But Enough About You Jan 17 2020 An extraordinary wide-ranging collection of essays with “distinctive wordplay and quirky opinions...Christopher Buckley is good company whether you’re looking for two quick pages and a smile, or want to linger” (The New York Times Book Review). Christopher Buckley, like his terrific volume *But Enough About You*, contains multitudes. Tackling subjects ranging from “How to Teach Your Four-Year-Old to Ski” to “A Short History of the Bug Zapper,” and “The Art of Sacking” to literary friendships with Joseph Heller and Christopher Hitchens, he is at once a humorous storyteller, astute cultural critic, adventurous traveler, and irreverent historian. Reading these essays is the equivalent of being in the company of a tremendously witty and enlightening companion. Praised as “both deeply informed and deeply funny” by The Wall Street Journal, Buckley will have you laughing and reflecting in equal measure. This is a rare combination of big ideas and truly fun writing.

The Hedgehog and the Fox Oct 06 2021 "The fox knows many things, but the hedgehog knows one big thing." This ancient Greek aphorism, preserved in a fragment from the poet Archilochus, describes the central thesis of Isaiah Berlin's masterly essay on Leo Tolstoy and the philosophy of history, the subject of the epilogue to *War and Peace*. Although there have been many interpretations of the adage, Berlin uses it to mark a fundamental distinction between human beings who are fascinated by the infinite variety of things and those who relate everything to a central, all-embracing system. Applied to Tolstoy, the saying illuminates a paradox that helps explain his philosophy of history: Tolstoy was a fox, but believed in being a hedgehog. One of Berlin's most celebrated works, this extraordinary essay offers profound insights about Tolstoy, historical understanding, and human psychology. This new edition features a revised text that supplants all previous versions, English translations of the many passages in foreign languages, a new foreword in which Berlin biographer Michael Ignatieff explains the enduring appeal of Berlin's essay, and a new appendix that provides rich context, including excerpts from reviews and Berlin's letters, as well as a startling new interpretation of Archilochus's epigram.

Can You Tolerate This? Aug 16 2022 A dazzling—and already prizewinning—collection of essays on youth and aging, ambition and disappointment, Katherine Mansfield tourism and New Zealand punk rock, and the limitations of

the body. Youth and frailty, ambition and anxiety, the limitations of the body and the challenges of personal transformation: these are the undercurrents that animate acclaimed poet Ashleigh Young's first collection of essays. In *Can You Tolerate This?*—the title comes from the question chiropractors ask to test a patient's pain threshold—Young ushers us into her early years in the faraway yet familiar landscape of New Zealand: fantasizing about Paul McCartney, cheering on her older brother's fledgling music career, and yearning for a larger and more creative life. As Young's perspective expands, a series of historical portraits—a boy who grew new bone wherever he was injured, an early French postman who built a stone fortress by hand, a generation of Japanese shut-ins—strike unexpected personal harmonies, as an unselfconscious childhood gives way to painful shyness in adolescence. As we watch Young fall in and out of love, undertake an intense yoga practice that masks an eating disorder, and gradually find herself through her writing, a highly particular psyche comes into view: curious, tender, and exacting in her observations of herself and the world around her. *Can You Tolerate This?* presents a vivid self-portrait of an introspective yet widely curious young woman, the colorful, isolated community in which she comes of age, and the uneasy tensions—between safety and risk, love and solitude, the catharsis of grief and the ecstasy of creation—that define our lives.

Thinking Ahead - Essays on Big Data, Digital Revolution, and Participatory Market Society Jan 21 2023 The rapidly progressing digital revolution is now touching the foundations of the governance of societal structures. Humans are on the verge of evolving from consumers to prosumers, and old, entrenched theories – in particular sociological and economic ones – are falling prey to these rapid developments. The original assumptions on which they are based are being questioned. Each year we produce as much data as in the entire human history - can we possibly create a global crystal ball to predict our future and to optimally govern our world? Do we need wide-scale surveillance to understand and manage the increasingly complex systems we are constructing, or would bottom-up approaches such as self-regulating systems be a better solution to creating a more innovative, more successful, more resilient, and ultimately happier society? Working at the interface of complexity theory, quantitative sociology and Big Data-driven risk and knowledge management, the author advocates the establishment of new participatory systems in our digital society to enhance coordination, reduce conflict and, above all, reduce the “tragedies of the commons,” resulting from the methods now used in political, economic and management decision-making. The author Physicist Dirk Helbing is Professor of Computational Social Science at the Department of Humanities, Social and Political Sciences and an affiliate of the Computer Science Department at ETH Zurich, as well as co-founder of ETH's Risk Center. He is internationally known for the scientific coordination of the FuturICT Initiative which focuses on using smart data to understand techno-socio-economic systems. “Prof. Helbing has produced an insightful and important set of essays on the ways in which big data and complexity science are changing our understanding of ourselves and our society, and potentially allowing us to manage our societies much better than we are currently able to do. Of special note are the essays that touch on the promises of big data along with the dangers...this is material that we should all become familiar with!” Alex Pentland, MIT, author of *Social Physics: How Good Ideas Spread - The Lessons From a New Science* “Dirk Helbing has established his reputation as one of the leading scientific thinkers on the dramatic impacts of the digital revolution on our society and economy. *Thinking Ahead* is a most stimulating and provocative set of essays which deserves a wide audience.” Paul Ormerod, economist, and author of *Butterfly Economics* and *Why Most Things Fail*. “It is becoming increasingly clear that many of our institutions and social structures are in a bad way and urgently need fixing. Financial crises, international conflicts, civil wars and terrorism, inaction on climate change, problems of poverty, widening economic inequality, health epidemics, pollution and threats to digital privacy and identity are just some of the major challenges that we confront in the twenty-first century. These issues demand new and bold thinking, and that is what Dirk Helbing offers in this collection of essays. If even a fraction of these ideas pay off, the consequences for global governance could be significant. So this is a must-read book for anyone concerned about the future.” Philip Ball, science writer and author of *Critical Mass* “This collection of papers, brought together by Dirk Helbing, is both timely and topical. It raises concerns about Big Data, which are truly frightening and disconcerting, that we do need to be aware of; while at the same time offering some hope that the technology, which has created the previously unthought-of dangers to our privacy, safety and democracy can be the means to address these dangers by enabling social, economic and political participation and coordination, not possible in the past. It makes for compelling reading and I hope for timely action.” Eve Mitleton-Kelly, LSE, author of *Corporate Governance and Complexity Theory* and editor of *Co-evolution of Intelligent Socio-technical Systems*

Out There Mar 11 2022 When one opens the pages to this book they step into another world and place, and even on occasions, another time. No matter what you may know about the lower Big Bend or think you know about the lower Big Bend, here are thoughts, maps and photographs that bring together a heretofore unachieved mosaic of this rugged, lonesome land. In effect, 'Out There' is a work that others simply cannot compare to. Whether you might be a first-time visitor or have made many a journey into its more remote environs, there is so much contained within to both see as well as savor. It is a book meant not for sitting on a shelf and gathering dust, but one to be read and re-read time and again. If home is where the heart is, even the first few paragraphs leave no doubt as to where the author's resides. And that is only the beginning?

The Economics of Big Science Jun 14 2022 The essays in this open access volume identify the key ingredients for success in capitalizing on public investments in scientific projects and the development of large-scale research infrastructures. Investment in science – whether in education and training or through public funding for developing new research tools and technologies – is a crucial priority. Authors from big research laboratories/organizations, funding agencies and academia discuss how investing in science can produce societal benefits as well as identifying future challenges for scientists and policy makers. The volume cites different ways to assess the socio-economic impact of Research Infrastructures and their role as hubs of global collaboration, creativity and innovation. It highlights the different benefits stemming from fundamental research at the local, national and global level, while also inviting us to rethink the notion of “benefit” in the 21st century. Public investment is required to maintain the pace of technological and scientific advancements over the next decades. Far from advocating a radical transformation and massive expansion in funding, the authors suggest ways for maintaining a strong foundation of science and research to ensure that we continue to benefit from the outputs. The volume draws inspiration from the first “Economics of Big Science” workshop, held in Brussels in 2019 with the aim of creating a new space for dialogue and interaction between representatives of Big Science organizations, policy makers and academia. It aspires to provide useful reading for policy makers, scientists and students of science, who are increasingly called upon to explain the value of fundamental research and adopt the language and logic of economics when engaging in policy discussions.

The Big Field May 21 2020 From the #1 New York Times bestselling author of *Heat*, *Travel Team* and *Million-Dollar Throw*. Playing shortstop is a way of life for Hutch—not only is his hero, Derek Jeter, a shortstop, but so was his father, a former local legend turned pro. Which is why having to play second base feels like demotion to second team. Yet that's where Hutch ends up after Darryl "D-Will" Williams, the best shortstop prospect since A-Rod, joins the team. But Hutch is nothing if not a team player, and he's cool with playing in D-Will's shadow—until, that is, the two shortstops in Hutch's life betray him in a way he never could have imagined. With the league championship on the line, just how far is Hutch willing to bend to be a good teammate?

Where the Tiny Things Are Sep 05 2021 In this collection of longer essays nested within brief, lyrical meditations, each piece focuses on some micro aspect of everyday life as a means of exploring complex macro systems; families, dinner parties, vineyards, deserts, nations. For example, Walker's own experience as the mother of a micropremie (a baby born weighing less than one pound, twelve ounces, or before twenty-six weeks gestation), the smallest thing in the world, spurs an exploration of, among other things, the economics of health care, the causes of premature births, and the ethics of extreme interventions. *Where the Tiny Things Are* is a book of ideas and an exploration of science. It is of the world and of the heart, both intensely personal and expansively empathetic.

Things Big and Little Jun 02 2021 Excerpt from *Things Big and Little: Essays and Sketches* Here, for instance, is a Pirate Ilond by a Littleman of twelve. In this admirably-drawn chart there are two islands, with a broad channel running between them. In this channel, and on the two oceans which it connects, there are all manner of ships, from the 'pirates' training ships' to majestic full-rigged galleons engaged in battle, and all manner of fish, including eels, u sharks, whales, Strange fish, and Lulla fish. What exactly a Lulla fish is I do not know; but it looks even stranger than the Strange fish - a terrible species of leviathan indeed. In one corner of the chart a whirlpool is vividly suggested; while here is a group of rocks that draw ships to their destruction. Here again is good anchorage, and here fishes do ?y. On one of the islands there is a gorgeous King's Palace on the other the pirates have built themselves a noble castle; while among many other interesting features ashore are smiths at work pirates hiding gold. The Big Somewhere Aug 04 2021 James Ellroy's identity as a crime writer is rooted in his extraordinary life story and relationship with his home city of Los Angeles. Beginning with the unsolved murder of his mother, Geneva Hilliker Ellroy, in 1958, Ellroy's early life played a large role in shaping his obsessions with murder, the criminal underworld of L.A. and the redemptive power of the feminine. Ellroy's life could be seen as a brutal, visceral and emotionally exhausting realisation of the American Dream, a theme he has explored in his writing to the extent that he is credited with reinventing crime fiction. *The Big Somewhere: Essays on James Ellroy's Noir World* is an in-depth, scholarly study of the work of James Ellroy, featuring leading Ellroy scholars such as Anna Flügge, Jim Mancall and Rodney Taveira. Moving from Ellroy's early detective novels to his later epic works of historical fiction, it explores how Ellroy found his place in the history of the genre by building on, and then surpassing, the works of authors who influenced him such as Dashiell Hammett, Raymond Chandler and Joseph Wambaugh. It also examines Ellroy's impact on contemporary writers and on the cultural perception of L.A., which has been his legacy through the L.A. Quartet novels. The 'Big Somewhere' is not a geographical location, but a conglomeration of the cinematic, historical and fictional worlds that influenced Ellroy, from film noir to the Kennedy era in American politics, and on which he, in turn, has left his mark.

Paragraphs and Essays: With Integrated Readings Mar 31 2021 PARAGRAPHS AND ESSAYS WITH INTEGRATED READINGS is the higher-level companion to SENTENCES, PARAGRAPHS, AND BEYOND in the two-book Brandon series. Instruction in this text -- comprehensive, flexible, and relevant -- is predicated on the idea that reading and writing are linked and that good writing is the product of revision and rigorous editing. The hallmarks of the Brandons' books are tell-show-engage instruction, ample demonstrations of good professional and student writing, and an abundance of reading-based, high-interest general, cross-curricular, and career-related topics and prompts. The reading-based writing presented in this book provides experience in critical thinking that enables students to write competently across the disciplines and transition smoothly to the next level of the English program. Don't Let It Get You Down Apr 19 2020 A "brutal, beautifully rendered" (The New York Times Book Review) collection of essays that offers poignant reflections on living between society's most charged, politicized, and intractable polar spaces—between black and white, rich and poor, thin and fat. Savala Nolan knows what it means to live in the in-between. Descended from a Black and Mexican father and a white mother, Nolan's mixed-race identity is obvious, for better and worse. At her mother's encouragement, she began her first diet at the age of three and has been both fat and painfully thin throughout her life. She has experienced both the discomfort of generational poverty and the ease of wealth and privilege. It is these liminal spaces—of race, class, and body type—that the essays in *Don't Let It Get You Down* excavate, presenting a clear and nuanced understanding of our society's most intractable points of tension. The twelve essays that comprise this collection are rich with "gorgeous prose" (Nadia Owusu, author of *Aftershocks*) and are as humorous and as full of Nolan's appetites as they are of anxiety. The result is lyrical and magnetic. In "On Dating White Guys While Me," Nolan realizes her early romantic pursuits of rich, preppy white guys weren't about preference but about self-erasure. In the titular essay "Don't Let it Get You Down," we traverse the cyclical richness and sorrow of being Black in America as Black children face police brutality, "large Black females" encounter unique stigma, and Black men carry the weight of other people's fear. In "Bad Education," we see how women learn to internalize rage and accept violence to participate in our own culture. And in "To Wit and Also," we meet Filliss, Grace, and Peggy, the enslaved women owned by Nolan's white ancestors, reckoning with the knowledge that America's original sin lives intimately within our present stories. Over and over again, Nolan reminds us that our true identities are often most authentically lived not in the black and white, but in the grey of the in-between. Perfect for fans of *Heavy* by Kiese Laymon and *Bad Feminist* by Roxane Gay, *Don't Let It Get You Down* delivers a "deeply personal insight" (Layla F. Saad, New York Times bestselling author of *Me and White Supremacy*) on race, class, bodies, and gender in America today.

The Big Bang and Relative Immortality Jan 29 2021 "This series of brief and sparkling philosophical essays explores the Principle of Continuity as it impacts discussions of the Big Bang and the expansion of the universe, God, infinity, biological immortality and evolution. From Ancient Greece to the frontiers of modern science, some egregious blunders have been made in both philosophy and in theoretical physics. The old theory of Continuous Creation was blown up by the Big Bang theory, but the author shows that this is just another ontological quagmire that conflicts with the First Law of Thermodynamics (conservation)--and common sense. Surveying scientific principles, he discerns where they can and cannot illuminate our understanding."--Publisher's website.

Up Up, Down Down Jul 23 2020 For fans of John Jeremiah Sullivan and Wells Tower, a “glittering,” (Leslie Jamison), “always smart, often hilarious, and ultimately transcendent” (Anthony Doerr) linked essay collection from the managing editor of Tin House that brilliantly explores the nature of identity. Daring and wise, hilarious and tender, Cheston Knapp’s exhilarating collection of seven linked essays, Up Up, Down Down, tackles the Big Questions through seemingly unlikely avenues. In his dexterous hands, an examination of a local professional wrestling promotion becomes a meditation on pain and his relationship with his father. A profile of UFO enthusiasts ends up probing his history in the church and, more broadly, the nature and limits of faith itself. Attending an adult skateboarding camp launches him into a virtuosic analysis of nostalgia. And the shocking murder of a neighbor expands into an interrogation of our culture’s prevailing ideas about community and the way we tell the stories of our lives. Even more remarkable, perhaps, is the way he manages to find humanity in a damp basement full of frat boys. Taken together, the essays in Up Up, Down Down amount to a chronicle of Knapp’s coming-of-age, a young man’s journey into adulthood, late-onset as it might appear. He presents us with formative experiences from his childhood to marriage that echo throughout the collection, and ultimately tilts at what may be the Biggest Q of them all: what are the hazards of becoming who you are? With “an ordnance of wit” (Wells Tower) and “a prose style that feels both extravagant and exact, and a big, booming heart” (Maggie Nelson), Up Up, Down Down signals the arrival of a truly one-of-a-kind voice.

Big Reader Dec 20 2022 A book about memory, loss, and a love of books from one of Canada's finest essayists Ever since childhood, Susan Olding has been a big reader, never without a book on the go. Not surprising, then, that she turns to the library to read her own life. From the dissolution of her marriage to the forging of a tentative relationship with her new partner's daughter, from discovering Toronto as a young undergrad to, years later, watching her mother slowly go blind: through every experience, Olding crafts exquisite, searingly honest essays about what it means to be human, to be a woman--and to be a reader. Big Reader is a brilliant, achingly beautiful collection about the slipperiness of memory and identity, the enduring legacy of loss, and the nuanced disappointments and joys of a reading life.
