[Airdrop of Supplies and Equipment](#) Apr 22 2020 "Airdrop of Supplies and Equipment: Rigging
Containers" (TM 4-48.03/MCRP 4-11.3C/TO 13C7-1-11/FM 4-20) provides doctrinal guidance and

direction for United States Army, United States Marine Corps, and United States Air Force units conducting aerial delivery operations. This manual provides information on how to prepare and rig airdrop containers. The three types of airdrop by which container loads can be delivered are low-velocity airdrop, high-velocity airdrop, and free drop. The purpose of this manual is to provide the latest approved procedures for rigging Aerial Delivery Containers. This manual is written for use by the parachute rigger, jumpmaster, and Low-Cost Low-Altitude, Aerial Delivery System certified personnel.

Container Scanning Equipment Apr 15 2022 This volume provides answers to a number of questions that can be raised when acquiring X-ray or gamma ray container scanning equipment. It forms a concise yet valuable reference tool for specialists using the latest technological equipment, which will certainly play an important role in the future of the world's Customs administrations.

Airdrop of Supplies and Equipment: Rigging Containers (FM 4-20. 103 / MCRP 4-11. 3C / To 13C7-1-11) May 16 2022 This manual, "Airdrop of Supplies and Equipment: Rigging Containers (FM 4-20.103)," provides the latest approved doctrine for rigging airdrop containers. It is written for use by a parachute rigger or jumpmaster. Container loads are loads that are rigged for airdrop in airdrop containers such as the A-7A airdrop cargo sling assembly, the A-21 cargo bag assembly, and the A-22 cargo bag assembly. These containers are packed with supplies, disassembled equipment, or small items of ready-to-use equipment prepared for airdrop. Loads may be required to be cushioned with energy dissipating material (honeycomb), felt, or cellulose wadding depending on the load requirements and the method of airdrop. The number and types of parachutes required to stabilize the load and slow its descent depend on the type of container used, the weight of the load, and the type of airdrop. This manual consists of six parts. a. Part one contains general information for container loads and aircraft. b. Part two contains procedures for rigging A-7A container loads. c. Part three contains procedures for rigging A-21 container loads. d. Part four contains procedures for rigging A-22 container loads. e. Part five contains procedures for rigging low-cost aerial delivery systems. f. Part six contains procedures for rigging specialized loads and equipment.

Airdrop of Supplies and Equipment Apr 03 2021 This manual describes and illustrates the techniques and procedures for preparing and rigging typical container loads for low-velocity and high-velocity airdrop. It also contains and illustrates procedures for rigging typical supply loads of POL, 55-gallon drums of gasoline,

individual combat meals, containers for airdrop in jungle terrain, AN/TPS-22 radar set in A-22 cargo bag, gyro azimuth theodolite in A-21 cargo bag, and 50-g.p.m. dispenser in A-22 cargo bag. These procedures will not be used for rigging ammunition in containers for airdrop; procedures outlined in TM 10-500-53/TO 13C7-18-41 will be used for this purpose.

Loading Insert Containers and Cargo Transporters Dec 19 2019 "This manual provides instruction ... on loading equipment into insert containers and cargo transporters ... [specifically] description of the equipment, construction of pallets, assembly of pallets, assembly of insert containers, of packing sealing and unitizing materials, marking the unit loads and impedimenta ..."--P. 3.

The Lease-versus-buy Decision for Container Equipment Jan 24 2023

Airdrop of Supplies and Equipment Jun 24 2020 Container loads are loads that are rigged for airdrop in airdrop containers such as the A-7A cargo sling, the A-21 cargo bag, and the A-22 cargo bag. In addition, flat steel strapping is used to rig container loads. The containers are packed with supplies, disassembled equipment, or small items of ready-to-use equipment prepared for airdrop. The container load requires cushioning material such as honeycomb, felt, or cellulose wadding, depending on the load requirements and the method of airdrop. The number and types of parachutes required to stabilize and retard the descent of the load depends on the type of container used, the weight of the load, and the type of airdrop.
