General Chemistry Notes Dec 13 2021 CollegeChemistryNotes.com offers "General Chemistry Notes" which is an all-in-one combined [lecture notes & textbook material] substitute that helps undergraduate general chemistry students instantly reduce their study time while increasing their lecture grade in the course. "General Chemistry Notes" is the ONLY product written by actual chemistry professors that's designed to combine both a student's [lecture notes AND textbook materials] into one easy-to-read and easy-to-understand format. So STOP spending an hour per page trying to read your complicated textbook! Additionally, "General Chemistry Notes" removes the largest distraction that every student faces during lecture: taking notes. Our Notes are the only complete set of undergraduate General Chemistry notes proven to be so effective that it has been featured in academic magazines and presented at hundreds of science education seminars in the United States. Prior to its release and distribution, the contents of "General Chemistry Notes" were used exclusively by the contributing authors while they were teaching their own General Chemistry courses at some of the top universities in the country. The contributing professors of "General Chemistry Notes" noticed that regardless of which university they were teaching at, and regardless of which textbook they were using, their lecture notes never changed. This inspired the professors, members of the AFT and ACS, to develop and write "General Chemistry Notes." Now that the Notes are available to all undergraduate chemistry students, they are the only system of their kind to be labeled the "perfect companion to chemistry students who want perfect notes." FACT: 95 % of all General Chemistry courses and General Chemistry textbooks are the same!! This fact is exemplified by the thousands of chemistry students from hundreds of different colleges throughout the U.S. who have used our Notes to earn "A" grades in their General Chemistry courses. The enormous popularity of "General Chemistry Notes" would not be possible unless they were widely applicable to ANY undergraduate General Chemistry course and ANY college-level General Chemistry textbook. Go online and Google any university's General Chemistry course number (1st or 2nd semester - it doesn't matter) and examine the course syllabus. Invariably the syllabus will look almost identical to your own. This is why college transfer credit for

General Chemistry is so freely granted to students who transfer from one educational institution to another. How quickly will YOU benefit from reading "General Chemistry Notes?" Our Notes instantly reduces the quantity of material that you must read, study, and learn by 34.7%. With years of chemistry teaching experience at the university level, the authors of "General Chemistry Notes" have been able to pinpoint exactly which material is essential and which material is completely irrelevant. An average chapter in your textbook is 41.53 pages. The average "Section" in our Notes is only 14.41 pages (a reduction of 34.7%). And remember, those 14.41 pages include the topics and contents of both your textbook and your lecture notes combined into a highly optimized easy-to-understand format. Every major topic is covered in great detail while topics never seen on exams are omitted. One particular student was studying chemistry an average of 10 hours/week, or 160 hours/semester, before he received "General Chemistry Notes." Immediately after purchasing our Notes, he was able to reduce his chemistry study-time to 3.5 hours/week, or 56 hours/semester, while earning better scores on his quizzes and midterm exams. How much money would you pay to save yourself 6.5 hours of studying per week without sacrificing your grade? If time is money, you will earn back your investment in a matter of days. So "Stop Writing, We've Already Taken Your Notes!"

Lecture Notes for Chemical Students May 18 2022

An Introduction to Chemistry Jun 26 2020 This book teaches chemistry at an appropriate level of rigor while removing the confusion and insecurity that impair student success. Students are frequently intimidated by prep chem; Bishop's text shows them how to break the material down and master it. The flexible order of topics allows unit conversions to be covered either early in the course (as is traditionally done) or later, allowing for a much earlier than usual description of elements, compounds, and chemical reactions. The text and superb illustrations provide a solid conceptual framework and address misconceptions. The book helps students to develop strategies for working problems in a series of logical steps. The Examples and Exercises give plenty of confidence-building practice; the end-of-chapter problems test the student's mastery. The system of objectives tells the students exactly what they must learn in each chapter and where to find it.
