*Child Maltreatment, Third Edition, by Cindy Miller-Perrin and Robin Perrin, is a thoroughly updated new edition of the first textbook for undergraduate students and beginning graduate students in this field. The text is designed to provide a comprehensive introduction to child maltreatment by disseminating current knowledge about the various types of violence against children. By helping students understand more fully the etiology, prevalence, treatment, policy issues, and prevention of child maltreatment, the authors hope to further our understanding of how to treat child maltreatment victims and how to prevent future child maltreatment. This volume sets out to provide a comprehensive description of the grammar of Gooniyandi, a non-Pama-Nyungan language of the southern-central Kimberley region of Western Australia. It covers phonetics and phonology, word phrase and clause structure, and the semantics of closed-class grammatical items. The major focus is, however, on meaning: how do Gooniyandi speakers mean with and in their language. To this end, the theoretical framework of systemic functional grammar, particularly as elaborated in Halliday's recent work, is adopted. Certain refinements to the theory are proposed in order to better account for the Gooniyandi evidence. Of obvious importance to those studying Australian aboriginal languages, this work has an importance to a wider audience for its effective presentation of theory justification. Includes proceedings of member institutes of the Society and of the Society's Science Congress through v. 84, 1956/57. *Idolatry in the Pentateuch addresses both the manner in which the Pentateuch was produced and how theological intentions can be discerned from the texts that constitute it. McKenzie attempts to read the final shape of the Pentateuch while not ignoring the diachronic complexities within its pages. Using a compositional approach to the Pentateuch, he establishes his methodology, analyzes several idolatry-related texts, and traces the theological intentions through an inner-textual strategy. Moreover, McKenzie briefly considers the history of interpretation through the last few centuries and discusses the state of Old Testament studies as he understands it. This book provides a review of the current theory and practice of experiential tourism and how it is marketed. Many societies today are characterised by widespread individual wealth of an order previously confined to the elite with the consequence that ownership of ‘ordinary’ physical goods is no longer a distinguishing factor. Instead people are now seeking the ‘extraordinary’ with examples being bodies enhanced through surgery, personal fitness trainers, and, in the case of leisure and tourism, seeking unique and unusual places to visit and activities to undertake. This trend manifests in the increasing consumption of services and the addition of experiential elements to physical goods by businesses aware of societal changes. The trend is enhanced by rapidly changing technology and economic production methods providing new sectors of the world’s population with access to the consumption experiences that are repeatedly featured in the media. This is the experience economy, characterised by a search by consumers for fantasies, feelings, and fun. This book was based on a special issue of Journal of Hospitality Marketing & Mangement.
