**The Engineers' Metric Data Manual and Buyers' Guide** Nov 24 2020 The Engineers' Metric Data Manual and Buyers' Guide is a manual and guide for the British engineering industry in the period of transition from Imperial to metric sizes. This material begins with the abbreviated history and use of the S.I. system. A guide on using the manual and a suggested component coding system for adoption by companies for internal metric use are also explained. This book also presents design data and conversion tables, as well as data sheet for specific parts of the whole engineering design, including fasteners, bearings, bushes, machine tools, fluid sealing, and coupling systems. This book will be valuable to engineers in such transition and will help prevent a serious and avoidable waste of skilled engineering effort.

**The Two Cities** May 31 2021 First published to wide critical acclaim in 1992, The Two Cities has become an essential text for students of medieval history. For the second edition, the author has thoroughly revised each chapter, bringing the material up to date and taking the historiography of the past decade into account. The Two Cities covers a colourful period from the schism between the eastern and western churches to the death of Dante.

It encompasses key topics such as: the Crusades the expansionist force of the Normans major developments in the way kings, emperors and Popes exercised their powers a great flourishing of art and architecture the foundation of the very first universities. Running through it all is the defining characteristic of the high Middle Ages: the delicate relationship between the spiritual and secular worlds, the two 'cities' of the title. This survey provides all the facts and background information that students need, and is defined into straightforward thematic chapters. It makes extensive use of primary sources, and makes new trends in research accessible to students. Its fresh approach gives students the most rounded, lively and integrated view of the high Middle Ages available.
