The idea of luxury has secured a place in contemporary western culture, and the term is now part of common parlance in both established and emerging economies. This book explores the many issues and debates surrounding the idea of luxury. This new research addresses contentious issues surrounding perceptions of luxury, its relationship to contemporary branding as created by the marketers, and the impact this has on the consumer and their purchasing habits. *Crafting Luxury* considers work within the field of luxury and luxury brands, encompassing established companies with a long heritage: from conglomerates and small independents to 'new' luxury and emerging models with innovative practices. It examines the industry structures with respect to production, as well as the hierarchies that exist, and the impact these have on both internal and external perceptions of luxury, from the makers to the sellers and consumers alike. Attention is also given to the working structures of the ateliers, production facilities, origin of materials, manufacture and the impact of technology on consumption, the retail environment and sales, all providing a true insider's view of this complex world. The authors – a designer of product and jewellery, a brand strategist and a fashion designer, an architect, and a sociologist and specialist in business management – are practitioners and academics. Their approach to dissecting the complex world of luxury brings distinct viewpoints to the debate, offering different perspectives, thoughts and interpretations of luxury. *Crafting Luxury* will appeal to academics and educators, industry specialists and anyone interested in luxury as a concept. It will appeal to those in a variety of academic and industry disciplines: art history, history, social sciences and humanities with an interest in luxury, fashion studies, design, business, cultural studies and textiles. As our world has become increasingly dependent on technology, and our Western societies have become woefully "Crackberried"—to use the title of a recent documentary on the emotional and social pitfalls of our too-wired ways—an intriguing phenomenon is occurring: There is an increasing amount of interest in returning to some of the simpler arts that were neglected or left behind with the onslaught of technology. Artisans and everyday crafters are finding a renewed satisfaction in making something with their own hands; some are even communicating about the inherent physical- and mental-health benefits found in handwork—and, even more than that, they are framing their handwork as meditation or spiritual practice. In today's sophisticated and pluralistic society, people are more aware than ever that spiritual practice can be defined more expansively—and the popularity of books focusing on alternative spiritual practices demonstrate that readers are hungry for new (or ancient) ways of enhancing their inner lives. In Crafting Calm the author will explore these new forms of creative spiritual practice and the benefits they provide. The format of With Shannon's book will itself be creative, a rich "potpourri approach" that weaves together interviews, historical facts, projects for readers to do themselves, quotations, and suggested resources. Crafting Calm will serve as an inspirational resource guide to a broad assortment of spiritual practices gathered from the global arts-and-crafts communities, as well as from people who don't consider themselves artists but who have adopted creatively expressive forms of spiritual practice. While there have been a few books published focusing on a particular form of creative spiritual practice (Skylight Paths, for example, has published books on beading as a spiritual practice; painting as a spiritual practice; and using clay as a spiritual practice), no one has yet explored the breadth of possibilities for creative spiritual practices contained in Crafting Calm. Got fur balls? Are your favorite sweaters covered with cat hair? Do you love to make quirky and one-of-a-kind crafting projects?
