**The End of Detroit** Jul 22 2020 An in-depth, hard-hitting account of the mistakes, miscalculations and myopia that have doomed America's automobile industry. In the 1990s, Detroit's Big Three automobile companies were riding high. The introduction of the minivan and the SUV had revitalized the industry, and it was widely believed that Detroit had miraculously overcome the threat of foreign imports and regained its ascendant position. As Micheline Maynard makes brilliantly clear in *THE END OF DETROIT*, however, the traditional American car industry was, in fact, headed for disaster. Maynard argues that by focusing on high-profit trucks and SUVs, the Big Three missed a golden opportunity to win back the American car-buyer. Foreign companies like Toyota and Honda solidified their dominance in family and economy cars, gained market share in high-margin luxury cars, and, in an ironic twist, soon stormed in with their own sophisticatedly engineered and marketed SUVs, pickups and minivans. Detroit, suffering from a "good enough" syndrome and wedded to ineffective marketing gimmicks like rebates and zero-percent

financing, failed to give consumers what they really wanted--reliability, the latest technology and good design at a reasonable cost. Drawing on a wide range of interviews with industry leaders, including Toyota's Fujio Cho, Nissan's Carlos Ghosn, Chrysler's Dieter Zetsche, BMW's Helmut Panke, and GM's Robert Lutz, as well as car designers, engineers, test drivers and owners, Maynard presents a stark picture of the culture of arrogance and insularity that led American car manufacturers astray. Maynard predicts that, by the end of the decade, one of the American car makers will no longer exist in its present form.

**Great American Cars** Jun 20 2020 Our Cars with Character archives are packed with many insights into the lives of owners, restorers and custodians of many veteran, vintage and classic cars. In this book, we've collated a selection of diverse stories all concerning great marques and models that are proud to hail from the United States of America. Read the stories behind individual cars and learn how they fit into the lives of their owners.

**My Dad Had That Car** May 12 2022 This one-of-a-kind, massive illustrated history of more than 10,000 American automobiles is perfect for the millions of classic car enthusiasts. With more than 1,300 pages and 12,500 illustrations covering 70 years, this may be the most complete visual history of the American automobile ever published. Nowhere else are there so many collector, luxury, sporting and every day cars assembled with fascinating information about original prices, engine sizes, horsepower, and other specifications. The pages are packed with genuine, factory-fresh photographs and drawings taken from contemporary advertisements, catalogs, and brochures. More than 250 manufacturers and hundreds of individual models trace the evolution of the American automobile, from the millions of Model Ts that rolled off Ford's assembly line through the art deco streamliners of the '30s, to the tail-finned land yachts of the '50s and muscle cars of the '60s and '70s up to the early SUVs of the '90s. Throughout author Tad Burness adds handwritten details not found anywhere else, including pointing out unusual options and differences found within a model. Automotive journalist Matt Stone provides a new general introduction and one to each era within the book.

*American Cars, 1946-1959* Mar 30 2021 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the "Forward Look" Chrysler

products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

**The Ultimate Guide to American Cars** Jan 08 2022 This is an illustrated encyclopedia with more than 600 photographs. This is an illustrated A-Z directory of classic American cars, with over 600 stunning photographs. From the Austin (1940-41) to the Wilton (1847-1924), each entry tells the story of the car from its inception, through its rise to success and then on to its place on the road today. It includes all the most well-known makes and models dating from the 19th century to the modern day - Chrysler, Buick, Pontiac, Studebaker and many more. It features many fascinating anecdotes, such as the Chrysler designer basing his model on the fighter jets he had mistaken for geese flying through the air. This is a beautiful photographic compendium of classic American vehicles, perfect for the automobile enthusiast. Nowhere is the car more strongly a part of society and a

means of personal expression than in America. But for Americans, this love affair with the automobile goes deeper even still - America, after all, being a nation founded on free movement of populations. This is why the private car, when it arrived, had such an explosive effect. This beautifully illustrated A-Z directory of classic American cars looks in detail at the seminal models of the last century and a half, accompanied by beautiful colour and black and white photographs of the exteriors, interiors, engines and special features of each. The mixture of engaging anecdotes, fascinating facts and detailed specifications, as well as historical analysis of each brand's success and failure, make this the ultimate visual reference for anyone with an interest in cars or motoring.

From the turn of the twentieth century through to the present day, the book traces the development of the automobile, reflecting the social change it both brought, and reflected. From the horseless carriages of early times and the aero designs of the 1940's (inspired by WWII fighter planes), right through to the retro look of today's models.

American Cars in Europe, 1900-1940 Feb 26 2021 Germany is most often credited with the birth of the internal combustion engine. France gave rise to the first credible motor industry. The United States added a little Yankee ingenuity and came up with its own version of both. While the American automobile industry got off to a bumpy start, by 1908, U.S. automobile production had surpassed that of European manufacturers. When the outbreak of World War I all but halted European production of passenger cars, American auto makers took advantage of the opportunity to establish a toehold in Europe. During the war and for two decades after, American automobiles, which were considered reliable and cheap, were a common sight on the streets of many European cities and towns. This book contains a unique and

unprecedented collection of period photographs, recording American automobiles--and their owners--in various locations throughout Europe between the years of 1900 and 1940. Captions include the make and model of each car; information on the setting of the photograph; and remarks on interesting details, unusual accessories or distinguishing features of each car. Argo, Jewitt, Durant and Reo automobiles are represented here along with household names such as Buick, Chevrolet and Ford.

The American Railroad Passenger Car Feb 15 2020 An authoritative history of the American railroad passenger car, illustrated with nearly eight hundred photographs, engravings, and line drawings, examines interior designs and costs and recreates a lost age of elegance in rail travel

**Engines of Change** Dec 07 2021 A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara's unlikely role in Lee Iacocca's Mustang, John Z. DeLorean's Pontiac GTO, Henry Ford's Model T, as well as Honda's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, *Engines of Change* is an entirely edifying new way to look at the American story.

**American Cars, 1973-1980** Sep 04 2021 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

**The American Custom Car** Apr 30 2021 Among the hardest core of American automotive enthusiasts there always exists a desire to press styling and performance a step beyond the showroom floor -- to truly craft an automobile of one's own. This photographic and cultural history examines the evolution of American custom cars from the 1930s to present, covering touchstone trends, influential builders (Barris, Roth, Coddington et al), custom shows, enthusiast magazines and regional styles. An expensive collection of rare period photography and exclusive modern shots help illustrate how Detroit informed the styling of customs (and vice versa), the explosion of the custom car scene after World War II and the factors that led to the custom's near-death in the 1960s and its resurgence in the '80s. But most of all, this chronicle is a showcase of the great cars and people who influenced the movement through the years.

This lavishly illustrated book will appeal to classic car enthusiasts worldwide.

**American Car Design Now** Aug 15 2022 More and more Americans today are paying attention to how their cars are designed. Auto designers are now celebrities, and the look of your car has become as important as the clothes you wear. According to the New York Times Magazine, You are what you drive. Your car is a bold statement of individual identity. American Car Design Now is the first book to take a critical look at this phenomenon, with in-depth examinations of the creative process behind more than thirty contemporary models that embody the trends of the future, including the Crossfire, Mondeo, Thunderbird, Continental, Mark 9, Bengal, Vison, Cien, and CTS. The product of more than three years of research, this volume collects the author's essays and interviews with the design directors of General Motors, Ford, and Chrysler. The author gained unprecedented access to the notoriously secretive and guarded design studios of these car giants, and the result is an insider's perspective on the making of new American cars, of new American dreams. American Car Design Now delves deeply into the individual characters behind the industry and shows how their different creative and managerial techniques translate to the finished models. With this unique analytical approach, American Car Design Now is a great addition to the shelves of not only auto industry professionals but designers and car enthusiasts of all

types.

Fifty Years with Car and Driver Aug 23 2020 "50 Years with Car and Driver commemorates the golden anniversary of the most popular car magazine on the planet. But more than that, 50 Years with Car and Driver tells the story of the American automobile and how the editors of the magazine witnessed that history and reported on it, firsthand. A look at how Car and Driver evolved from its beginnings as Sports Cars Illustrated, in the able hands of great automotive journalists such as Ken Purdy and John Christy, and then came into its own as the musclecar era of the Sixties dawned. Writers such as David E. Davis, Jr., Brock Yates and Patrick Bedard helped to craft a literary car magazine that drew as much inspiration from Tom Wolfe's writing as it did from the great cars of the day." "Through the Seventies the magazine's reputation solidified as the technical authority on new cars, and the literary tradition continued with such writers as Don Sherman and author P.J. O'Rourke." "Throughout the Eighties, the magazine prospered even when its writers went off the deep end - literally, getting stranded in Mexico during a Baja comparison test. Car and Driver watched over the virtual rebirth of the American car during that decade, with the renaissance at Ford through the Taurus and the revival of the Corvette, while keeping its lock on the strongest feature writing in the auto magazines with stories like Brock Yates's thirty-years-past observance of the death of James Dean." "The Nineties saw Car and Driver continue its leadership as the world's largest-selling automotive magazine. From the introduction of the Acura NSX and the Mazda Miata to the brand-new Mustangs and Corvettes that have come in just the past years, Car and Driver has been the authority that readers trust when it comes to 0-60 times, road tests and reviews." "Fifty Years with Car and Driver combines classic stories from the magazine, commentary by former staffers including the author, vintage and modern photos of the hottest and most important cars reviewed by the magazines, as well as stories from behind the scenes - with all the attitude, expertise and visual excitement readers have come to expect from the magazine itself."--BOOK JACKET.

*American Cars* Sep 16 2022 Stunning color photographs and a lively narrative by one of today's foremost automotive writers tell the story of America's ongoing love affair with cars. Featuring classic cars, sports cars, and luxury automobiles, this handsome book brings together pictures and descriptions of the most impressive blends of technology, art, beauty, and adventure.

The American Stock Car Apr 18 2020 Find out how the American stock car has progressed from street setups in the early period of the '40s and '50s through the high-tech chassis of the Grand National years to today's Winston Cup series. Each decade is arranged chronologically in five chapters that cover the 1940s to present. This photo history explains and illustrates how rule changes and governing regulations have molded the evolution of stock cars for more than a half-century from the Grand National to the NASCAR era. From the truly "stock" street set-ups that hit the sands of Daytona in the postwar years; to the high-tech chassis of Grand National racing, the "aero wars" of the

late 1960s and early 1970s; and today's shop-built, stock-in-name-only racers. Readers witness a parade of the sports' greatest builders, drivers, tracks and automobiles. Two hundred black-and-white photos depict early legends like Tim Flock, Fireball Roberts and Lee Petty. Period and modern color photography depicts the exploits and cars of Richard Petty, Dale Earnhardt, Jeff Gordon, Dale Jarrett and dozens of others. Hardbound, 10" x 10", 168 pages, 200 b&w and 100 color ill. *The American Car and Foundry Co. in Khaki* Jan 16 2020 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. *Fifties Flashback* Nov 18 2022 No other era in automotive history is as revered as the 1950s, when Detroit was the center of the auto world and the American V-8 was king of the road. With hundreds of color photos of beautiful restorations and a collection of rare archival photos, Dennis Adler has compiled a detailed history of the emerging postwar American auto industry.

**American Muscle Cars** Aug 03 2021 This is the muscle car history to own--a richly illustrated chronicle of America's greatest high-performance cars, told from their 1960s beginning through the present day! In the 1960s, three incendiary ingredients--developing V-8 engine technology, a culture consumed by the need for speed, and 75 million baby boomers entering the auto market--exploded in the form of the factory muscle car. The resulting vehicles, brutal machines unlike any the world had seen before or will ever see again, defined the sex, drugs, and rock 'n' roll generation. American Muscle Cars chronicles this tumultuous period of American history through the primary tool Americans use to define themselves: their automobiles. From the street-racing hot rod culture that emerged following World War II through the new breed of muscle cars still emerging from Detroit today, this book brings to life the history of the American muscle car. When Pontiac's chief engineer, John Z. DeLorean, and his team bolted a big-inch engine into the division's intermediate chassis, they immediately invented the classic muscle car. In those 20 minutes it took Bill Collins and Russ Gee to bolt a 389 ci V-8 engine into a Tempest chassis they created the prototype for Pontiac's GTO--and changed the course of automotive history. From that moment on, American performance cars would never be the same. American Muscle Cars tells the story of the most desirable cars ever to come out of Detroit. It's a story of flat-out insanity told at full throttle and illustrated with beautiful photography.

**Policing the Open Road** Mar 18 2020 Policing the Open Road examines how the rise of the car, that symbol of American personal freedom, inadvertently led to ever more intrusive policing--with disastrous consequences for racial equality in our criminal justice system. When Americans think of freedom, they often picture the open road. Yet nowhere are we more likely to encounter the long arm of the law than in our cars. Sarah Seo reveals how the rise of the automobile transformed American freedom in radical ways, leading us to accept--and expect--pervasive police power. As Policing the Open Road makes clear, this expectation has had far-reaching political and legal consequences.--

**Fifties Flashback** Jul 02 2021 This book captures the spirit of the post World War II America and the era of tail fins, big chrome, and glitzy trim created by Detroit automotive stylists. Here is the complete story of Detroit as it emerged from the war and geared up to produce the first completely new automobiles since the 1930s. In depth interviews with Ford, General Motors, and Chrysler stylists take you into the Detroit design studios and executive board rooms of the 1950s, and behind the scenes at Packard, Studebaker, Hudson, and Nash. Author Dennis Adler has photographed some of the most significant cars of the 1950s and compiled a history that details the emerging postwar auto industry and the influence the automobile had on the American landscape throughout the decade. The artistry of his sensational large format photography and period photo locations parallel this spectacular saga of an American era unlike any other. More than 125 color, and 30 historical black and white photographs—some never before published—chronicle this exciting period in the history of the American automobile.
