Psychiatric and Mental Health Nursing Oct 22 2022 Psychiatric and Mental Health Nursing: Theory and practice was conceived as a result of three major premises which, in the view of the editors, relate to the practice of psychiatric and mental health nursing. First, that high-quality psychiatric and mental health nursing can be practised only if it is under pinned by appropriate nursing theory. Secondly, that there exists a body of theory which can and should be applied to psychiatric and mental health nursing. Thirdly, that there is a need for a text which will assist teachers, students and clinicians to apply available nursing and borrowed theory to clinical practice. The general aim of this book is to introduce nursing students to a theory based approach to caring for people with psychiatric and mental health problems. The phrase psychiatric and mental health problems indicates that the text relates to clients with a psychiatric diagnosis, and also to those who have mental health problems but who do not necessarily have such a diagnosis. The client group to which the material in this text applies will include those who are, or have been, hospitalized and those in the community who have not been, and may never be, hospitalized. The intended readership is all students of psychiatric and mental health nursing issues, for example basic and post-basic nurses, and their teachers.

Psychiatric Nursing Care Plans - E-Book May 25 2020 The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

For courses in mental health nursing Think Like a Nurse: A Holistic Approach to Psychiatric Nursing Psychiatric-Mental Health Nursing: From Suffering to Hope takes a new approach to educating psychiatric nurses, teaching them how to guide patients from a place of despair to a new beginning. Students will learn to speak like a competent, caring nurse and communicate effectively and compassionately with their patients. A unique chart outlines what nurses might be thinking, feeling, and perceiving during encounters with patients, enabling nurses to facilitate more useful discussions and understand their own feelings. Mental health and psychiatric disorders are presented in terms of how they impact Five Domains of Wellness rather than as isolated conditions. Based on the idea that mental health patients do get better, this text offers a human, holistic way to care for patients.
