1926-1929 BLS Report Report United States Civil Aircraft Register Employees of Diplomatic Missions 1923-1925 Department of State Publication The Foreign Commerce and Navigation of the United States Record of American and Foreign Shipping Geographical Dictionary of the World The Official Railway Equipment Register The Foreign Commerce and Navigation of the United States Annual Report of the Commissioner of Railroads and Telegraphs Annual Report Lippincott's New Gazetteer A Complete Pronouncing Gazetteer Or Geographical Dictionary of the World Annual Report of the Tax Commission of Ohio Annual Report Annual Report of the Inspector of Building and Loan Associations of the State of Ohio Encyclopedia of Associations Lippincott's Gazetteer of the World Data Book, Operating Banks and Branches Operations Research and Health Care Policy Congressional Record Congressional Record Sessional Indexes to the Annals of Congress The Foreign Commerce and Navigation of the United States for the Year Ending ... The Official Railway Guide Report The Doty-Doten Family in America Annual Report Annual Report of the Tax Commission of Ohio Foreign Commerce and Navigation of the United States Bulletin Lippincott's New Gazetteer The Ohio Bulletin of Charities and Correction Directory ... Weights and Measures Officials in the U.S. and All Members of the National Conference on Weights and Measures Investigation of Railroads, Holding Companies, Affiliated Companies and Related Matters Annual Report Investigation of Railroads, Holding Companies, Affiliated Companies, and Related Matters

The Proceedings of the Ohio Welfare Conference (previous to 1919, the Ohio State Conference of Charities and Correction); the Proceedings of the annual Convention of Infirmary Officials of Ohio; the Reports of the Board of State Charities (22d-24th, 26th-28 are supplements; 30th-31st, advance pages only); and the Reports of the Children's Bureau (previous to 1921 the Children's Welfare Dept.). Operations research tools are ideally suited to providing solutions and insights for the many problems health policy-maker's face. Indeed, a growing body of literature on health policy analysis, based on operations research methods, has emerged to address the problems mentioned above and several others. The research in this field is often

multi-disciplinary, being conducted by teams that include not only operations researchers but also clinicians, economists and policy analysts. The research is also often very applied, focusing on a specific question driven by a decision-maker and many times yielding a tool to assist in future decisions. The goal of this volume was to bring together a group of papers by leading experts that could showcase the current state of the field of operations research applied to health-care policy. There are 18 chapters that illustrate the breadth of this field. The chapters use a variety of techniques, including classical operations research tools, such as optimization, queuing theory, and discrete event simulation, as well as statistics, epidemic models and decision-analytic models. The book spans the field and includes work that ranges from highly conceptual to highly applied. An example of the former is the chapter by Kimmel and Schackman on building policy models, and an example of the latter is the chapter by Coyle and colleagues on developing a Markov model for use by an organization in Ontario that makes recommendations about the funding of new drugs. The book also includes a mix of review chapters, such as the chapter by Hutton on public health response to influenza outbreaks, and original research, such as the paper by Blake and colleagues analyzing a decision by Canadian Blood Services to consolidate services. This volume could provide an excellent introduction to the field of operations research applied to health-care policy, and it could also serve as an introduction to new areas for researchers already familiar with the topic. The book is divided into six sections. The first section contains two chapters that describe several different applications of operations research in health policy and provide an excellent overview of the field. Sections 2 to 4 present policy models in three focused areas. Section 5 contains two chapters on conceptualizing and building policy models. The book concludes in Section 6 with two chapters describing work that was done with policy-makers and presenting insights gained from working directly with policy-makers.
