The Flower Year Feb 16 2020 The Flower Year is a flower coloring book celebrating of a year of of flowers, birds, butterflies and small creatures to color in, adding up to a year's worth of coloring enjoyment. The Flower Year is a hardcover book, with intricate illustrations by Leila Duly, a textile print designer. Duly's work is inspired by old Victorian etchings, unique vintage finds and the English countryside. Leila's first book was Floribunda: A Flower Coloring Book, published by Laurence King in 2016 followed by Floribunda, A Flower Coloring Journal and a calendar. "Beautiful, silken ivory pages in these smaller sized, hardback books. Laurence King Publishing produce top quality journals and this Journal, and Book, are right up there. As you'll see from the video, the Journal has a few blank pages between the drawings. The Flower Year has interesting quotes on the title page for each month and at the back is a pictorial index to the images that lists the plants in each drawing. You'll be referring to this a lot as you research your flowers and leaves. Pencils will be fine but make sure you test any water based pens on an inconspicuous page. The covers continue the soft pink covers that we associate with Leila." Prue, Colour + Blog "This is a very beautiful book filled from cover to cover with detailed images of delicate flowers. Every page is different, it never feels like you're coloring the same picture twice because there is so much variety. There are single page drawings, pages with a collection of single flowers along with their names and larger pictures that

cover a double page. I particularly liked the index pages at the back of the book which gives you the names of all of the plants used in the pictures. I would definitely recommend, it's my new favorite." Amazon reviewer

Genetic Reflections Mar 31 2021 Genetic Reflections - A Coloring Book aims to inspire young students and the public to explore the beauty of science and genetics. The organisms in this book are considered 'model' organisms, as they are widely studied in laboratories with hopes to understand human biology, disease pathologies, and ways to improve agricultural crops. Despite the great differences in shape and size, on the genetic level there are lots of similarities. In every species, DNA sequences consist of the same four building blocks (G, C, A, and T). However, slight changes in their use, even in the same gene, can occur in each species. The way our bodies and cells work are well conserved throughout evolution, even in species that may look very different from us. The beauty of our world, even on the cellular level, is apparent. Genetic Reflections - A Coloring Book is a collaboration between Ahna Skop, Elif Kurt and Caitlin Marks; two UW-Madison undergraduate Skop Lab members. This coloring book is the outcome of a year-long independent study in Life Sciences Communication with goals to broadly disseminate the Genetic Reflections scientific glass art installation created by Angela Johnson and Ahna Skop. Part of the proceeds of this book will be donated to charities and programs that support STEAM (Science, Technology, Engineering, Arts, and Mathematics) educational innovations or public outreach events.

The Reverse Coloring Book™ Jun 02 2021 Coloring books became a thing when adults discovered how relaxing and meditative they were. Jigsaw puzzles roared back into popularity as an immersive activity, not to mention a great alternative to television. It's so simple, yet so profoundly satisfying. Each page in The Reverse Coloring Book

has the colors, and you draw the lines. Created by the artist Kendra Norton, these beautiful and whimsical watercolors provide a gentle visual guide so open-ended that the possibilities are limitless. Trace the shapes, draw in figures, doodle, shade, cover an area with dots. Be realistic, with a plan, or simply let your imagination drift, as if looking at clouds in the sky. Each page is an invitation to slow down, let go, and thoughtfully (or thoughtlessly) let your pen find its way over the image. The Reverse Coloring Book includes 50 original works of art, printed on sturdy paper that's single-sided and perforated. And unlike with traditional coloring books, all you need is a pen.

Beautiful Symmetry Dec 20 2022 A coloring book that invites readers to explore symmetry and the beauty of math visually. *Beautiful Symmetry* is a coloring book about math, inviting us to engage with mathematical concepts visually through coloring challenges and visual puzzles. We can explore symmetry and the beauty of mathematics playfully, coloring through ideas usually reserved for advanced courses. The book is for children and adults, for math nerds and math avoiders, for educators, students, and coloring enthusiasts. Through illustration, language that is visual, and words

that are jargon-free, the book introduces group theory as the mathematical foundation for discussions of symmetry, covering symmetry groups that include the cyclic groups, frieze groups, and wallpaper groups. The illustrations are drawn by algorithms, following the symmetry rules for each given group. The coloring challenges can be completed and fully realized only on the page; solutions are provided. Online, in a complementary digital edition, the illustrations come to life with animated interactions that show the symmetries that generated them. Traditional math curricula focus on arithmetic and the manipulation of numbers, and may make some learners feel that math is not for them. By offering a more visual and tactile approach, this book shows how math can be for everyone. Combining the playful and the pedagogical, Beautiful Symmetry offers both relaxing entertainment for recreational colorers and a resource for math-curious readers, students, and educators.
