This easy-to-use manual provides a practical framework for a multi-disciplinary team to deliver a successful cardiac rehabilitation programme. Despite evidence that cardiac rehabilitation programmes reduce risk, there is no standard for hospital-based multidisciplinary programmes - which are thus complex and costly to design and implement Based on the cardiac rehabilitation work that has been carried out at in Gloucestershire over the past fifteen years, developing and constantly evaluating the evidence base for the programme Includes client handouts such as food and exercise diaries The relative roles of U.S. ground and air power have shifted since the end of the Cold War. At the level of major operations and campaigns, the Air Force has proved capable of and committed to performing deep strike operations, which the Army long had believed the Air Force could not reliably accomplish. If air power can largely supplant Army systems in deep operations, the implications for both joint doctrine and service capabilities would be significant. To assess the shift of these roles, the author of this report analyzed post1Cold War conflicts in Iraq (1991), Bosnia (1995), Kosovo (1999), Afghanistan (2001), and Iraq (2003). Because joint doctrine frequently reflects a consensus view rather

than a truly integrated joint perspective, the author recommends that joint doctrine 2 and the processes by which it is derived and promulgated 2 be overhauled. The author also recommends reform for the services beyond major operations and campaigns to ensure that the United States attains its strategic objectives. This revised edition includes updates and an index. This comprehensive book has been developed to quickly train an average person for the vast commercial and residential refrigeration and air-conditioning market within a short period of time. It provides all the technical knowledge needed to start a successful refrigeration and air-conditioning business anywhere in the world. The loss of hearing - be it gradual or acute, mild or severe, present since birth or acquired in older age - can have significant effects on one's communication abilities, quality of life, social participation, and health. Despite this, many people with hearing loss do not seek or receive hearing health care. The reasons are numerous, complex, and often interconnected. For some, hearing health care is not affordable. For others, the appropriate services are difficult to access, or individuals do not know how or where to access them. Others may not want to deal with the stigma that they and society may associate with needing hearing health care and obtaining that care. Still others do not recognize they need hearing health care, as hearing loss is an invisible health condition that often worsens gradually over time. In the United States, an estimated 30 million individuals (12.7 percent of Americans ages 12 years or older) have hearing loss. Globally, hearing loss has been identified as the fifth leading cause of years lived with disability. Successful hearing health care enables

individuals with hearing loss to have the freedom to communicate in their environments in ways that are culturally appropriate and that preserve their dignity and function. Hearing Health Care for Adults focuses on improving the accessibility and affordability of hearing health care for adults of all ages. This study examines the hearing health care system, with a focus on non-surgical technologies and services, and offers recommendations for improving access to, the affordability of, and the quality of hearing health care for adults of all ages. This reader is accompanied with a CD that contains the full audio of the text in MP3 format.

The Galapagos Islands are beautiful. They are full of interesting animals and birds. One famous visitor to the islands, in 1835, was the scientist Charles Darwin. Now the two young Americans, Sophie and David, are making a movie there. What do they find? This manual was written to complement and guide the ongoing efforts of groups and individuals interested in developing and implementing suicide prevention programs for Canada's Aboriginal youth. A number of prevention strategies that follow the best evidence about what works and what should be done are provided. > Presents theories, practices and critiques alongside each other to engage students, scholars and professionals from multiple fields. This title is also available as Open Access on Cambridge Core.

The world order built upon the Peace of Westphalia is faltering. State fragility or failure are endemic, with no fewer than one-third of the states in the United Nations earning a "high warning"-or worse-in the Fragile States Index, and an equal number suffering a decline in sustainability over the past decade.¹ State weakness invites a range of illicit actors, including international terrorists, globally networked insurgents, and transnational criminal organizations (TCOs). The presence and operations of these entities keep states weak and incapable of effective governance, and limit the possibility of fruitful partnerships with the United States and its allies. Illicit organizations and their networks fuel corruption, eroding state legitimacy among the governed, and sowing doubt that the state is a genuine guardian of the public interest. These networks can penetrate the state, leading to state capture, and even criminal sovereignty.² A growing number of weak and corrupt states is creating gaping holes in the global rule-based system of states that we depend on for our security and prosperity. Indeed, the chapters of this book suggest the emergence of a highly adaptive and parasitic alternative ecosystem, based on criminal commerce and extreme violence, with little regard for what we commonly conceive of as the public interest or the public good. The last 10 years have seen

unprecedented growth in interactivity between and among a wide range of illicit networks, as well as the emergence of hybrid organizations that use methods characteristic of both terrorist and criminal groups. In a convergence of interests, terrorist organizations collaborate with cartels, and trafficking organizations collude with insurgents. International terrorist organizations, such as al-Qaeda and Hezbollah, engage energetically in transnational crime to raise funds for their operations. Prominent criminal organizations like Los Zetas in Mexico and D-Company in Pakistan have adopted the symbolic violence of terrorists-the propaganda of the deed-to secure their "turf." And networked insurgents, such as the Islamic State of Iraq and the Levant (ISIL), the Revolutionary Armed Forces of Colombia (FARC), and the Liberation Tigers of Tamil Eelam (LTTE), have adopted the techniques of both crime and terror. The Center for Complex Operations (CCO) has produced this edited volume, Convergence: Illicit Networks and National Security in the Age of Globalization, that delves deeply into everything mentioned above and more. In a time when the threat is growing, this is a timely effort. CCO has gathered an impressive cadre of authors to illuminate the important aspects of transnational crime and other illicit networks. They describe the clear and present danger and the magnitude of the challenge of converging and connecting illicit networks; the ways and means used by transnational criminal networks and how illicit networks actually operate and interact; how the proliferation, convergence, and horizontal diversification of illicit networks challenge state sovereignty; and how different national and international organizations are fighting back. A deeper

understanding of the problem will allow us to then develop a more comprehensive, more effective, and more enduring solution. M. Cecilia Gaposchkin reconstructs and analyzes the process that led to King Louis IX of France's canonization in 1297 and the consolidation and spread of his cult. Culinary Landmarks is a definitive history and bibliography of Canadian cookbooks from the beginning, when La cuisinière bourgeoise was published in Quebec City in 1825, to the mid-twentieth century. Over the course of more than ten years Elizabeth Driver researched every cookbook published within the borders of present-day Canada, whether a locally authored text or a Canadian edition of a foreign work. Every type of recipe collection is included, from trade publishers' bestsellers and advertising cookbooks, to home economics textbooks and fund-raisers from church women's groups. The entries for over 2,200 individual titles are arranged chronologically by their province or territory of publication, revealing cooking and dining customs in each part of the country over 125 years. Full bibliographical descriptions of first and subsequent editions are augmented by author biographies and corporate histories of the food producers and kitchen-equipment manufacturers, who often published the books. Driver's excellent general introduction sets out the evolution of the cookbook genre in Canada, while brief introductions for each province identify regional differences in developments and trends. Four indexes and a 'Chronology of Canadian Cookbook History' provide other points of access to the wealth of material in this impressive reference book.
