In three sizes from Preemie to 18 months, this pattern includes instructions for both the Tassle Hat and the Thumb-less Mitts. "Thumb-less" mitts are an easy way to get baby ready for going outside in the winter - they slide easily over tiny fists, any which-way. Pattern includes instructions to a six-part video tutorial. Drawn to a beautiful, unique yarn, but not sure what to do with it? Look no further. Gorgeous hand-dyed, variegated, self-striping, speckled, and other fun yarns abound for the knitter today, but sometimes the color variations and changes can make it difficult to find patterns that allow the yarn to shine. Oftentimes, the simpler the pattern, the more the yarn gets to take center stage. With this in mind, Toby designed all of the pieces in this book--hats, shawls, mittens, sweaters, and more--to let the yarn be the main feature. The 21 designs are written at a level for the motivated knitter who has made a scarf or two and is ready to move on to something a little

more interesting and unique. Sidebars with photos and notes explain techniques that may be unfamiliar to beginners so that you can fearlessly make any piece. More experienced knitters can relax into these patterns and enjoy their showcase yarn as it slides along their needles and becomes a masterpiece of color. Authors Sharon Snow and Yvonne Reed present fashion as a way to offer a fun and interesting program for teens in the library—and not just for girls. Today's fashion-savvy teenaged guys are just as likely to be eager participants. *Teens Have Style!: Fashion Programs for Young Adults at the Library* provides an easy-to-follow template for creating popular programs within the public or school library setting that will capture the attention of most teenaged girls. In *Teens Have Style!*, librarians will find programs they can adapt to their individual style or specific age range of their younger patrons, such as getting ready for the prom, making jewelry, decorating sneakers, creating a "green" outfit from recycled materials, and many more. All of the ideas are flexible and can be matched to other educational programs or to fit the library's needs, regardless of its size. For example, school librarians can partner with art teachers to orchestrate a "Fashion as Art" program, which challenges

students to identify a painting that they like and then to create an outfit that reflects the style and feel of that work of art. This book is a fabulous resource for making crochet hats in a variety of techniques and construction styles with inclusive sizing for men, women, children and babies. Charts, written instructions and lots of great crochet resources.

A new world of creative possibilities is opened by Blender, the most popular and powerful open source 3D and animation tool. Blender is not just free software; it is also an important professional tool used in animated shorts, television commercials, and shows, as well as in production for films like Spiderman 2. Lance Flavell's *Beginning Blender* will give you the skills to start shaping new worlds and virtual characters, and perhaps lead you down a new professional path. *Beginning Blender* covers the Blender 2.5 release in-depth. The book starts with the creation of simple figures using basic modeling and sculpting. It then teaches you how to bridge from modeling to animation, and from scene setup to texture creation and rendering, lighting, rigging, and ultimately, full animation. You will create and mix your own movie scenes, and you will even learn the basics of games logic and how to deal with games physics. Whether you are new to modeling, animation, and game design, or whether you are simply new to Blender, this book will show you everything you need to know to get your 3D projects underway. UP-TO-DATE, TECHNICALLY ACCURATE COVERAGE OF ESSENTIAL TOPICS IN IMAGE AND VIDEO PROCESSING This is the first book to combine image and video processing with a practical MATLAB®-oriented approach in order

to demonstrate the most important image and video techniques and algorithms. Utilizing minimal math, the contents are presented in a clear, objective manner, emphasizing and encouraging experimentation. The book has been organized into two parts. Part I: Image Processing begins with an overview of the field, then introduces the fundamental concepts, notation, and terminology associated with image representation and basic image processing operations. Next, it discusses MATLAB® and its Image Processing Toolbox with the start of a series of chapters with hands-on activities and step-by-step tutorials. These chapters cover image acquisition and digitization; arithmetic, logic, and geometric operations; point-based, histogram-based, and neighborhood-based image enhancement techniques; the Fourier Transform and relevant frequency-domain image filtering techniques; image restoration; mathematical morphology; edge detection techniques; image segmentation; image compression and coding; and feature extraction and representation. Part II: Video Processing presents the main concepts and terminology associated with analog video signals and systems, as well as digital video formats and standards. It then describes the technically involved problem of standards conversion, discusses motion estimation and

compensation techniques, shows how video sequences can be filtered, and concludes with an example of a solution to object detection and tracking in video sequences using MATLAB®. Extra features of this book include: More than 30 MATLAB® tutorials, which consist of step-by-step guides to exploring image and video processing techniques using MATLAB® Chapters supported by figures, examples, illustrative problems, and exercises Useful websites and an extensive list of bibliographical references This accessible text is ideal for upper-level undergraduate and graduate students in digital image and video processing courses, as well as for engineers, researchers, software developers, practitioners, and anyone who wishes to learn about these increasingly popular topics on their own. It's time to play! A Happy Book of Little Gifts to Make shows artists and crafters who like to work with their hands how to create fun, whimsical art. LightWave v9 Texturing takes you behind the fine art of surfacing your 3D objects using LightWave 3D. Because many artists find texturing and prepping objects for texturing intimidating or confusing, this book breaks down the process and makes it easier to understand by guiding you through LightWave's powerful surfacing toolset and a number of helpful tutorials. LightWave v9 Texturing also

demonstrates how easy it is to create surfaces using LightWave's new, powerful node-based shading system. With this book go beyond texturing theory to find out what makes a great realistic texture; learn how to build textures using both LightWave's classic layer system and the new Node Editor; discover how to unwrap and edit UV maps; find out how to create a variety of surfaces through a series of tutorials; enhance your surfaces with gradients, image maps, and procedural textures.
