own microbiota turning against us, there are lots of other microbes out in the wider world that can seriously damage, or even kill, those they infect. The current pandemic of COVID-19 shows the devastating effect that an infectious disease can have – our lives have been turned upside down. If you live in a developed country, you're not likely to get killer diseases such as ebola and cholera, but you do have a high chance of catching other infections that can have a significant impact on your wellbeing. This book focuses on those infections you're most likely to go down with, and supplies the answers to the following questions about them: Which infectious diseases are we likely to come across? How common are they? What microbes cause them? What happens to our bodies during an infection? How are the resulting illnesses treated? How can we avoid getting them? This book covers nearly 60 infectious diseases that people living in developed countries are likely to experience at some point during their life. It also has an introductory chapter that describes, in everyday language, the basic principles of microbiology and infectious diseases. Each chapter is lavishly illustrated, has interesting, relevant inserts, and provides a list of web-accessible suggestions for further reading. You can also purchase a loose-leaf print reference to complement Revel The West: Encounters and Transformations, Volume 1 . This is optional. With a practical and innovative approach, Interpersonal Encounters: Connecting through Communication shows students how interpersonal communication skills can be best used to accomplish everyday relationship goals. Guided by current interpersonal research from diverse authors and study participants, Laura K. Guerrero and Bree McEwan focus on the functions of interpersonal communication in our everyday lives and demonstrate how concepts, theories, and contemporary research apply to building, maintaining, and ending relationships. The book's unique structure prepares students to become better communicators in their personal and professional lives. This title is accompanied by a complete teaching and learning package.
