National Park Service archeologists, architects, curators, historians, and other cultural resource professionals work in America's nearly 400 national parks to preserve, protect, and share the history of this land and its people. This beautiful book has been expertly written and illustrated with stunning photographs of America's diverse and wonderful parks. This folder contains information about national parks in South Australia, including some management proposals of a couple of South Australia's national parks. Also included is a document outlining the relevance of the English national park system to South Australia. Bestselling author David Gessner's wilderness road trip inspired by America's greatest conservationist, Theodore Roosevelt, is "a rallying cry in the age of climate change" (Robert Redford). "Leave it as it is," Theodore Roosevelt announced while viewing the Grand Canyon for the first time. "The ages have been at work on it and man can only mar it." Roosevelt's pronouncement signaled the beginning of an environmental fight that still wages today. To reconnect with the American wilderness and with the president who courageously protected it, acclaimed nature

writer and New York Times bestselling author David Gessner embarks on a great American road trip guided by Roosevelt's crusading environmental legacy. Gessner travels to the Dakota badlands where Roosevelt awakened as a naturalist; to Yellowstone, Yosemite, and the Grand Canyon where Roosevelt escaped during the grind of his reelection tour; and finally, to Bears Ears, Utah, a monument proposed by Native Tribes that is currently embroiled in a national conservation fight. Along the way, Gessner questions and reimagines Roosevelt's vision for today's lands. "Insightful, observant, and wry," (BookPage) Leave It As It Is offers an arresting history of Roosevelt's pioneering conservationism, a powerful call to arms, and a profound meditation on our environmental future. companion. On the centennial of the National Park Service, this richly illustrated book offers invaluable advice on exploring America's national park system. The book delves into issues affecting an array of parks: the iconic western national parks like Yellowstone; the urban parks such as Golden Gate National Recreation Area; historic sites including the Statue of Liberty National Monument and Gettysburg National Military Park; and cultural areas like Mesa Verde National Park that are among America's over 400 national parks. Twenty-three essays from contributing authors with deep personal and professional connections to the national parks serve as expert guides to places in the park system where: much of the nation's biological and cultural diversity is represented; ideas such as freedom, civil rights, and conservation were conceived; vast wilderness offers solitude and reflection; storied landscapes preserve a sense of place; the balance between recreation and preservation is tested; research and learning engage the next generation; the dynamics of nature are being shaped by a changing climate; and innovations in technology, sustainability, and stewardship provide a sense of purpose and hope. Explore America's 60 amazing national parks! From Acadia's seaside cliffs and coves to Zion's enchanting red valleys, you'll discover wolf-howling, water-rushing, lava-exploding, heart-racing destinations. Hundreds of color photos present the sprawling beauty of the U.S.'s fifty-six national parks, while text and color maps and diagrams describe the geology and ecology that shape them. "Parks has burst through every known convention to invent a new theatrical language, like a jive Samuel Beckett, while exploding American cultural myths and stereotypes along the way.... She's passionate and jokey and some kind of genius."--Vogue An intimate and candid account of our national parks and their strengths, vulnerabilities, and essential role in American life Part memoir, part critique, and paean to the value of national parks, American Covenant distills the experience and insights from two long careers in conservation. Michael A. Soukup and Gary E. Machlis show how the national parks are essential to maintaining the essence of our national heritage, and key to America's future in a changing climate and political landscape. Sharing real-world examples of both victories and defeats in protecting national parks, this candid, thoughtful book reminds us that the national parks are a promise--a covenant--within and between generations of Americans. The book is also a call to revitalize, reconstitute, reconfigure, and reform the National Park Service, which the authors believe is governed too much by outdated management practices and politics instead of a foundation of expertise and science. "In this remarkable journey, Mark Woods captures the essence of our National Parks: their serenity and majesty, complexity

and vitality--and their power to heal." --Ken Burns Many childhood summers, Mark Woods piled into a station wagon with his parents and two sisters and headed to America's national parks. Mark's most vivid childhood memories are set against a backdrop of mountains, woods, and fireflies in places like Redwood, Yosemite, and Grand Canyon national parks. On the eve of turning fifty and a little burned-out, Mark decided to reconnect with the great outdoors. He'd spend a year visiting the national parks. He planned to take his mother to a park she'd not yet visited and to re-create his childhood trips with his wife and their iPad-generation daughter. But then the unthinkable happened: his mother was diagnosed with cancer, given just months to live. Mark had initially intended to write a book about the future of the national parks, but Lassoing the Sun grew into something more: a book about family, the parks, the legacies we inherit and the ones we leave behind. America's national parks spring from an idea as radical as the Declaration of Independence: that the nation's most magnificent and sacred places should be preserved, not for royalty or the rich, but for everyone. In this evocative and lavishly illustrated narrative, Ken Burns and Dayton Duncan delve into the history of the park idea, from the first sighting by white men in 1851 of the valley that would become Yosemite and the creation of the world's first national park at

Yellowstone in 1872, through the most recent additions to a system that now encompasses nearly four hundred sites and 84 million acres. The authors recount the adventures, mythmaking, and intense political battles behind the evolution of the park system, and the enduring ideals that fostered its growth. They capture the importance and splendors of the individual parks: from Haleakala in Hawaii to Acadia in Maine, from Denali in Alaska to the Everglades in Florida, from Glacier in Montana to Big Bend in Texas. And they introduce us to a diverse cast of compelling characters—both unsung heroes and famous figures such as John Muir, Theodore Roosevelt, and Ansel Adams—who have been transformed by these special places and committed themselves to saving them from destruction so that the rest of us could be transformed as well. The National Parks is a glorious celebration of an essential expression of American democracy. Acclaimed as a fundamental resource on the creation, development, and management of America's national park system, this documentary collection is now in paperback for use by students and individual scholars. Many national parks and monuments tell unique stories of the struggle between the rights of native peoples and the wants of the dominant society. These stories involve our greatest parks—Yosemite, Yellowstone, Mesa Verde, Glacier, the Grand Canyon, Olympic, Everglades—as well as less celebrated parks elsewhere. In *American Indians and National Parks*, authors Robert Keller and Michael Turek relate these untold tales of conflict and collaboration. *American Indians and National Parks* details specific relationships between native peoples and national parks, including land claims, hunting rights, craft sales, cultural interpretation, sacred sites, disposition of cultural artifacts, entrance fees, dams, tourism promotion, water rights, and assistance to tribal parks. Beginning with a historical account of Yosemite and Yellowstone, *American Indians and National Parks* reveals how the creation of the two oldest parks affected native peoples and set a pattern for the century to follow. Keller and Turek examine the evolution of federal policies toward land preservation and explore provocative issues surrounding

park/Indian relations. When has the National Park Service changed its policies and attitudes toward Indian tribes, and why? How have environmental organizations reacted when native demands, such as those of the Havasupai over land claims in the Grand Canyon, seem to threaten a national park? How has the Park Service dealt with native claims to hunting and fishing rights in Glacier, Olympic, and the Everglades? While investigating such questions, the authors traveled extensively in national parks and conducted over 200 interviews with Native Americans, environmentalists, park rangers, and politicians. They meticulously researched materials in archives and libraries, assembling a rich collection of case studies ranging from the 19th century to the present. In *American Indians and National Parks*, Keller and Turek tackle a significant and complicated subject for the first time, presenting a balanced and detailed account of the Native-American/national-park drama. This book will prove to be an invaluable resource for policymakers, conservationists, historians, park visitors, and others who are concerned about preserving both cultural and natural resources. Explore all 59 of America's National Parks with this inspirational coffee table book. Beautiful landscape photography and wildlife illustrations will wow readers. Practical ideas on where to stay and what to do help readers plan visits, and detailed itineraries make it easy. A wonderful introduction to America's National Parks for all the family. On January 1 of 2016,

Stefanie Payne, a creative professional working at NASA Headquarters, and Jonathan Irish, a photographer with National Geographic, left their lives in Washington, D.C. and hit the open road on an expedition to explore and document all 59 of America's national parks during the centennial celebration of the U.S. National Park Service - 59 parks in 52 weeks - the Greatest American Road Trip. Captured in more than 300,000 digital photographs, written stories, and videos shared by the national and international media, their project resulted in an incredible view of America's National Park System seen in its 100th year. 'A Year in the National Parks, The Greatest American Road Trip' is a gorgeous visual journey through our cherished public lands, detailing a rich tapestry of what makes each park special, as seen along an epic journey to visit them all within one special celebratory year. The mythology of "gifted land" is strong in the Park Service, but some of our greatest parks were "gifted" by people who had little if any choice in the matter. Places like the Grand Canyon's south rim and Glacier had to be bought, finagled, borrowed -- or taken by force -- when Indian occupants and owners resisted the call to contribute to the public welfare. The story of national parks and Indians is, depending on perspective, a costly triumph of the public interest, or a bitter betrayal of America's native people. In *Indian Country, God's Country* historian Philip Burnham traces the complex relationship between Native Americans and the

national parks, relating how Indians were removed, relocated, or otherwise kept at arm's length from lands that became some of our nation's most hallowed ground. Burnham focuses on five parks: Glacier, the Badlands, Mesa Verde, the Grand Canyon, and Death Valley. Based on archival research and extensive personal visits and interviews, he examines the beginnings of the national park system and early years of the National Park Service, along with later Congressional initiatives to mainstream American Indians and expand and refurbish the parks. The final chapters visit the parks as they are today, presenting the thoughts and insights of superintendents and rangers, tribal officials and archaeologists, ranchers, community leaders, curators, and elders. Burnham reports on hard-won compromises that have given tribes more autonomy and greater cultural recognition in recent years, while highlighting stubborn conflicts that continue to mark relations between tribes and the parks. *Indian Country, God's Country* offers a compelling -- and until now untold -- story that illustrates the changing role of the national parks in American society, the deep ties of Native Americans to the land, and the complicated mix of commerce, tourism, and environmental preservation that characterize the parks system. Anyone interested in Native American culture and history, the history of the American West, the national park system, or environmental history will find it a fascinating and engaging work.

During the 1930s, the state park movement and the National Park Service expanded public access to scenic American places, especially during the era of the New Deal. However, under severe Jim Crow restrictions in the South, African Americans were routinely and officially denied entrance to these supposedly shared sites. *Landscapes of Exclusion* presents the first-ever study of segregation in southern state parks, underscoring the profound disparity that persisted for decades in the Jim Crow South. *The National Parks: An American Legacy* tells the story of the parks through the photography of Ian Shive and poignant essays by today's leading naturalists, scientists, explorers, and artists. From the cascading waterfalls of Yosemite to the unique geothermal features of Yellowstone, the US national parks are among the most breathtaking destinations in the world. Founded to preserve such natural beauty for posterity, the national parks represent one of America's crowning achievements and international treasures. *The National Parks: An American Legacy* tells the story of the parks through the photography of Ian Shive, today's leading national park photographer, as well as through poignant essays by conservancy groups from across the country. Timed to coincide with the celebration of the 100-year anniversary of the National Park Service, this lavish volume reveals the grandeur and history of the parks and looks toward what the next 100 years will bring. With more than 200 never-before-seen images of the

national parks—including Yellowstone, Yosemite, and the Grand Canyon—as well as images from many of the 400-plus national park units, this striking collection is comprehensive and inspiring. *The National Parks: An American Legacy* reveals the way humankind interacts with the parks and how the story of the national parks is also a tribute to the people who visit, explore, and tirelessly work to preserve these cherished American landscapes. National Book Award finalist Elizabeth Partridge reveals the life and work of Frederick Law Olmsted, the designer of Central Park, the United States Capitol building's landscape, and more. Nobody could get Frederick Law Olmsted to sit still. He was filled with energy, adventure, and dreams of changing the world. As a boy, he found refuge in the peace and calm of nature, and later as an adult, he dreamed of designing and creating access to parks for a growing and changing America. When New York City held a contest for the best park design for what would become Central Park, Olmsted won and became the father of landscape architecture. He went on to design parks across America, including Yosemite National Park and even the grounds for the United States Capitol. This scenic biography is lavishly illustrated by Becca Stadlander, and National Book Award finalist Elizabeth Partridge brings her renowned lyricism and meticulous research to the visionary who brought parks to the people. America's national parks and historical sites embody the American spirit. They are windows

to our past, homes to some of our rarest plants and animal species, and places where every American can go to find inspiration, peace, and open space. From the iron rails of Steamtown, Pennsylvania to the wilds of Yellowstone, America's natural parks preserve our culture in as much as they shield our natural world from our own encroachment. *The National Parks: Our American Landscape* presents a wonderfully updated photographic survey of one of America's greatest national treasures. Seen through the eyes of the National Parks Conservation Association's photographer Ian Shive, America's National Park System come to life through a collection of more than 200 new photographs. Shive's stunning work demonstrates the diversity and awe inspiring beauty of the American wild lands covering the major United States parks from the warm waters of Biscayne, Florida to icy summit of Mt. McKinley in Denali National Park, Alaska. Essentially a phenomenon of the twentieth century, America's pioneering state park movement has grown rapidly and innovatively to become one of the most important forces in the preservation of open spaces and the provision of public outdoor recreation in the country. During this time, the movement has been influenced and shaped by many factors—social, cultural, and economic—resulting in a wide variety of expressions. While everyone agrees that the state park movement has been a positive and beneficial force on the whole, there seems to be

an increasing divergence of thought as to exactly what direction the movement should take in the future. In *The State Park Movement in America*, Ney Landrum, recipient of almost two dozen honors and awards for his service to state and national parks, places the movement for state parks in the context of the movements for urban and local parks on one side and for national parks on the other. He traces the evolution of the state park movement from its imprecise and largely unconnected origins to its present status as an essential and firmly established state government responsibility, nationwide in scope. Because the movement has taken a number of separate, but roughly parallel, paths and produced differing schools of thought concerning its purpose and direction, Landrum also analyzes the circumstances and events that have contributed to these disparate results and offers critical commentary based on his long tenure in the system. As the first study of its kind, *The State Park Movement in America* will fill a tremendous void in the literature on parks. Given that there are more than five thousand state parks in the United States, compared with fewer than five hundred national parks and historic sites, this history is long overdue. It will be of great interest to anyone concerned with federal, state, or local parks, as well as to land resource managers generally. America's national parks are breathing spaces in a world in which such spaces are steadily disappearing, which is why more than 300 million people visit

the parks each year. Now Terry Tempest Williams, the author of the environmental classic *Refuge* and the beloved memoir *When Women Were Birds*, returns with *The Hour of Land*, a literary celebration of our national parks, an exploration of what they mean to us and what we mean to them. From the Grand Tetons in Wyoming to Acadia in Maine to Big Bend in Texas and more, Williams creates a series of lyrical portraits that illuminate the unique grandeur of each place while delving into what it means to shape a landscape with its own evolutionary history into something of our own making. Part memoir, part natural history, and part social critique, *The Hour of Land* is a meditation and a manifesto on why wild lands matter to the soul of America. His white teacher tells her all-black class, "You'll all wind up porters and waiters. What did she know?" Gordon Parks is most famous for being the first black director in Hollywood. But before he made movies and wrote books, he was a poor African American looking for work. When he bought a camera, his life changed forever. He taught himself how to take pictures and before long, people noticed. His success as a fashion photographer landed him a job working for the government. In Washington DC, Gordon went looking for a subject, but what he found was segregation. He and others were treated differently because of the color of their skin. Gordon wanted to take a stand against the racism he observed. With his camera in hand, he found a way. Told through lyrical verse and

atmospheric art, this is the story of how, with a single photograph, a self-taught artist got America to take notice. Exhibition orientation booklet. An illustrated guide to the nation's national parks takes readers from the depths of the Grand Canyon to the icy slopes of Glacier Bay in Alaska. The book is a coast to coast journey featuring 18 of our most visited national parks, six as stunning double page pop-ups: Everglades, Great Smoky Mountains, Grand Canyon, Yellowstone, Glacier

and Yosemite national parks. Pop-up paper engineering is created by Bruce Foster, designer of 40 pop-up books, including the amazing Harry Potter pop-up book. The pop-up illustrations by Dave Ember are in the style of the WPA 1930s posters. 13 of these historic posters are faithfully reproduced in the book, courtesy of the Library of Congress. Fascinating park action springs to life in cleverly designed mini-booklet pops. See two bear cubs scrambling up a tree to safety, an alligator charging its prey, a dory boat crashing through the rapids of the Colorado River, a red jammer tour bus coming out of a mountain tunnel, Old Faithful Geyser erupting 13 inches above the page, and a mother Grizzly rising up to defend her cubs. The beauty of our national parks comes to life in these pages. You and your family will be inspired to visit our national parks. Accompanies the exhibition held at the George Eastman Museum, Rochester, New York, June 4 - October 2, 2016. Excerpt from *A Guide to the National Parks of America* You cannot judge a country by its cities alone - least of all the United States. New York is typical of nothing except big cities; San Francisco is fast losing its individuality New Orleans' atmosphere to-day is more vitiated by progress than it was yester day. And so the national parks remain as the greatest and most individual recreation grounds that any American may visit, whether he cross the water or not. They combine the lure of the outdoors, the appeal of tremendous scenic magnificence,

the attractions of geological and archeological study and the observation of wild animal life, and the stimulus of being brought face to face with Nature at her best and freest. "In this sepia-tinged homage" to the iconic National Parks posters "modern artists

contribute dazzling new graphics" (Entertainment Weekly). From 1935 to 1943, the WPA's Federal Art Project hired American artist to create posters celebrating the National Parks Service. The icon See America posters inspired Americans to fall in love with the country's landmarks and wild spaces from the Golden Gate Bridge to the Gateway Arch and from the Grand Canyon to the Great Smokey Mountains. Originally published to coincide with the centennial anniversary of the National Parks Service, the Creative Action Network has partnered with the National Parks Conservation Association to revive and reimagine the legacy of WPA travel posters. Artists from all over the world participated in the creation of this new, crowdsourced collection of See America posters for a modern era. Originating in 1832 in Chicago with a balloon-framed warehouse designed by George Washington Snow, the technique of timber framing--also known at the time as "Chicago construction"--introduced softwood construction to the world. Timber frame construction quickly came to dominate the built landscape of America because of the ready availability of the principal material required, the simplicity of construction, and its ability to be erected by low or unskilled workers. The result was a built environment that erased typological and class distinctions of architectural production, as both rich and poor live in houses that are built the same way. American Framing: The Same Something for Everyone is a visual and textual exploration of

the conditions and consequences of these ubiquitous structures, the architecture which enables architecture. Archival drawings and historical images, along with newly commissioned photographs by Linda Robbennolt, Daniel Shea, and Chris Strong, in addition to plans and drawings, shed new light on this quintessentially American method of construction. This book provides the first comprehensive economic valuation of U.S. National Parks (including monuments, seashores, lakeshores, recreation areas, and historic sites) and National Park Service (NPS) programs. The book develops a comprehensive framework to calculate the economic value of protected areas, with particular application to the U.S. National Park Service. The framework covers many benefits provided by NPS units and programs, including on-site visitation, carbon sequestration, and intellectual property such as in education curricula and filming of movies/ TV shows, with case studies of each included. Examples are drawn from studies in Santa Monica Mountains National Recreation Area, Golden Gate National Recreation Area, Everglades National Park, and Chesapeake Bay. The editors conclude with a chapter on innovative approaches for sustainable funding of the NPS in its second century. The framework serves as a blueprint of methodologies for conservationists, government agencies, land trusts, economists, and others to value public lands, historical sites, and related programs, such as education. The

methodologies are relevant to local and state parks, wildlife refuges, and protected areas in developed and developing countries as well as to national parks around the world. Containing a series of unique case studies, this book will be of great interest to professionals and students in environmental economics, land management, and nature conservation, as well as the more general reader interested in National Parks.
