And from nowhere came its grisly occupants. They were not of the earth, for their human flesh was immune to bullets. They were not of the grave, for they manned the wheel and a blasting machine gun- Secret Agent "X" made a desperate maneuver to block their invasion of the land of the living. And in that weird terror trap, he came face to face with a man he knew-a man he knew had died five years ago " Originally published: New York: Lyons Press, 2001. Double Agent, by L.A Keene is the first novel of a trilogy. Unbeknown to major intelligence agencies, there has been a clandestine agency operating for twenty years as a standalone UN agency. The purpose of the Global Intelligence Service (GIS) is to monitor and right the wrongs of poor decision making by the UN Security Council and others involved in the arms and weapons industry. It has links to all corners of the globe through the UN World Tourism Organisation. A new Secretary-General, Jackson Sinclair, learns about the work of the GIS under his command and develops a plan that will shake the arms and weapons industry for years to come and halt the work of the secretive International Defence & Arms Consortium (IDAC). The GIS's secret agent, Samantha Matthews and her special gift was critical to the success of the GIS's mission. Only four people in the world knew of her unique talent and how it helped her in the most dangerous situations. Could ESP help to foresee mortal danger? An asset placed at the highest levels of the UN has provided intel for many years to agencies unbeknown to the new Secretary-General. His role was not to advance world peace. It was to ensure continued conflict in the world and deception would result in more profits for those in the arms and weapons industry. But, Walter Jacobs felt betrayed. The UN Security Council did not support his bid for the top job and his secret employers questioned his abilities. He would show them all. He would create an event that would propel him to the top of the UN hierarchy. The plot explores

the effectiveness of the United Nations in an era quite different from 1945 and questions the ability or inability of the UN to make positive change with reducing conflict around the globe. Clothespins, craft sticks, playing cards, pushpins, and recycled milk jug caps make a cotton swab-launching Hwacha Rocket Cart. Rolled magazines, book rings, and duct tape can be fashioned into a set of working but harmless nunchucks. And a carefully folded sheet of paper can become an origami boomerang. This handy resource provides detailed, step-by-step instructions with diagrams to show stealth warriors how to build 37 different ninja weapons for the modern era. All of the projects in MiniWeapons of Mass Destruction 4 are built from common household and office items-plastic utensils, markers, clothespins, paper clips, wire hangers, and discarded packaging-all clearly detailed on materials lists. Once they've assembled their armory, the author provides novices several targets to practice their shooting skills. Nested paper cups become a dragon; chopsticks and a paper plate, a tripod bulls-eye. Armed, trained, and shrouded in black, they are now prepared for missions of reconnaissance, sabotage, and other grim errands. John Austin is a professional toy designer and author of MiniWeapons of Mass Destruction series, as well as So Now You're a Zombie. He lives in Cincinnati, Ohio. The secret story of chemical and biological warfare. A Higher Form of Killing was first published to great acclaim in 1982. The authors have written a new Introduction and a new Epilogue to take account of the events that have happened since the early 1980s - including the break-up of the former Soviet Union and the black market that appeared in chemical and biological weapons, the acquisition of these weapons by various Third World states, the attempts of various countries like Iraq to build up arsenals of these weapons and, most recently, the use of these weapons in terrorist attacks. As the authors point out, the two generations since the Second World War lived with the threat of nuclear annihilation. Now a new generation must learn to live with weapons that are more insidious and potentially more devastating. The CIA keeps a lot of secrets. None more deadly than him. After a covert mission became personal, the only way elite counterterrorism operative, Alexander King, could keep his loved ones safe, and the eyes of Washington's enemies blind to his existence, was to disappear. A year after his family buried a body they thought was his, King saves a young woman from a car bomb in London, and that's when his work in the shadows becomes complicated. Because she's not who he thinks she is, and the web that King is pulled into is tangled with enemies that reach the highest levels of the United States government. But this web being spun by a sadistic terrorist isn't your average one-time explosive attack. Saajid Hammoud is aiming higher. He isn't trying to cripple the greatest military in the world, he's looking to control it. And owning the presidential candidate with a clear path to the White House gets him all the way to the top. When politics fail, and the might of the world's most powerful nation hangs in the balance, it's secret weapons like Alexander King who scour the alleys and back avenues that often make the difference. Unfortunately, King isn't the only secret in this high stakes game of war. But for the sake of the free world, he sure as hell better be the best. If you couldn't put down Vince Flynn's Mitch Rapp, Lee Child's Jack Reacher, Tom Clancy's Jack Ryan, Brad Thor's Scot Harvath, or David Baldacci's Will Robie, fans of Bradley Wright believe you won't be able to put down the addictive Alexander King. \_\_\_\_\_ Praise for international bestselling author Bradley Wright: "Best new thriller author since Vince Flynn, David Baldacci, and Brad Thor!" So you think modern medicine has the whole virus game figured out? Think again. And it's not even a question of "if" we'll be hit by some new and deadly disease—it's "when." The war on germs is being fought on many fronts—from the skirmishes with disease-carrying mosquitoes that cross oceans hidden away in airline wheel wells to the high-profile battle against terrorists wielding deadly bioweapons. Today's bold headlines would have us believe that the biggest threat comes from bioterrorism. But don't underestimate Mother Nature, perhaps the most savage bioterrorist of all. Assisted by the increasing ease with which people—and the germs they carry—move across international borders, she's an effective force to be reckoned with, a key player on this battlefield. As author Madeline Drexler makes clear, we'd do best not to ignore her. Human beings and the pathogens that attack them are crossing paths more and more frequently, particularly as modern life grows increasingly complex. Whatever the infectious agent may be, whether it's pandemic flu, foodborne illness, a debilitating disease carried far and wide by biting insects, or some new microbial horror we have yet to detect, keen surveillance and rapid response are really the only weapons in our arsenal. Secret Agents looks at

today's new and emerging infections—those that have increased in attack rate or geographic range, or threaten to do so—and tells the stories of scientists racing to catch up with invisible adversaries superior in both speed and guile. Each chapter focuses on a different threat: foodborne pathogens, antibiotic resistance, animals and insectborne diseases, pandemic influenza, infectious causes of chronic disease, and bioterrorism, including the latest information on the public health threats posed by anthrax and diseases such as smallpox. Based in part on material collected from the Forum on Emerging Infections hosted by the Institute of Medicine in Washington, D.C., *Secret Agents* is ultimately as engaging as it is disturbing. Drexler's thorough survey of the field of infectious disease, supplemented by extensive interviews with today's top researchers, yields a compelling portrait of a world engaged in a clandestine war. Emerging infections are among the many secret ties that bind the world into an organic whole. We know that infectious disease is an inescapable part of life, but we need to begin thinking globally and acting locally if we are to avoid the menace of a catastrophic outbreak of some new plague. *Secret Agents* sounds a clear and compelling call to take up arms against the organic predators among us. Meet Lady Rose, she's got all; brains, beauty, deadly skills—and a license to kill. When Rose travels to Atlantic City to be beauty pageant, she runs into Top Russia agent on a mission to hunt her down. Little does she know that all assets will become lethal liabilities. But will he reach her in time. With all agencies on alert for the "traitorous" Lady Rose, a bomb planted in the White House is ticking away and Rose and Lucky know they can't defuse it in time. Their only hope is to get a message to the Command-in-Chief in time to shield him from burnt of blast. Will the President survive? Can Rose clear her name in time to uncover the deadly plot.
