Based on personal interviews with the principal policy-makers of the 1970s, Korea's Development under Park Chung-Hee examines how the president sought to develop South Korea into an independent, autonomous sovereign state both economically and militarily. Kim provides a new narrative in the complex task of exploring the paradoxical nature and effects of Korea's rapid development which maintains that any judgement of Park must consider his achievements in the socio-economic, cultural and political context in which they took place. Aspects of Park's government analyzed include: *his abhorrence of Korea's reliance on the US presence *the Korean model of state-guided industrialization *Park's rapid development strategy *the role of the ruling elites *Park's clandestine nuclear development program *the heavy chemical industrialisation of the 1970s The prevailing popularity of Park in the eyes of the Korean public is significant and relevant to their acceptance of how their national development was achieved. This book tells that story while simultaneously recognizing the flaws in the process. With a great deal of material never before published, scholars of Korean politics and history at all levels will find this book a stimulating account of South Korea in the 1960s and 1970s. A NATIONAL BESTSELLER This beloved memoir "is an extraordinary, honest, nuanced and compassionate look at adoption, race in America and families in general" (Jasmine Guillory, Code Switch, NPR) What does it mean to lose your roots—within your culture, within your family—and what happens when you find them? Nicole Chung was born severely premature, placed for adoption by her Korean parents, and raised by a white family in a sheltered Oregon town. From childhood, she heard the story of her adoption as a comforting, prepackaged myth. She believed that her biological parents had made the ultimate sacrifice in the hope of giving her a better life, that forever feeling slightly out of place was her fate as a transracial adoptee. But as Nicole grew up—facing prejudice her adoptive family couldn't see, finding her identity as an Asian American and as a writer, becoming ever more curious about where she came from—she wondered if the story she'd been told was the whole truth. With warmth, candor, and startling insight, Nicole Chung tells of her search for the people who gave her up, which coincided with the birth of her own child. All You Can Ever Know is a profound, moving chronicle of surprising connections and the repercussions of unearthing painful family secrets—vital reading for anyone who has ever struggled to figure out where they belong. By examining the most controversial Park Chung-hee period (1961-1979), Developmental Dictatorship and the Park Chung-hee Era helps the reader rediscover the socioeconomic origins of modern Korea. The essays in this book written by twelve noted Korean social scientists discuss the relationship between South Korea's economic development and totalitarianism in the form of the Park dictatorship. ABOUT THE EDITOR Lee Byeong-cheon holds a PhD in economics from Seoul National University. He is a professor in the Department of Economics and International Trade at Kangwon National University. Dr. Lee was a visiting professor at University of California, Berkeley. CONTRIBUTORS Lee Byeong-cheon, Kim Sam-soo, Seo Ick-jin, Yoo Chul-gyue, Lee Sang-cheol, Lee Jung-woo, Lee Chong-suk, Cho Young-chol, Chin Jung-kwon, Han Hong-koo, Hong Seong-tae, Hong Yun-gi. In 1959 South Korea was mired in poverty. By 1979, it had a powerful industrial economy and a vibrant civil society that led to democracy eight years later. This volume examines the transformation as a study in the politics of modernization, contextualizing many historical ambiguities in South Korea's trajectory toward sustainable economic growth. A Place to Live brings together in a single volume an introduction to Yi Chung-hwan's (1690–1756) T'aengniji (Treatise on Choosing Settlement)—one of the most widely read and influential of the Korean classics—and an annotated translation of the text, including the author's postscript. Yi composed the T'aengniji in the 1750s, a time when, despite King Y?ngjo's (r. 1724–1776) policy of impartiality, the scholar-gentry class continued to identify strongly with literati factions and to participate in the political scene as such. A prominent secretary who had his career cut short because of suspected involvement in one of the largest literati purges at court, Yi endured long periods of living in exile before finishing the T'aengniji in his early sixties. The treatise, his only substantial work, is based largely on his travels throughout the Korean peninsula and presents not only his views on the desirability of places for settlement, but also his opinions on contemporary matters and criticism of government policy. As a result, the T'aengniji circulated as an anonymous work for many years. Employing the latest research on T'aengniji manuscripts, translator Inshil Yoon maintains in her introduction that the original title of the treatise was Sadaebu kag?ch'? (Livable Places for the Scholar-Gentry); she goes on to discuss in detail its reception by premodern and contemporary scholars and the treatise's ongoing popularity as evidenced by the numerous versions and translations done in this and the previous century, its having been made into a novel, and current usage of "t'aengniji" as a noun meaning "regional geography" or "travelogue." The present translation is based on the Chos?n Kwangmunhoe edition. Please note: This is a companion version & not the original book. Sample Book Insights: #1 In our culture, extroversion is considered the norm. It is the club that everyone wants to be part of. But introverts are not inferior to extroverts, and vice versa. We are different personality types with different needs and motivations. #2 The introvert's way is wrong, and the extrovert's way is right. The right way is the extrovert's way. #3 The extrovert's way is not for everyone. It's a path that requires more stimulation to feel good than introversion, and it tends to talk and move at a faster pace. It wants to do it all and see it all, and it wants to say it all with as few rest stops as possible. #4 The key to happiness is to surround yourself with people, but for introverts this is not enough. We need alone time as much as we need human contact. If we are forced to be around people all the time, we can experience feelings of depletion, sadness, and even depression. A NATIONAL BESTSELLER This beloved memoir "is an extraordinary, honest, nuanced and compassionate look at adoption, race in America and families in general" (Jasmine Guillory, Code Switch, NPR) What does it mean to lose your roots—within your culture, within your family—and what happens when you find them? Nicole Chung was born severely premature, placed for adoption by her Korean parents, and raised by a white family in a sheltered Oregon town. From childhood, she heard the story of her adoption as a comforting, prepackaged myth. She believed that her biological parents had made the ultimate sacrifice in the hope of giving her a better life, that forever feeling slightly out of place was her fate as a transracial adoptee. But as Nicole grew up—facing prejudice her adoptive family couldn't see, finding her identity as an Asian American and as a writer, becoming ever more curious about where she came from—she wondered if the story she'd been told was the whole truth. With warmth, candor, and startling insight, Nicole Chung tells of her search for the people who gave her up, which coincided with the birth of her own child. All You Can Ever Know is a profound, moving chronicle of surprising connections and the repercussions of unearthing painful family secrets—vital reading for anyone who has ever struggled to figure out where they belong. Directed toward brown belt, this volume explains the forms required to be promoted to black belt. A special page on Korean counting is included. Rhee is known as "The Father of American Tae Kwon Do." Never tasteless and definitely not just for vegetarians, this cookbook celebrates tofu and will revolutionize the way we cook with it. Nutrient dense and a good source of protein and amino acids, tofu is also a valuable source of iron, calcium, manganese and phosphorus. Incredibly healthy and versatile, it has enjoyed a central place on dinner tables across Asia for centuries, but in the West has become synonymous with a bland meat-alternative. Tofu Tasty is full of inspiring dishes for cooking with different textures of tofu, including silken, dried, fermented, and crispy. With guidance on how to store, press, and make your own tofu, it's time to make tofu center stage—a dish in its own right. The original hyungs (forms) are part of Song Moo Kwan Taekwondo. Originally created by Grand Master Hyon, Jun Sun, they illustrate the personal protection perspective of the martial art, rather than a sport attitude. This second of three volumes introduces some background, techniques and the three of the seven hyungs. The displacement of Chou Wen-chung from his native China in 1948 forced him into Western-European culture. Ultimately finding his vocation as a composer, he familiarized himself with classical and contemporary techniques but interpreted these through his traditionally oriented Chinese cultural perspective. The result has been the composition of a unique body of repertoire that synthesizes the most progressive Western compositional idioms with an astonishingly traditional heritage of Asian approaches, not only from music, but also from calligraphy, landscape painting, poetry, and more. Chou's importance rests not only in his compositions, but also in his widespread influence through his extensive teaching career at Columbia University, where his many students included Bright Sheng, Zhou Long, Tan Dun, Chen Yi, Joan Tower, and many more. During his tenure at Columbia, he also founded the U.S.-China Arts Exchange, which continues to this day to be a vital stimulus for multicultural interaction. The volume will include an inventory of the Chou collection in the Paul Sacher Stiftung in Basel, Switzerland. In the past several decades, combustion has evolved from a scientific discipline that was largely empirical to one that is quantitative and predictive. These advances are characterized by the canonical formulation of the theoretical foundation; the strong interplay between theory, experiment, and computation; and the unified description of the roles of fluid mechanics and chemical kinetics. This graduate-level text incorporates these advances in a comprehensive treatment of the fundamental principles of combustion physics. The presentation emphasizes analytical proficiency and physical insight, with the former achieved through complete, though abbreviated, derivations at different levels of rigor, and the latter through physical interpretations of analytical solutions, experimental observations, and computational simulations. Exercises are mostly derivation in nature in order to further strengthen the student's mastery of the theory. Implications of the fundamental knowledge gained herein on practical phenomena are discussed whenever appropriate. These distinguishing features provide a solid foundation for an academic program in combustion science and

engineering. Each believing that their hue is the best, the three primary colors live in separate parts of the city until Yellow and Blue meet, fall in love, and decide to mix. Two previously unpublished collections by an important Chinese American poet depict daily life inside New York's Chinatown and across the Chinese diaspora during the 1960s and 70s Frances Chung's poetry stands alone as the most perceptive, aesthetically accomplished, and compassionate depiction of a supposedly impenetrable community during the late 1960s and 70s. Written "For the Chinatown People" and imprinted with Chung's own ink seal, Crazy Melon is collects brief poems and prose vignettes set in New York's Chinatown and Lower East Side. Chung incorporates Spanish and Chinese into her English in deft evocations of these neighborhoods' streets, fantasies, commerce, and toil. The title of her second collection, Chinese Apple, translates the Chinese word for pomegranate: there she offers "small crimson bites" of new themes and cityscapes — delightfully understated eroticism, tributes to other poets, impressions of other Chinese diasporic communities during her travels in Central America and Asia. Its new formal experiments show that Chung's poetic prowess continued to deepen before her early death. Publication of these two works will finally allow Chung's growing circle of admirers to experience the full range of her skills and sensibility, and will draw many others into that circle. Her poems are an inimitable synthesis of American urban vernacular and imagery, various East Asian and Spanish-language poetics, and a concern for ethnic and feminist cultural and political survival-in-writing that was so vital to American poets around the time that Chung first began to compose. Her always fresh perspective on the worlds around her smoothly shifts through multiple lenses, making wonderful use of her "power to dream in four languages." During World War II, Mom Chung's was the place to be in San Francisco. Soldiers, movie stars, and politicians gathered at her home to socialize, to show their dedication to the Allied cause, and to express their affection for Dr. Margaret Chung (1889-1959). The first known American-born Chinese female physician, Chung established one of the first Western medical clinics in San Francisco's Chinatown in the 1920s. She also became a prominent celebrity and behind-the-scenes political broker during World War II. Chung gained national fame when she began "adopting" thousands of soldiers, sailors, and flyboys, including Ronald Reagan, Admiral Chester W. Nimitz, and Admiral William F. Halsey, Jr. A pioneer in both professional and political realms, Chung experimented in her personal life as well. She adopted masculine dress and had romantic relationships with other women, such as writer Elsa Gidlow and entertainer Sophie Tucker. This is the first biography to explore Margaret Chung's remarkable and complex life. It brings alive the bohemian and queer social milieus of Hollywood and San Francisco as well as the wartime celebrity community Chung cultivated. Her life affords a rare glimpse into the possibilities of traversing racial, gender, and sexual boundaries of American society from the late Victorian era through the early Cold War period. Please note: This is a companion version & not the original book. Sample Book Insights: #1 I was a child when Vietnam fell to communism in 1975. My family was forced to flee and end up in Arkansas. In 1979, my family was half-dead from dehydration when we were rescued by a fishing boat packed with refugees lost in the middle of the South China Sea. #2 When my father was born in 1937, the world was about to erupt in a frenzy of violence that left no one untouched. Within ten years of his birth, fifty million human beings died. My father was born at a moment in history when the entire world was about to erupt in a frenzy of violence that left no one untouched. #3 My dad was a merchant in the Mekong Delta during the Vietnam War. One day, Khmer men came to his village and pointed at his head, saying they would cut off his head if he did not trade with them. #4 The world was about to erupt in a frenzy of violence that left no one untouched, when my father was born in 1937. Half a million human beings died within ten years of his birth. This unique volume presents a collection of the extensive journal publications written by Kai Lai Chung over a span of 70-odd years. It was produced to celebrate his 90th birthday. The selection is only a subset of the many contributions that he made throughout his prolific career. Another volume, Chance and Choice, published by World Scientific in 2004, contains yet another subset, with four articles in common with this volume. Kai Lai Chung's research contributions have had a major influence on several areas in probability. Among his most significant works are those related to sums of independent random variables, Markov chains, time reversal of Markov processes, probabilistic potential theory, Brownian excursions, and gauge theorems for the Schrödinger equation. As Kai Lai Chung's contributions spawned critical new developments, this volume also contains retrospective and perspective views provided by collaborators and other authors who themselves advanced the areas of probability and mathematics." Designed for students preparing for the SAT math exam, Dr. John Chung's SAT Math gives students a comprehensive guide of how to approach SAT questions with its 50 Perfect Tips. One lie snowballs into a full-blown double life in this irresistible story about an aspiring stand-up comedian. On the outside, Yumi Chung suffers from #shygirlproblems, a perm-gone-wrong, and kids calling her "Yu-MEAT" because she smells like her family's Korean barbecue restaurant. On the inside, Yumi is ready for her Netflix stand-up special. Her notebook is filled with mortifying memories that she's reworked into comedy gold. All she needs is a stage and courage. Instead of spending the summer studying her favorite YouTube comedians, Yumi is enrolled in test-prep tutoring to qualify for a private school scholarship, which will help in a time of hardship at the restaurant. One day after class, Yumi stumbles on an opportunity that will change her life: a comedy camp for kids taught by one of her favorite YouTube stars. The only problem is that the instructor and all the students think she's a girl named Kay Nakamura--and Yumi doesn't correct them. As this case of mistaken identity unravels, Yumi must decide to stand up and reveal the truth or risk losing her dreams and disappointing everyone she cares about. Chou Wen-chung is one of the most influential musical figures of our time. His rich cultural background, his studies with Edgard Var, and his interest in the genuine rapport between Eastern and Western musical traditions have been the major influences on his career. Although he is active in various artistic and cultural circles that include scholarship, education and cultural preservation, his major calling has always been composition. As a composer, Chou has created a group of works whose stylistic innovation and technical profundity are distinctive among composers of his generation. His music, which has received critical acclaim around the globe, documents his creative journey, especially in the realization of re-merger - the fusion of Eastern and Western music that has become a new mainstream in art music. Through extensive focus on sketch study, Eric Lai examines Chou's music to contribute to an understanding of his aesthetic orientation, his compositional technique, his role in the development of new music, and his influence upon the younger generation of composers. A little boy flexes his ninja chops in an uproarious adventure that finds him silently creeping through his home and overcoming formidable obstacles, like the coffee table, to pounce upon his unsuspecting father's tummy. A first picture book. In a biography woven from equal parts enchantment and mystery, master illusion designer and today's foremost magic historian, Jim Steinmeyer, unveils the astonishing secrets behind the enigmatic performer Chung Ling Soo, the "Marvelous Chinese Conjuror" — a magician whose life of intrigue and daring remains unparalleled to this day. He learned his art during a revolutionary era in show business, just as minstrel, circus, and variety saloons were being stirred together and distilled into a heady new concoction: vaudeville. Soo's infamous death in 1918 astonished the world: he was killed during a performance of "Defying the Bullets," his popular act in which he caught marked bullets on a porcelain plate. After his death, the deceptions began to unravel. It was discovered that he was not Chinese, but rather a fifty-six-year-old American named William Ellsworth Robinson, a former magicians' assistant, and the husband of Olive Robinson. But even William Robinson was not who he appeared to be, and for the first time, Jim Steinmeyer has uncovered the truth behind Robinson and the magic world's most glorious deception. Recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful business empires. Steers (management, Lundquist College of Business) discusses the influence of Confucianism on Chung's business practices, provides a comparison of Asian versus American business ideas, and highlights Chung's invaluable lessons on business strategy and his contributions to society. He includes interviews not only with Chung himself, but also with some of Hyundai's key executives. Contains 32 color photographs. Annotation copyrighted by Book News, Inc., Portland, OR "Social Justice Counseling is the next step toward alleviating the injustices faced by individuals in society and it is a natural extension of multicultural counseling. Issues of social justice are dominating conferences across the mental health disciplines, with a greater focus on alleviating broader social inequities such as equity, access and fairness for each individual. At a micro level social justice issues play out in the form of gender discrimination, sexual harassment, equal access to education, fair housing, and more. Traditionally counselors have been focused on the individual, however, in recent years there has been a shift for all mental health professionals to address issues of social class, race and ethnicity and more. This books offers a supplement to important issues regarding social justice and will highly enhance the content taught in multicultural courses. The authors are leading authorities on social justice counseling and have led the way to create a specialization in social justice counseling at their school at George Mason University. This book is the first to bring all these concepts together, tie them to multiculturalism, and offer personal applications and tools for mental health professionals. It is theoretical yet highly practical in offering concrete steps toward becoming more social justice oriented"--Provided by publisher. A RECOMMENDED BOOK FROM: Los Angeles Times * USA Today * O, the Oprah Magazine * BuzzFeed * The Rumpus * Entertainment Weekly * Elle * BBC * Christian Science Monitor * Electric Literature * The Millions * LitHub * Publishers Weekly * Kirkus * Refinery29 * Thrillist * BookBub * Nylon * Bustle * Goodreads An exhilarating, moving novel about a trailblazing mathematician whose research unearths her own extraordinary family story and its roots in World War II From the days of her childhood in the 1950s Midwest, Katherine knows she is different, and that her parents are not who they seem. As she matures from a girl of rare intelligence into an exceptional mathematician, traveling to Europe to further her studies, she must face the most human of problems—who is she? What is the cost of love, and what is the cost of ambition? These questions grow ever more entangled as Katherine strives to take her place in the world of higher mathematics and becomes involved with a brilliant and charismatic professor. When she embarks on a quest to conquer the Riemann hypothesis, the greatest unsolved mathematical problem of her time, she turns to a theorem with a mysterious history that may hold both the lock and the key to her identity, and to secrets long buried during World War II. Forced to confront some of the most consequential events of the twentieth century and rethink everything she knows of herself, she finds kinship in the stories of the women who came before her, and discovers how seemingly distant stories, lives, and ideas are inextricably linked to her own. The Tenth Muse is a gorgeous, sweeping tale about legacy, identity, and the beautiful ways the mind can make us free. Cursed Bunny is a genre-defying collection of short stories by Korean author Bora Chung. Blurring the lines between magical realism, horror, and science-fiction, Chung uses elements of the fantastic and surreal to address the very real horrors and cruelties of patriarchy and capitalism in modern society. Anton Hur's translation skilfully captures the way Chung's prose effortlessly glides from being terrifying to wryly humorous. Winner of a PEN/Heim Grant. 107936 This volume details the Yew Chung Approach and the Twelve Values that exemplify the approach as a unique contribution to the field of early childhood education. The Yew Chung Education Foundation (YCEF) in Hong Kong is a nonprofit organization and a high-quality early childhood program that promotes a global lens and multilingualism through an emergent curriculum. This book explores the Twelve Values that exemplify the approach, including relationships, the emergent curriculum, inquiry-based pedagogy, and the multilingual and multicultural approach. Grounding these values in daily classroom practice and the broader sociocultural context of Hong Kong, it shows how the Yew Chung Approach effectively supports additional language learning

through a progressive emergent curriculum with a high degree of child agency. It also explores the unique history of Hong Kong as an incubator and setting for the Yew Chung Approach and considers the relationships between the colonial history of the city, Hong Kong's current status as a global city, and the mission of Yew Chung to provide children with a global lens. An important study which exemplifies and investigates a unique program and perspective within the field, this book will benefit scholarly and practitioner audiences within the global early childhood community, as well as appealing to academics, researchers and postgraduates working within early childhood education, comparative education, and bilingual education. Alexa Chung's IT: the Top Ten Bestseller from the international fashion muse and Vogue contributing editor Now a Penguin paperback, this one-off collection of Alexa Chung's writing, doodles and photographs combines stories of early style inspirations such as her grandpa and the Spice Girls with discussion of figures of obsession like Jane Birkin and Annie Hall, reflecting on heartbreak, how to get dressed in the morning, the challenges of taking a good selfie, and more. Interspersed with pages from Alexa's notebooks and many a photo of a good night out, It is now perfectly sized for any bag - handbag or otherwise. Witty, charming and with a refreshingly down-to-earth attitude, It is a must-have for anyone who loves fashion, worries about growing up, or loves just about everything Alexa Chung. 'If you love Alexa Chung, buy it. If you are interested in fashion and style, buy it. If you're after a book full of pretty pictures and inspo, buy it' - Cosmopolitan Alexa Chung is a model and contributing editor to British Vogue. The recipient of numerous style awards, Alexa has won the prestigious British Style Award (voted for by the public) three years in a row. She currently lives in New York City.
