Core Entrustable Professional Activities for Entering Residency Feb 02 2021 This landmark publication published by the AAMC identifies a list of integrated activities to be expected of all M.D. graduates making the transition from medical school to residency. This guide delineates 13 Entrustable Professional Activities (EPAs) that all entering residents should be expected to perform on day 1 of residency without direct supervision regardless of specialty choice. The

Core EPAs for Entering Residency are designed to be a subset of all of the graduation requirements of a medical school. Individual schools may have additional mission-specific graduation requirements, and specialties may have specific EPAs that would be required after the student has made the specialty decision but before residency matriculation. The Core EPAs may also be foundational to an EPA for any practicing physician or for specialty-specific EPAs. Update: In August 2014, the AAMC selected ten institutions to join a five-year pilot to test the implementation of the Core Entrustable Professional Activities (EPAs) for Entering Residency. More than 70 institutions, representing over half of the medical schools accredited by the U.S. Liaison Committee on Medical Education (LCME), applied to join the pilot, demonstrating the significant energy and enthusiasm towards closing the gap between expectations and performance for residents on day one. The cohort reflects the breadth and diversity of the applicant pool, and the institutions selected are intended to complement each other through the unique qualities and skills that each team and institution brings to the pilot. Faculty and Learners' Guide (69 pages) - Developing faculty: The EPA descriptions, the expected behaviors, and the vignettes are expected to serve as the foundation for faculty development. Faculty can use this guide as a reference for both feedback and assessment in pre-clinical and clinical settings.- Developing learners: Learners can also use this document to understand the core of what is expected of them by the time they graduate. The EPA descriptions themselves delineate the expectations, while the developmental progression laid out from pre-entrustable to entrustable behaviors can serve as the roadmap for achieving them.

Embattled Rebel Oct 30 2020 From the Pulitzer Prize-winning author of *Battle Cry of Freedom*, a powerful new reckoning with Jefferson Davis as military commander of the Confederacy "The best concise book we have on the subject... McPherson is... our most distinguished scholar of the Civil War era." —The New York Times Book Review History has not been kind to Jefferson Davis. Many Americans of his own time and in later generations considered him an incompetent leader, not to mention a traitor. Not so, argues James M. McPherson. In *Embattled Rebel*, McPherson shows us that Davis might have been on the wrong side of history, but that it is too easy to diminish him because of his cause's failure. Gravely ill throughout much of the Civil War, Davis nevertheless shaped and articulated the principal policy of the Confederacy—the quest for independent nationhood—with clarity and force. He exercised a tenacious hands-on influence in the shaping of military strategy, and his close relationship with Robert E. Lee was one of the most effective military-civilian partnerships in history. Lucid and concise, *Embattled Rebel* presents a fresh perspective on the Civil War as seen from the desk of the South's commander in chief.
